Recently 9.a4 got a lot of attention. An unusual move. White fights against ...f7-f5 but weakens his kingside. He must therefore castle queenside, which leads to positions typical for the Najdorf Sicilian. 9.a4 erhält neuerdings viel Aufmerksamkeit.

B33: Sicilian: Pelikan and Sveshnikov Variations Giri,Anish, MH: 'B33: Sicilian: Pelikan and Sveshnikov Variations RR: 'Inf 103/(89)'' **1.e4** Giri,Anish, MH **1...c5 2.Nf3 Nc6 3.d4** London system has not become entirely mainstream, but is no longer that rare of a guest at the highest level. **3...cxd4 4.Nxd4 Nf6 5.Nc3 e5** This is one of the many many ways to play against the London system, but somehow I faced it on multiple occasions already. I guess it is an easy system for Black to play, which is why my opponents continuously resort to it, when surprised. **6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7** I played all the same moves already against Wojtaszek as well as against Gelfand. Previously I would just keep waiting for Black to determine the situation in the center, but in this game I decided to start some

concrete action. **10.Bxf6!?** An interesting moment to release the tension in the center, before castling kingside. **10...Bxf6** Sort of falling for the main idea. Black can also consider 10...Nd7 or 10...0-0 instead. Giri,Anish, MH: 'Sort of falling for the main idea. Black can also consider 10. ..Nd7 or 10...0-0 instead.' **11.c4!** A new move. White is going for the bishop pair. **11...b4 12.Nc2** Besides White gaining the bishop pair, Black's problem is that it's not clear where his king would be safe, with White having kingside pawn storm option in case of a short castle by Black. **12...a5** Keeping the options open, but frankly quite slow. **13.Be2**

[ 13.g3 ]

**13...0-0 14.Bg4N** I was very happy with this move. Making the knight decide on it's destiny before it has access to a reasonable square, such as e8 or d7. Now all the squares are quite unappealing.

*[Edouard,Romain. Kitty Kat]*

Edouard,Romain: 'Cyrus Lakdawala: 'For over a year-long period occurring between 2018 and 2020, Magnus discovered the elixir of eternal life, since he went a staggering 125 classical time control games without a loss. I put this game in, not only for the irrational positions which arose within it, but also to show you that even a candidate for greatest chess player of all time can still go off the cliff and lose. And that nobody, not even masters of the irrational, like Tal and Carlsen, can play such positions over and over and remain loss free."

So I strongly urge you to order your copies today!" **6.Ndb5 d6 7.Nd5** Edouard,Romain: 'Cyrus Lakdawala: 'Caruana and Vachier-Lagrave also favour this line." **7...Nxd5 8.exd5 Ne7** Edouard,Romain: 'Cyrus Lakdawala: 'Magnus popularized this move by using it as a devastating weapon in the rapid playoff of his championship match against Caruana."

against Gelfand. Black pushed ...b5 now as Magnus did in the current game, but has lost a crucial tempo with ...b6. ]

**14.Nc3 Be7**

[ Carlsen did not dare to repeat 14...a5 which brought him a short victory against Caruana in the tiebreak of their World Championship match. The engine prefers White here, so surely both players knew a way for White to improve on the previous game! ]

[ He did not repeat 14...f5 1.04/15 14...Bf8-e7 0.54 either, as he played against Van Foreest in Wijk aan Zee (2020). ]

**15.g3**

[ 15.Na4 as in Van Foreest-Gukesh (Chess.com) may deserve attention, but here Black should probably just play 15...Qc7 in order not to lose an exchange after Nb6. ]

Cyrus Lakdawala: 'From third grade on, I learned that violence is such a wonderfully liberating way to express feelings when things are not going your way. Apparently, Karjakin shares my view. How are we to interpret such a move? --- 1. Maybe Karjakin is feeling the heat and correctly offers a defensive exchange sacrifice to ease the pressure on his position. --- 2. Maybe Karjakin misassesses and believes he is seizing the initiative with this sacrifice, perhaps forgetting that the heart of comedy is when a powerless person attempts to intimidate a powerful one. --- I'm inclined to believe number 1 on the list as Karjakin's motivation. --- EXERCISE (critical decision): White's radical last move was indeed his best practical chance, yet Black still stands better, provided that you make the correct decision on your next move. Do you want power or money? Magnus can grab the exchange on c6, which would offer White some initiative while defanging Black's initiative in return. Or he can ignore the rook and play for the initiative with a move like 24...Bc5. B33: Sicilian: Pelikan and Sveshnikov Variations IM Kushager Krishnater: 'In the third chapter, we will cover the alternate system for White with 7.Nd5. In this chapter, we will cover the positionally sound '8...Nb8'.' **1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5** Nowadays this can be considered to be one of the main weapons against the Sveshnikov. **7...Nxd5 8.exd5 Nb8 9.Qf3** I am not sure if this rare move was seriously analyzed by Wesley or he just prepared it as a surprise for this match.

[ 9.a4 is what was mainly tested at the highest level in recent years. Be7 10.Be2 0-0 11.0-0 Nd7 12.Bd2 a6 13.Na3 a5 14.Nc4 b6 15.f4 exf4 16.Bxf4 Nc5 17.c3 f5 18.Be3 Ba6 19.Qc2 Bg5 20.Bd4 g6 21.b4 Bxc4 22.Bxc4 Nd7 23.Bb5 Bf6 24.Bf2 Fandino,R (2645)-4.Bc6 bc6 5.00 Bg7 6.Re1 f6 (2690) 65/135 Groningen 1995 (11. 9) 0-1 ]

**9...a6** The most common. Black chases the strong Nb5 away.

[Another natural continuation is 9...Be7 , but then 10.Qc3 Na6! Dodges Nc7+ 11.Be3 practically forces Black to sacrifice the pawn 0-0 *( 11...b6??* 3.27/21 11...0-0 0.28 *12.Qc6+ Bd7 13.Qb7!+- )* 12.Nxa7 Bg5 This position was tested many times in correspondence games. Then play might continue: 13.Nb5! White has to liberate the knight. White wants to play Bxg5. *(*After *13.Bxa6 Bxe3 14.Qxe3 Qa5+ 15.c3 Qxa6 16.Nxc8 Rfxc8* White's king is stuck in the centre, so Black seems to have sufficient compensation for a pawn. *)* 13...Bxe3 14.Qxe3 f5 15.Qa3! *(*The timid *15.Be2* -0.25/22 15.Qa3 0.27 *f4 16.Qd2 Nc5* offers Black more attacking chances. *)* 15...Rf6! 16.0-0-0 f4 17.Rd2 Bf5 And now ... **10.Qa3** Of course, only by making this move can White justify his play. The whole idea is to put strong pressure on the Pd6. **10...b6N** 0.48/22 Magnus delays the development of his dark-squared bishop for a while.

[In case of 10...Be7 White would most likely react 11.Bg5 , and now Black can either play *( 11.Bd2 0-0 12.Bb4 Qd7 13.Be2 b6 14.0-0 Bb7 15.Nxd6 a5 16.Qh3 Qxh3 17.gxh3 Bxd5 18.Rfd1 Nc6 19.Nf5 Bxb4 20.Rxd5 g6 21.Bb5* 1 Chapter-Games Chapter 3 Game *)*

**B)** 11...Bf5!? 12.Bxe7 Kxe7 13.c4 Black must now prevent c5. Qb6 14.Be2 Nd7 15.Nc3 This position was reached in Carstens Dobuchak,T - Arrebola,D Vitoria 2018 In my opinion, the correct plan was connected with securing c5 for the knight: a5!? 16.b3 Nc5 17.0-0 Rhe8 Black should be fine here. ]

[ 10...Be7= 0.10/25 ]

**11.Bg5±** A standard tactical idea in this line. White provokes the somewhat weakening ...f7-f6. Deflection **11...Be7** 0.99/15 Possibly Magnus was aiming to avoid his opponent's preparation as soon as reasonably possible. In any case, this decision is dubious.

[ Much better is 11...f6!

[ 11...f6± 0.56/21 deserves consideration. 12.Bd2 Bb7 ]

**12.Bxe7± Kxe7 13.0-0-0** A novelty. Wesley chooses the most aggressive setup. Indeed, the Ke7 feels unsafe now, while most of Black's pieces are located on the back rank.

**13...Bb7** Black cannot do without this move, but now the Bb7 is poor. **14.Nc3 Nd7 15.f4!** Again, the most energetic. Wesley is aiming to open files on the k-side as soon as possible. **15...Qc7**

This quiet move is a favourite choice of top GM Wesley So. Black's activity on the q-side is heavily limited, and b4 is vacant for the knight.
[ The main line 13.a4 bxa4 14.Ncb4 is covered on the site in dozens of games, and it looks like Black is doing OK. ]
**13...0-0** The most common response.
[ 13...a5 was seen in a classical game from a long time ago: 14.Bd3 *(* Worthy of attention is *14.h4!? Bxh4 15.Nce3 Bg5 16.a4* with promising play for a pawn. *)* 14...Ne7 15.Nxe7 Qxe7 Black had acceptable play in Kasparov,G - Kramnik,V Frankfurt GER 2000 [Fed] ]

[ The quiet 14.Be2 Be6 15.0-0 Qd7 16.Qd3 f5 yielded Black comfortable play in Milde,L - Wimmer,R ICCF email 2016 ]
**14...Bh6 15.g4** The most consistent and challenging. Of course, by making this move White also takes a definite risk.
[ The more timid 15.g3 was also tested at the highest level this year: a5 16.Qd3 Ne7 *(* The more aggressive *16...f5!?* also looks perfectly playable. *)* 17.Nce3 Bxe3

**16.Qf3 Be6** A new move for our PGN Archive.

[Another version of the pawn sacrifice is 16...a5!? 17.Be2 *(*The immediate *17.Nxf4 exf4 18.Qxf4 b4* gave Black excellent counterplay in Shankland,S - Praggnanandhaa, R Kolkata 2021 *)* 17...Be6 18.Nxf4 exf4 19.Qxf4 b4 was approximately balanced in Smerdon,D (2463)-Mikhalevski,V (2608) Queenstown Classic 2009 [Richard Palliser] ]

**17.Nxf4 Qf6** Black accepts a solid, but slightly inferior endgame.

[In my opinion, 17...exf4!? 18.Qxf4 a5 is more in the spirit of the Sveshnikov. White lacks development, and his king is somewhat unsafe. Then play might continue: 19.h5 b4 20.axb4 axb4 21.h6 g5 22.Qd2 bxc3 23.bxc3 Ne5⩲ Yunusov,A - Serner,A ICCF email 2019 ]

**20...Rb6!** Rauf comes up with a decent novelty. It hardly fully solves the problems, but Black's defensive task seems easier now.

**22...Re8**

[As in the above-mentioned note, 22...f6!? comes into consideration. For instance, 23.Rd4 Kf7 24.Ke2 Ke7 25.Bh3 Bb3 with acceptable play. ]

**23.Rd4 h6** GM Mamedov decides to simplify matters, but this weakens his pawn chain on the k-side.

[It was possible to change the pawn structure with 23...d5 24.e5 Bf5 25.Rxf4 Rxe5+ 26.Kd2 g6 , but White's pawn structure is still more healthy. ]

**24.Kd2** A bit inaccurate.

**24...Kf8?!** Rauf returns the favor. After this move Black is doomed to passive defence.
[ The correct way was 24...g6! fixing the weak Pg5. It looks like Black has sufficient counterplay in all cases: 25.gxh6 *( 25.Bh3 Bxh3 26.Rxh3 hxg5 27.hxg5 Rc5⇄ )* 25...Kh7 26.Bh3 Bxh3 27.Rxh3 Rc4 28.Rhd3 Kxh6⇄ ]

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5**
This move was renovated by Fabiano Caruana in 2018, and since then it is considered one of the most dangerous weapons vs the Sveshnikov. **7...Nxd5 8.exd5 Nb8 9.a4 Be7 10.Be2 0-0 11.0-0 Nd7 12.a5!?** A new move for our PGN Archive. Baadur has a positive experience in this rare line.
[The following 3 possibilities were tested at the highest level: 12.Kh1 Vachier Lagrave,M (2779)-Carlsen,M (2875) Stavanger NOR 2019 [Roiz,M] ] [ 12.b4 Caruana,F (2832) -Carlsen,M (2835) London ENG 2018 [Roiz,M] ] [and 12.Bd2 Svidler,P (2735) -Caruana,F (2819) Karlsruhe/Baden Baden GER 2019 [Roiz,M] ]
**12...a6** Black can hardly allow the nasty Nb5 for too long. **13.Nc3 f5 14.Ra3**
This manoeuvre was already employed by GM Jobava before.
[The prophylactic 14.f3!? is also worth attention. For instance, f4 *( 14...Bg5 15.Bxg5 Qxg5 16.Qc1 Qd8 17.Qd2±* Schirmer,M - Pommrich,R ICCF email 2014 *)* 15.Bd2 *(*For some reason, the natural *15.Ne4!?* was never tried yet *Nf6 16.Bd3 Nxe4 17.Bxe4 Bf5 18.Re1± )* 15...Nf6 16.Na4 Bf5 17.Bb4 leads to a tense position with mutual chances. It was tested in 3 correspondence games. ]
**14...f4** Alexander goes for the same plan, as covered in the above-mentioned note. Black isn't worried of weakening the e4-spot.
[In my opinion, 2 other moves from Baadur's games offer Black acceptable play: 14...e4!? 15.Bf4 Rb8 *(*Worse is *15...Ne5 16.Na4 Ng6 17.Bd2±* Jobava,B - Salgado Lopez,I Tbilisi 2017 *)* 16.Kh1 Ne5 17.Na4 g5⇄ ]

**15.Bd2**
[The more straightforward 15.b4!? can also be promising: b5 *(*After *15...Nf6 16.Na4 Bf5 17.Nb6 Rb8 18.c4* White's play on the q-side is faster. *)* 16.axb6 Qxb6 17.Rb3 Nf6 18.Na4 Qc7 19.c4± Filipchenko,V - Glukhovtsev,S ICCF email 2016 ]
**15...Rf6N** 0.80/20 A dubious innovation. By making this move Black shows that he is only relying on the k-side attack. This strategy was justified in the game, but objectively it's too risky.

**25...Rxf4 26.Rxf4**→ Strongly threatening Qe4. White attacks. **26...Bd7 27.Rf1** next Qf3 is good for White. **27...Re8?!** The problem was that I considered mostly the natural move ...g6, which was well met with Ne4 and once I spotted Qf6 I was just too happy not to play it. In fact I was sort of proud of this move, but it was actually here where I let the biggest part of my edge slip. **28.Kh1!** Now that White retreats Black enjoys a pawn structure for free, but at the same time, White is still very solid and it is hard to convert Black's position edge into something real. **28...Qd5**

**30.Nf5 g6** Hoping for ...Rf8. very sloppy. I played this swiftly and usually these inclusions happen indeed automatically, but here it was important to regroup the queen immediately to d6, which I later realized turned out to be not so easy. **31.Nh6+ Kg7! 32.Qh4** And now Rf7+ would win. **32...Re4?!** 3.48/35 Black is now going downhill. I had to of course go Qc7 to keep any winning chances, but not wanting such an endgame in general and having refused it in much better version earlier, I acted too stubborn.

I bluffed that I had Nc5-Nd3, but obviously White has many ways to deal with it. Now the position is just totally equal. Black still has a better pawn structure on the queenside, but White's queen is more centralized. **35.Qf8! hxg4 36.Rf7+ Qxf7 37.Qxf7+** Endgame. KQ-KRB **37...Kh6** ( → ...Re1+) At this point I had given up on this game and expected White to smoothly coast towards equality. My opponent, however, decided to use the momentum which was in his favour for the last few moves and decided to try his luck. **38.Kg1?** Taking on b7 would be the easiest when White should manage it quite easily. At first I thought the move in the game was fine as well, but then I noticed that I can reply with the calm **38...Kh5!** Now it turns out that White can no longer win back the pawn. **39.Kf2**

**39...Bc2 40.Qd5+ Re5 41.Qxd6** Accompanied by the draw offer, to which I by accident instantly replied "yes, I can see that." Embarassing stuff and my only excuse is that the draw offer came as a shock. **41...Rb5** Black of course has a way to play on. **42.b4** White is clearly winning. **42...Bb3**
[ 42...a4 43.Kg3 All forced. Now we get a 3 vs 2 endgame. I wanted to prevent g4 for a while and I am not sure if White can play without f4 forever. Something to think about. Carlsen-Anand is a game to study. The position was the same with colors reversed and White having a4-b3-c3 vs b6-c5 pawns. There Vishy defended better than Kirill, conceptually, as he kept the knight around good squares, but eventually stumbled as well, after meeting h4 (there a5) with g4(b5) instead of gxh (bxa). a3 44.Qd8 ]
**43.Kg3!** After a long think my opponent pulled himself together and found the way to defend. My advantage started to evaporate as I started to calculate the lines deeper and finally I settled on the long line which seemed to offer some practical chances.

However, as we will see, matters aren't that clear and I believe it's a good alternative to the main lines. A typical mistake here is to fight for the d5-square right away by means of 16...Ne7? which drops a pawn after 17.Nxe7+ Qxe7 18.Bxf5! as Bxf5 19.Nxf5 Rxf5 20.Qd5+ would lose more material. ]

[Moreover, Black can't win a piece by means of 16...f4? as it runs into 17.Qh5! and now the difference with 16.Bc2 becomes obvious as White hasn't wasted a tempo with his bishop and castled kingside instead. Rf7 18.Bxh7+ Kf8 19.Bg6 *( 19.Bf5* is also possible. *)* 19...fxe3 20.fxe3 Raa7 21.e4 and despite the extra piece, Black isn't able to untangle: Kg8? 22.Qh7+ Kf8 23.h4! Ne7 24.Bxf7 Bxf7 25.Rxf7+ Kxf7 26.Rf1+ 1-0 Quintiliano Pinto-Aranha Filho, Goiania 2016. ]

[The main continuations 16...Kh8 and ]

[ 16...Ra7 , both with the idea to prepare ... Ne7, have been worked out in quite some detail. So,Wesley: 'Game 8 of the Carlsen-Caruana match. Many questions are in the air. Are we going to see the same Sicilian Rossolimo or will we finally see 1.e4 e5? **9...Be7 10.Be2 0-0 11.0-0 Nd7 12.Bd2 f5** Fabiano follows Magnus's play from their encounter.

**1.e4** Tadic,Branko **1...c5!?** Considering the tournament standings, maybe made this a somewhat surprising move. Magnus was leading the tournament by ½ a point ahead of Karjakin who then had a further 1 point to the rest of the field. Meaning for Karjakin this was almost a " must-win" situation as if the game was drawn he would need not only to score half a point more in the final round, but also to win a playoff. Even so Magnus stayed loyal to the Sveshnikov which generally does promise solidity, but as shown in the London WC match does allow one way for White to get a very complex battle: Considering the tournament standings, maybe made this a somewhat surprising move. The game lasted until move 158 before a draw was agreed. Black is better, as apart from fixing the pawnstructure on the queenside, the exchane of dark-squared bishops

is another small achievement. At the same time it's difficult to make progress on the kingside. White's pieces are well placed anticipating any possible pawn break. In a human game anything can still happen though and I believe that White's task is at least as difficult.

In a promising position, he started complications in which his risk was higher than Carlsen's. Eventually, he could not cope with the difficulties that had arisen. It was not only a matter of total score at that moment, but it became obvious that Caruana would have really hard time trying to win the next game with the black pieces. In the last game of rapid chess, Caruana managed to avoid a forced draw, but Magnus fully controlled the situation. Fabiano could make a draw, but there was no real chance of winning. Trying to start a fight and dodging a draw, Fabiano eventually lost. WHAT WILL THE FUTURE BRING? A unique case in history - all the games of the classical part of the match ended in a draw, but the match cannot be called boring. Both rivals fought well, and looked for chances, but their powers were equal. Neither was able to show superiority - Carlsen was not stronger in the endgames, Caruana was not better in difficult double-edged positions. However, Caruana's preparation was more interesting, so if he continues with the same approach he will soon become number 1 rated player. Recently, there is a lot of talk about the crisis in Carlsen's play, and he himself, in general, also confirms these observations. Of course, his competitors are not standing still, and the old tricks are no longer enough, so he needs new ones. I am sure that Carlsen did not show everything he was capable of. It is also quite obvious that the World Champion should play well in all types of

chess - both in the classical time control, as well as in the rapid and blitz. Not long ago, rapid and blitz were taken less seriously, and the tie-break was considered to be something unusual. However, today you cannot think in such manner. For the second time in a row, the title of the strongest chess player in the world was decided in rapid chess. We must all learn something from that and devote serious effort in preparation for the faster time controls as well.*; 29.Qb5 Rxc1+ 30.Bxc1 Nd3+-+; 29.Qe2* Cyrus Lakdawala *Nd3+ 30.Kf1 Nxc1* is curtains for White. --- After heroically fighting Carlsen to a 6-6 tie at the classical time control, Caruana got annihilated in the rapidplay, with a reverse 0-3 hat trick. To his great credit, Caruana has obviously been working on his rapid chess such that, just a month before this book was written, he destroyed Kasparov in a blitz match. I have a feeling Carlsen won't roll him over so easily next time, if they face off in a rapidplay playoff in the future. *)* 29...Qf3! was the point, and White can only solve 2 out of the 4 problems faced by his major pieces. was the point, and White can only solve 2 out of the 4 problems faced by his major pieces. ]

The black centre collapses, and the movement on the flank turns out to be weakening in the position with the open centre. Curiously, Fabiano spent 33 minutes on this move! He spent 10 minutes on 20.Bc3, and Magnus thought over his own move 20, and since 20...Bf5 is a principled attempt, didn't he foresee it? I believe that Fabiano thought that the move was impossible because of 21.c5, and when Magnus played it, after a long deliberation, Fabiano also decided to think for a bit longer. However, 33 minutes is still a lot. Before that, Fabiano had 50 extra minutes, but after the move Caruana had 54 minutes more versus 33 minutes for Carlsen.' **d5!**

[ The only right continuation, trying to exploit the vulnerable knight on f5. After a quiet move like 6...d6?! White has several promising moves to start the battle for the central light squares. ]

**7.exd5**

[ 7.Nxd5?! Nxe4! 8.Nfe3 Be6 9.Bc4 Bc5 and Black has a clear advantage in Khachiyan-Ynojosa Aponte, chess. com 2018, as the knight on e3 hinders White's development. ]

**7...Bxf5**

[ 7...Nxd5?! is met by 8.Nxg7+! Bxg7 9.Qxd5 and Black's compensation for the pawn is insufficient. ]

**8.dxc6 bxc6**

[ More ambitious than the alternative 8...Qxd1+ 9.Nxd1 bxc6 which has been seen in various games as well, but doesn't really give Black any hopes to play for an advantage. ]

**9.Qf3**

[ 9.Qxd8+?! Rxd8! gives Black a clearly favorable version compared to the previous note as the pawn on c2 is hanging. ]

Ke7* wins for Black. *)* 15...Bc5 16.Qc4 0-0 offers Black fantastic play. ]

**10...e4!?**

[ Once again, this ambitious move appeals most to me. Black could also consider 10...Bxc2 11.0-0 Be7 12.Qe2 Bg6 13.Qxe5 0-0 14.Rd1 Qb7 when Black's activity compensates the slightly inferior pawnstructure. ]

**11.Qg3**

[ 11.Qe2 as was seen in Maki Uuro-Sammalvuo, Finland 2012 and now I would suggest the simple developing move Be7 with reasonable play for Black. ]

**11...Bg6 12.0-0**

[ The piece sacrifice 12.Nb5? is too optimistic and after cxb5 13.Qe5+ Kd8 14.Bxb5 Bd6 Black easily went on to win in Rogers-McShane, West Bromwich 2004. ]

**12...Bd6 13.Qh4 0-0**

[ The exchange of queens after 13...Qg4? 14.Qxg4 Nxg4 15.h3 Ne5 as was seen in Kobese-Solomon, Abuja 2003 and now 16.Bb3! followed by Be3, Rad1, Na4 etc. gives White a pleasant edge. The pawn on e4 blocks the bishop on g6 and also gives away a lot of dark squares. ]

**14.Bf4**

[ White should go for the exchange of dark-squared bishops, since after 14.Rd1?! Qc7! 15.Bg5 Be5 Black is simply better in Singh-Antonio, Kolkata 1994. ]

**14...Be7 15.Rad1 Qb7 16.Bb3 Nd5 17.Bg5 Bxg5 18.Qxg5 Nxc3 19.bxc3**

(Diagram)

After a complicated opening battle the smoke has cleared. White has accepted an inferior pawnstructure and in return controls the d-file. Further simplifications are initiated by Black's next move and a draw seems to be the logical outcome in this game where the equilibrium was never really broken. **19...Qb5 20.Qxb5 cxb5 21.Rd5 Rab8 22.h4 h5 23.c4 bxc4 24.Bxc4 Rfc8 25.Bb3 e3 26.Rd7 exf2+ 27.Rxf2 Rb4 28.Rxa7 Rxh4 29.a4 Kh7 30.Bxf7 Bxf7 31.Rfxf7**

**15...bxc4 16.Nxc4** The idea is to swap off the light-squared bishop and then to exploit the light-squared weaknesses on the queenside (above all b5). The last 2 moves, however, do not really fit well together so White's advantage is restricted. Die Idee ist den weißfeldrigen Läufer abzutauschen und danach die weißfeldrigen Schwächen am Damenflügel (vor Allem b5) auszunutzen. **1.e4** Vogel, Roven **1...c5 2.Nf3 Nc6 3.d4 cxd4** Sometimes I play the Grunfeld, sometimes I don't. **4.Nxd4 Nf6 5.Nc3** A solid system, that I have also employed with the White pieces. White wants to recapture on c3 with the bishop, to effectively neutralize the pressure of Black's dark squared bishop along the long diagonal. **5...e5!?** I noticed this rare move a while back. Black is trying to confuse White with the move order. I had already played it against Gukesh in Champions Tour online and later Carlsen also used it, to win a good game in the first round of the World Cup against Martinovic. **6.Ndb5** Gukesh did 6.e4, while Martinovic 6.Rc1, both of which are critical as well. Nodirbek, however grabs the pawn. **6...d6 7.Nd5** Vogel, Roven: 'As noted in my analysis, I don't think this move is critical. An Early Finish Of course, when only two games remained in the classical portion of the match, thoughts of a tiebreaker inevitably arose. According to my feelings, at this moment Carlsen's plan was already to end the games in a draw and seek victory in rapid chess. In the 11th game Caruana confidently reached the equality with the black pieces and the game quickly ended in peace. After the immense struggle in the 8th and 10th round, there was a feeling that the 12th could be decisive. One starts discarding options that are seemingly risky, as a draw seems suitable, because in order to win - you must be prepared for serious risk. Having made this draw, Carlsen completed his task, achieved the desired result. Is his decision good or not from a chess point of view? Decide for yourself! It is worth noting that although Caruana managed to achieve positions of his liking in the second half of the match - difficult positions which require precise calculation - Carlsen still proved to be a tough nut to crack even in move by move calculations. It turned out that both rivals had chances, but they could not use their trumps successfully, so the classical part of the match naturally ended in a draw. Krasenkow,Michal: 'Black offered a draw although he could have played for a win without major risk.' Cyrus Lakdawala: '. --- Carlsen held a slight edge in a sharp position, with a 38 to 15 minute advantage on the clock, but shocked everyone by offering a draw which, from a sporting aspect, is a giant anti-climax. The critics on the internet went nuts about this apparently preposterously wasteful decision, accusing Carlsen of losing his nerve, which is of course nonsense. I was one of the few who argued that his decision to draw was a smart one, for the following reasons: -- 1. Sure, Black stands slightly better but if he goes all out for the win, he can easily lose, since there is no risk-free way to play for the full point. In such a crazy complicated position, even a world champion may falter. -- 2. Caruana is behind on the clock, yet in such a situation he will do nothing and invite Carlsen to come and get him. I actually don't believe White's game is all that difficult to play, at least for now. -- 3. Carlsen was clearly the heavy favourite at the faster time controls, so why not enter the rapidplay phase.' So,Wesley: 'Draw agreed. A big surprise, considering that Black still had a stable advantage in the position and on the clock. (If I remember correctly Magnus had 50 minutes left here compared to Fabiano's 20 minutes.) I guess Nh3 followed by Ng5 gives White a solid position, so Magnus decided to call it a day. Magnus must be really looking forward to the rapid tiebreaks, as he did two years ago against Sergey Karjakin. He missed great winning opportunities on move 25 and move 29 and I sort of suspect he came into the game with an eye on the tiebreaks. It's also posisble that he just wnated to make a lot of people happy (including myself). As two years ago we again get to see a four game rapid playoff! I am very excited to watch this match live. My prediction is that Fabiano will give Magnus a run for his money. That said, rapid games are a totally different kind of chess. Usually the player with the better nerves wins. Let's see what happens. ' So,Wesley: 'Draw agreed. A big surprise, considering that Black still had a stable advantage in the position and on the clock. Tower of Match (4) 08.08.2017
*[Roiz,M, Kitty Kat]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6** For some reasons, this continuation is rarely seen at the top level nowadays. **9...gxf6 10.Nd5 f5 11.Bd3 Be6 12.0-0 Bxd5 13.exd5 Ne7 14.Re1** The main strategic idea behind this move is to make it hard for Black to play ...e5-e4.

[The most common alternative - 14.c3 is covered in Bailet,P (2499)-Rambaldi,F (2554) Drancy FRA 2016. This line seems acceptable for the second player. ]

**14...Bg7 15.c3 0-0 16.Qh5 e4 17.Bf1 Re8** This is the most natural continuation - the rook can now easily be transferred to h5 via e5 in many cases.

[After 17...Qc8 18.Rad1 Ng6 *( 18...Rb8 19.Nc2 Re8 20.Nd4±* Gonzalez de la Torre,S - Llaneza Vega,M San Sebastian 2009 *)* 19.g3 Re8 20.Bh3 Re5 21.Nc2 Qc4 22.Ne3 Qxa2 23.Qe2→ Black had an extremely dicey position in Short,N - Krasenkow,M Tripoli 2004 ]

**18.Nc2** A new move for our PGN Archive. The knight is heading for d4 or e3 and unlocking the a-file, so it makes sense to keep the rook on a1. This idea is more dangerous

[than 18.Rad1 , as covered in Smikovski,I (2554)-Tregubov,P (2658) Novokuznetsk 2008 [Richard Palliser] ]

**18...Nxd5** The most consistent - Black didn't have a good possibility to maintain the tension.

[Worse is: 18...Rc8 19.a4 Nxd5 20.axb5 axb5 21.Qxf5 Re5 22.Qh3 h5 23.Ra7 , and White was clearly better due to his access to the 7th rank in Goloshchapov,A - Moiseenko,A Cappelle la Grande 2006 ]

**19.Qxf5 Re5 20.Qh3**

[ 20.Qg4 f5 21.Qd1 was seen in Karjakin,S - Felgaer,R Dos Hermanas 2005 and a few more games. In my opinion the most convincing way of equalizing hasn't been played yet: Nb6! 22.f4 Rc5 23.Ne3 Qf6= ]

**20...Qf6N** I am not sure if this innovation is the best way of solving the problems.

[ 20...Nf4 was seen many years ago in Ernesto's practice: 21.Qg4 Ne6 22.f4 *(*Perhaps, this time GM Inarkiev would have played *22.a4! bxa4 23.Rxa4 d5 24.Ne3* , and Black has some problems to solve with weak a6 and d5 pawns. *)* 22...exf3 23.Qxf3 Ng5 Black was OK in Inarkiev,E - Babula,V Pardubice 2003 ]

[Deserving of serious attention is 20...Qb6!? , securing the q-side pawns and intending to connect the rooks. Play might continue: 21.Nd4 *( 21.Rad1 Rae8 22.Rd4 R8e6⇄ )* 21...Rae8 22.Nf5 R8e6 23.a4 e3 24.Kh1 e2 25.Rxe2 Nf4 26.Qg4 Rxf5 27.Qxf5 Nxe2 28.Bxe2 bxa4! *(*Of course, not *28...Rxe2 29.Qc8+ Bf8 30.Qg4++- )* 29.Bc4 Rf6 30.Qc8+ Bf8 , and a draw seems unavoidable. ]

**21.a4** The desertion of Black's queen from the q-side makes this break more

effective. **21...Rd8 22.axb5 Nf4?** A serious mistake - Black's pieces are not ready to create any serious threats on the k-side, so this move turns out to be a loss of time.

[ The real test of Gelfand's novelty would be seen had Black played 22...axb5 Now White has a wide choice of good-looking possibilities, but it looks like none of them promises anything special. For instance, 23.g3 *( 23.Nd4 Nf4 24.Qg3! d5⇄; 23.Ra6 Rf5 24.Ne3 Nxe3 25.Qxe3 b4 26.cxb4 Qxb2= )* 23...Qg6 24.Ra5 *( 24.Nd4 Rh5 25.Qg2 Bxd4 26.cxd4 Nf6= )* 24...Nxc3! A simple tactical shot, which enables Black to liquidate into an equal endgame: *( 24...Nf4 25.Qh4 Ne6 26.Qe7 Bf6 27.Qb7 Nc5 28.Qc6 Nd3 29.Rd1± )* 25.bxc3 Rh5! 26.Qg2 Bxc3 27.Rxb5 Rxb5 28.Bxb5 Bxe1 29.Nxe1 d5= ]

**23.Qe3! axb5 24.Qb6** 0.28/19

[ Possible was also 24.g3!? Nd5 25.Qe2 b4 26.cxb4**±** The powerful b-passer puts Black in a difficult situation. ]

[ 24.g3**±** 0.79/19 Nd5 25.Qd4 ]

**24...Kh8** 1.14/20 Boris is focused on becoming active counterplay,

[ but it was better to exchange into an inferior endgame by means of 24...d5! 25.Qxf6 Bxf6 26.Red1 Ne6 27.g3 d4! 28.cxd4 Red5 29.Ne3 Rxd4 30.Bxb5 Rxd1+ 31.Rxd1 Bxb2 32.Bc6 - White grabs a pawn, but the limited material balance offers Black good drawing chances. ]

[ 24...d5= 0.28/19 25.Qxf6 *( 25.Qxb5 d4= )* 25...Bxf6 ]

**25.Ne3** 0.63/21

[ White should play 25.g3!**±** 1.14/20 ]

**25...Rg8?** 1.30/18 A decisive mistake.

B33: Sicilian: Pelikan and Sveshnikov Variations
**1.e4 c5** This time Baadur avoids a discussion in the Caro-Kann, which used to be his main weapon vs 1.e4 for many years. **2.Nf3 Nc6 3.Nc3 Nf6 4.d4** White prefers not to play the Rossolimo side line with 4.Bb5 **4...cxd4 5.Nxd4 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 Be6** As usual, GM Jobava prefers less explored theoretical continuations. This well-forgotten move has gained popularity in the last few years.
**9.Nc4** This is definitely the best.
[ After 9.Nd5 0.00/26 9.Na3-c4 0.70 Qa5+ 10.Bd2 Qd8 White has no good way to avoid a repetition. ]
**9...Rb8**

**10.a4**

[ In my opinion, 10.Nd5!? is the most challenging move for Black, who has to concede the strong light-squared bishop Bxd5 11.exd5 Ne7 12.Bxf6 gxf6 13.a4 This position is very complex, but White's chances are preferable, as demonstrated in Kryvoruchko,Y (2693)-Iturrizaga Bonelli,E (2650) Monzon ESP 2016 [Roiz,M] ]

[ 10.Be2 Nd4 11.0-0 Be7 12.Bxf6 Bxf6 13.Ne3 0-0 14.Ncd5 Bg5 15.c3 Bxe3 16.Nxe3 Nxe2+ 17.Qxe2 b5 18.Rfd1 Qb6 19.Rd2 Rbd8 20.h4 Qc6 21.Qf3 f5 22.exf5 Qxf3 23.gxf3 Bxf5 24.Rad1 Bc8 1-0 (51) Diaz Perez,M (2487)-Perpinya Rofes,L (2189) Badalona op 48th 2024 (9) ]

**10...Be7N** Curiously, this natural developing move, connected with a pawn sacrifice, is practically unexplored.

[ 10...Nb4 is what strong players usually prefer here, since a2-a4 made b4 vacant for the knight. Still, after something like 11.Bxf6 Qxf6 12.Ne3 Rc8 Dodges Bf1-c4 13.Be2 g6 14.0-0 , as in Vitiugov, N - Maghsoodloo,P Chess.com INT 2020 White seems to have a slight, but long-lasting positional advantage. ]

[ 10...h6 11.Bxf6 Qxf6 12.Nd5 Qg6 13.f3 Bxd5 14.Qxd5 Be7 15.c3 0-0 16.g3 Qh5 17.Bg2 Kh8 18.0-0 f5 19.f4 Chapter 22-B21) ]

**11.Bxf6** White is slightly better. **11...Bxf6** Of course, recapturing with a pawn shouldn't be considered. **12.Nxd6+**

[ The other recapture - 12.Qxd6 Be7 13.Qxd8+ Rxd8 14.Ne3 Nb4⩲ hardly poses Black serious problems - all his pieces are very active. Dodges Nc3-d5 ]

[ However, deserving of serious attention is 12.Nd5!? 0-0 13.a5 , switching to quiet paths. For instance, Bg5 14.h4 Bh6 Papastavropoulos,A - Dochev,D Glyfada 1999 , and now the simple 15.Be2 Kh8 16.c3 f5 17.Bf3 would have offered White a promising position. ]

**12...Kf8 13.Nc4** White has to move his knight from the danger zone. Excellent horsemanship.

[ Risky is 13.Bc4 0.20/23 13.Nd6-c4 0.59 Na5!? 14.Bxe6 -0.19/16 *( 14.Ba2!±* 0.45/18 *)* 14...fxe6= 15.b4 Nc6! 16.Na2 Qc7 Black took over the initiative in Lekkas,F - Solomon,S Melbourne 2018 ]

**13...Bg5** 0.85/20 I am not sure if this move is the most precise.

[ Worthy of attention is 13...g6!? 14.Nd5 Kg7 15.c3 Bg5 , though even then Black doesn't seem to have full compensation. ]

[ 13...g6⩲ 0.46/22 ]

**14.Bd3?!** 0.21/22 Sebastian is naturally aiming to complete his development faster.

[ However, stronger was 14.Nd5! h5 15.c3 g6 16.Ncb6 Kg7 17.Bc4⩲ The stability of the knights makes White's position very safe, and there is no real compensation for a pawn. ]

[ White should play 14.Nd5!± 0.85/20 ]

**14...h5!** A decent multi-task move. The advance of the h-pawn puts White's king under some pressure and also makes it possible to involve the Rh8. **15.0-0 h4**

**16.Re1?!** 0.05/21 After this careless move White's advantage is eventually spoiled.

[ After the cold-blooded 16.h3 Bf4 17.Kh1 g6 18.a5± White's chances still seem preferable. ]

[ White should try 16.h3± 0.62/20 ]

**16...Rh6** 0.48/20

[ 16...h3!? 17.g3 g6 was slightly more precise, since then after 18.Nd5 Bxd5 19.exd5 Qxd5 20.Bf1 Prevents Qd5-g2+. Qe6 Black has nothing to worry about. ]

[ 16...h3= 0.05/21 17.g3 Qd4 ]

**17.Bf1** This is consistent, but by trading queens White doesn't achieve much.

[ It was a good moment to give the pawn back: 17.Nd5! h3 18.g3 Bxd5 19.exd5 Qxd5 20.Bf1 , and then Black still has to play precisely in order to maintain the balance. Dodges Qd5-g2+ ]

**17...h3! 18.g3 Qxd1 19.Raxd1 Bxc4** Baadur reasonably decides to get rid of the Nc4 – so that he can place the knight in the centre.

[ Another decent option was 19...b5!? 20.axb5 axb5 21.Nd6 Nd4 , and Black's chances are by no means worse. ]

**20.Bxc4 Nd4** Threatens to win with ...Nd4-f3+. **21.f4** This move demonstrates GM Bogner's ambition. **21...Rc6!** This is definitely the strongest.

[ In case of the timid 21...Bd8 22.Rf1 Wards off Nd4-f3+ Nxc2 23.Nd5 White's position looks safe. Against Nc2-e3 ]

[ 21...exf4 22.Rxd4 fxg3 23.hxg3+- ]

[ 21...Nf3+ 22.Kf2 Nxe1 23.fxg5+- ]

**22.Bb3** The most accurate.

[ After 22.Bd5 Nf3+ 23.Kf2 Nxe1 24.Bxc6 bxc6 White can take any piece, but in all cases he is on the defending side. ]

**22...Nxb3**

**23.cxb3**

[ Worse is 23.fxg5 Nd4 24.Rd3 Repels Nd4-f3+ Ne6!∓ ]

**23...exf4** The superiority of the bishop over the knight makes White's position a bit uncomfortable. **24.gxf4** Only this natural move puts White in real danger.

[ Had GM Bogner played 24.Rd3! Rd8 25.Red1 Rxd3 26.Rxd3 fxg3 27.hxg3 the game would most likely end in a draw. ]

[The other common retreat 8...Nb8 usually leads to quieter play. ]

**9.c4 Ng6 10.Qa4 Bd7 11.Qb4 Qb8 12.h4** h5 would now be deadly. **12...h5 13.g3** This restricting move is new to our site.

[ 13.Be3 a6! 14.Nc3 f5 is covered in Van Foreest,J (2612) -Carlsen,M (2835) Wijk aan Zee NED 2019 [Roiz,M], where Magnus managed to convincingly outplay his much lower-rated opponent. Still, this line doesn't look very comfortable for Black. ]

**13...Be7** This natural choice has a serious drawback - the Ng6 is left misplaced. White is slightly better.

[ Therefore, it made sense to play 13...a6!? 14.Nc3 Ne7! For instance, 15.Bd3 Nf5! 16.a4 a5 17.Qb3 Be7⇄ Complex double-edged play is ahead. ]

**14.Be3** 0.16/11

[ Deserving of serious attention is 14.Be2!? e4 *( 14...Bg4?!* 1.23/10 14...e4 0.52 *15.Bxg4 hxg4* , as in Schwarhofer, C - Wiedermann,D Austria 2007 should be met by *16.c5! dxc5 17.Qxg4 a6 18.Nc3* White's position is close to winning from a positional point of view.*;* inferior seems also *14...a6 15.Nc3 0-0 16.Bxh5 b5 17.cxb5 Bd8 18.a4 axb5 19.a5* claiming adequate compensation for a pawn is gonna be a tough task. *)* 15.Bg5 a6 16.Bxe7 Kxe7 17.Nd4 ]

[ 14.Be2± 0.55/13 might be stronger. ]

**14...a6 15.Nc3 a5?** 0.68/24 A novelty. This anti-positional move is the main cause of Black's defeat. A similar risky decision was made by Magnus in his game vs Fabiano Caruana, that can be found in the Archives.

[ GM Banusz had no reason to reject the natural 15...0-0 16.Na4 *(* After *16.Be2 b5! 17.cxb5 axb5 18.Bxh5 Bd8 19.0-0 Ne7⇄* White's setup on the k-side is exposed, so ...f7-f5 would offer Black decent counter-chances. *20.Bg5 Ba5 21.Qb3 Nf5 22.Ne2 Bb6 23.Rac1 Ra4 24.Rc6 Bxc6 25.dxc6 Rc4 26.a4 Nd4 27.Nxd4 Bxd4 28.axb5 d5 29.Rc1 Rxc1+ 30.Bxc1 Qb6 31.Be3 Bxe3 32.fxe3 Rd8 33.Kg2 g6 34.Be2 Kg7* 10.Ba3 b6 11.ba5 Nh5 (2758)-Molina,R (2855) 109/(48) Russia 2010 (5) 1-0 *)* 16...b5 17.Nb6 bxc4 Hoping for ...Bd8. 18.Qd2 Ra7 19.Be2 c3 20.Qxc3 Bb5 Black has decent compensation for a pawn due to the better coordination between his pieces and his excellent attacking prospects on the k-side. ]

[ Worth attention is also 15...b5!? , as tested in a correspondence game: 16.cxb5 axb5 17.Bxb5 0-0 18.a4 f5⇄ Geiser,A - Sidelnikov,O ICCF email 2011 ]

[ 15...0-0= 0.22/14 was preferrable. ]

**16.Qb3±** White is more active.

[ Another decent possibility was 16.Qa3!? 0-0 17.Be2 e4 18.Bd4↑ , keeping in mind the option of 0-0-0. ]

**16...a4 17.Qd1** Black's pawn structure is poor, while most of his pieces are passive - all this makes his situation difficult. **17...Qc8**

[ Once again, it was vital to take care of the poor Ng6: 17...Bd8!? 18.Rc1 0.29/18 *(* White should play *18.Bd3±* 0.73/19 *)* 18...Ne7!= 19.c5 Ba5 20.Bg2 Bb5! 21.Bd2 Bxc3 22.Rxc3 Qc7± White is better, but the vulnerable location of the Ke1 offers Black some counterplay. ]

**18.Rc1N** Black is now going downhill. **18...0-0?!** Another step in the wrong direction.

Pawn endgames are completely exact and one requires precision in calculating long variations in order to play them with confidence. However, in time scramble it is very hard to be precise, so one has to rely on intuition which could be pretty risky! Moradiabadi,Elshan: 'In one of the crucial matches in round six, or probably the entire tournament, the US team narrowly edged the strong Ukrainian team 2. 5-1.5 to clinch clear second on the table. The US team had had a pleasant performance so far. They had never been in danger in any of their matches (well a bit against the Czechs, maybe) and their "big three" have constantly scored for them. This time Caruana won with very fine technique on board 1 against Eljanov. [The main line 12.Nc2 Bg5 was deeply analysed on our site. The latest game in our PGN archive is: Dominguez Perez, L (2755) -Grischuk, A (2789)/Bilbao ESP 2014/[Roiz, M] ]

**12...0-0** This natural move is somewhat inaccurate.

[Most probably, Veselin's idea was to meet 12...Bg5 with 13.h4 *(*Quite harmless is *13.Nc2 0-0 14.Bg2 Be6 15.0-0 Qd7 16.f4 exf4 17.gxf4 Bd8 18.Nce3 Ne7*= Carreto Nieto, G - Capo Vidal, U / MEX-ch op 2006 *)* 13...Bh6 14.Bh3 Bxh3 *(*The usual reaction to White's last move is: *14...Be6* , but the presence of Black's king in the centre offers White some initiative after *15.Bxe6 fxe6 16.Qh5+ Kd7 17.Qg4! )* 15.Rxh3 Ne7⇄ The arising position looks dangerous for Black from a strategic point of view, but the awkward placement of Rh3 and Na3 gives Black enough time to develop counterplay, which is usually connected with the ...d6-d5 or ...f7-f5 advances. Anyway, solving the problem of the passive Bf6 looks the most challenging. ]

**13.h4** White's idea is fully justified now - Black faces the usual problems with his dark-squared bishop, while Black's counter-attacking possibilities (which are mostly connected with ...f7-f5) are limited. **13...Be6** A novelty.

[The attempt to make use of Black's lead in development by means of 13...b4 14.Nc4 bxc3 15.bxc3 Ne7 is playable, *( 15...Be6?!* as was played in Martinez, M -Dominguez Garcia, F/Naron 1994 can be strongly met by: *16.Nce3! a5 17.Bc4±* and White gets a clear edge due to his control over the light squares. *)* but 16.Nxf6+ *(*Now the same approach doesn't promise much: *16.Nce3 Nxd5 17.Nxd5 Qa5 18.Bc4 Qc5 19.Qd3 Bd8* and Black is close to equalizing. *)* 16...gxf6 17.Qxd6 Qxd6 18.Nxd6 Be6 19.c4 Rb2 20.c5 Nc6 21.Bc4 Bxc4 22.Nxc4 Rc2 23.Ne3 Rxc5 24.0-0± yields White a small, but risk-free advantage. ]

[ The immediate attempt to get a rid of Nd5 by means of: 13...Ne7 14.Nxf6+ gxf6 15.Nc2 f5 16.exf5 Bxf5 17.Bg2 Be6 18.Qd2± doesn't leave Black sufficient compensation for his exposed pawn structure on the k-side. ]

**14.Nc2 Bxd5** Exchanging the light-squared bishops looks like a concession, but Boris had a concrete idea in mind.

[ Black's position would be rather unpleasant in case of 14...g6 15.Nce3 Bg7 16.h5 Ne7 17.Nxe7+ Qxe7 18.Bh3± , but maybe it was a lesser evil from an objective viewpoint. ]

**15.Qxd5 Ne7 16.Qd3 d5** Obviously, solving the problem of the weak Pd6 and opening the d-file is an indisputable achievement for Black in the Sveshnikov, but the misplaced dark-squared bishop still leaves some problems to solve. **17.Bg2**

It looks like Topalov's initial idea was to keep the queens on the board - otherwise he would choose 17.exd5.

[ Indeed, after 17.exd5! Nxd5 *(*White's pressure is getting even stronger after *17...Qxd5 18.Qxd5 Nxd5 19.0-0-0 Rfd8 20.Bg2 Nc7 21.Nb4± )* 18.0-0-0 Ne7 19.Qxd8 Rfxd8 20.Bg2 a5 21.Ne3 The arising endgame looks extremely unpleasant for Black - his q-side pawns are potentially weak, while the Bf6 is still out of play. ]

**17...dxe4**

[ A clear mistake would be: 17...d4? 18.cxd4 exd4 19.f4 g6 20.e5 Bg7 21.0-0-0+- Black is going to lose a pawn for nothing. ]

**18.Qxd8**

[ ∇As was mentioned before, 18.Qxe4 looks like a logical continuation of White's previous play, but g6 19.0-0 Bg7 20.Rad1 Qc7 21.Nb4 Rb6 is definitely acceptable for Black here - 22...f5 is coming. ]

[ White's advantage is also minimal in case of 18.Bxe4 Qxd3 19.Bxd3 a5 20.a3 g6 21.0-0-0 Rfc8± ]

**18...Rfxd8 19.Bxe4 g6** Compared to the above-mentioned line after 17.exd5, there is more harmony in Black's setup now. However, White can still play for a win without taking any risks. **20.Ke2 Bg7 21.Rhd1** White's idea is based on swapping all the rooks and attacking his opponent's q-side pawns. **21...f5**

[ A considerable alternative was: 21...Rxd1!? 22.Rxd1 f5 letting White's rook get access to the 7th rank: 23.Rd7 Kf8 24.Bg2 e4 25.Ra7 Bh6! 26.f4! *(*White cannot keep an extra pawn after *26.Rxa6?! Bc1⇄ )* 26...exf3+ 27.Bxf3 Rb6 Black's position is rather passive, but the limited material balance offers good drawing chances. ]

**22.Rxd8+ Rxd8 23.Bb7 a5!** A correct decision.

[ After 23...Rd6 24.Rd1 Rxd1 25.Kxd1 a5 26.Ba6± Black is going to lose the pawn in a worse version. ]

**24.Rd1 Rxd1 25.Kxd1 e4 26.a3!** Fixing the weakness on b5. Now Black cannot avoid losing a pawn.

[ 26.Ba6 b4 27.cxb4 axb4 28.b3 Bc3 ]

**26...Bf6!** The best approach is active counter-play! Black's idea is to exchange as

many pawns as possible and activate all his pieces. **27.Kd2**

[ Obviously, Gelfand's idea was to meet 27.Ba6 with f4 28.Bxb5 e3 29.gxf4 exf2 30.Ke2 Bxh4 retaining the material balance. However, Black's position still looks dangerous here, so maybe Topalov shouldn't reject it. ]

**27...h5** 1.05/25 Fixing all White's k-side pawns on the dark squares definitely makes sense here.

[ 27...Kf8± 0.64/23 might be stronger. ]

**28.b4?!** Before collecting the pawn, Veselin is trying to make some progress, but now the Pc3 is becoming vulnerable.

[ ∇After 28.Ke2 Kf7 29.Ba6 *(* Deserves serious attention *29.f4!?* , but it's a tough move to make *)* 29...f4 30.gxf4 Nd5 31.Bxb5 Nxf4+ 32.Ke3 Nd3!
Black manages to get sufficient counter-play. ]

[ As earlier, 28.Ba6!? f4 29.Bxb5 e3+ 30.Ke2! exf2 31.gxf4 Bxh4 allows Black to win the pawn back. However, this position still looks more dangerous for Black than after the text. ]

**28...axb4 29.axb4**

[ Another recapture 29.cxb4 hardly poses Black more problems: Kf7 30.Ba6 f4 31.Bxb5 fxg3 32.fxg3 Be5 33.Ke3 Bxg3 34.Kxe4 Bxh4 ]

**29...g5** This move is logically connected with Gelfand's previous play - the main idea is to liquidate all White's k-side pawns.

[ However, in the arising situation there was nothing wrong with activating the king: 29...Kf7 and if 30.Na3 *( 30.Nd4* 0.01/26 30.Nc2-a3 0.48 *Bxd4 31.cxd4*

B33: Sicilian: Pelikan and Sveshnikov Variations This game was played at the Wijk ann Zee tournament in 2005 between the players GM Ruslan Ponomariov (2700 FIDE) and Vladimir Kramnik (2754 FIDE) . RR: 'Inf 44/(192)' Christoph Scheerer: 'Opening theory's last great discovery: Nowadays the Sveshnikov Sicilian is one of the most respected opening systems (Mark Taimanov has even called it the 'last great discovery' of chess opening theory) . For some time the whole world elite was playing the Sveshnikov, and it was even conceived to be so reliable that ways and means were contrived to avoid it. For the moment it seems that at the absolute top level the Sveshnikov is slightly out of fashion, but it remains a popular weapon in general. I'd like to conclude this chapter with a game that might not feature the most critical line in the Sveshnikov, but does at least contain an interesting idea which in my opinion deserves further investigation.' **1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6!?** This might be Black's best bet and has the stamp of approval of the greatest theoretician of our era, Radek Wojtaszek! **8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 0-0 12.Nc2 Bg5 13.a4 bxa4 14.Rxa4 a5!? 15.Bc4 Rb8 16.Ra2 Kh8 17.Nce3 Be6N** Black is doing fine here.

immediately gives up control over the b5-spot, but White's q-side play is slowed.
**14.Nc4 b6 15.f4** This is the most effective way of activating White's pieces.
**15...Ba6N** The exchange of light-squared bishops favors White in this situation.

**17.Bc3** 0.23/21 The bishop is somewhat misplaced now.
[Better was 17.Bb5 Nc5 18.Ra3! Ne4 19.Nf5 Nxd2 20.Nxe7+ Qxe7 21.Qxd2 f6 22.f5± , and Black is doomed to passive defence. ]

**21.fxe5?** After this unsuccessful decision Boris' idea is fully justified.

[A long time ago White managed to claim an advantage after 10.Be3 a6 *(*Black's best option seems to be *10...Nd7! 11.Qd2 a6 12.Na3 f5 13.f3 0-0 14.Nc4 b6*⇄ Borisek,J - Wang,Y Mallorca 2004 *)* 11.Na3 Bf5 12.Nc4 Nd7 13.a5 0-0 14.Be2± Ganguly,S (2574)-Ris,R (2336) Amsterdam 2004 [Fed] ]

**10...0-0 11.0-0 Nd7**

[Worth attention is 11...f5!? 12.f4 Nd7 13.fxe5 *( 13.Kh1* might transpose to Nakamura - Gelfand, see below. *)* 13...Nxe5 14.Be3 a6 15.Nd4 Smirnov,I - Lefebvre,H Cappelle-la- Grande 2009 ]

**12.Bd2** A novelty. This modest-looking move hardly poses Black any problems, but it leads to a complex strategic struggle.

[A long time ago Boris had a successful game in this line: 12.Kh1
**A)** 12...a6 13.Na3 f5 *( 13...b6 14.a5 Bb7 15.axb6 Nxb6 16.c4 )* 14.f4 is just a transposition.;
**B)** 12...f5 13.f4 a6 14.Na3 exf4 15.Bxf4 Ne5 16.Qd2 0.11/13 *(*Deserving some attention is *16.Bxe5!? dxe5 17.Nc4 Bd6 18.a5* , and the d-passer offers White interesting play.*;* White should play *16.Bxe5±* 0.72/12 *dxe5 17.Nc4 )* 16...Bd7 17.Qb4 Rb8 18.c4 a5 19.Qb3 Ng6 20.Be3 b6⇄ Black was able to solve all his problems and later managed to outplay his strong opponent in Nakamura,H - Gelfand,B London 2012 ]

**12...Nf6** Locking the f-pawn looks like a slight concession, but Boris manages to slow down White's initiative as well.

[Worth attention is 12...a6!? 13.Na3 a5 , as Boris played in the Rapid game. *(*Possible is also *13...f5 14.a5 e4 15.Nc4 Ne5! 16.Nb6 Rb8* Even though White manages to fix a favourable pawn structure on the q-side, the position seems unclear: Black's counter-attack shouldn't be underestimated. *)*]

**13.Be3**

[The other way of protecting the Pd5 was: 13.c4 Ne4 14.Be3 a6 15.Nc3 Nxc3 16.bxc3 Bf5! An important move, covering the b1-spot. Prevents Rb1. 17.Qb3 Bg5! 18.Bxg5 Qxg5 19.Qxb7 Be4⇄ with tense play. ]

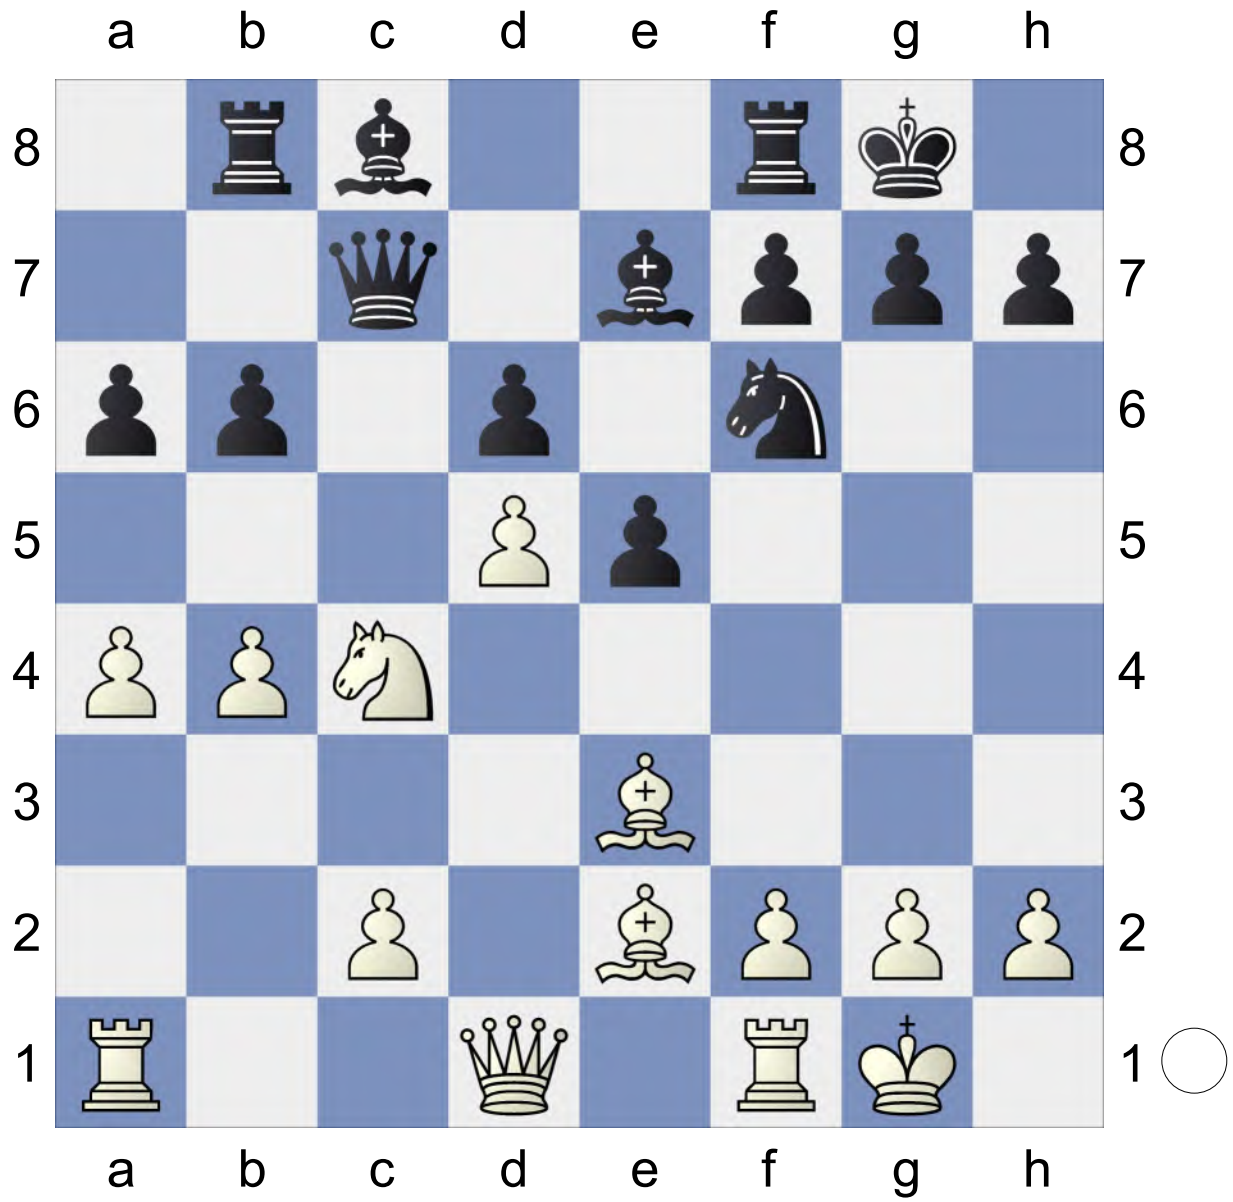
**13...a6 14.Na3** This is the usual spot for the knight in the 9.a4 line. **14...Rb8 15.b4**

[Black's idea was meeting the natural 15.Nc4 -0.24/11 15.b4 0.46 with b5! 16.axb5 Rxb5 , winning the Pd5. In that case White should continue 17.Bd2 Nxd5 18.Ba5 Qd7 19.Ne3 Nxe3 20.Bxb5 , inviting some complications. Of course,

Black is doing well here. ]

**15...a5** I do not trust this move - Black gives up control over the b5-spot, so his position becomes somewhat shaky.

[Dubious is 15...b6?! 16.Nc4 Qc7



17.a5! bxa5 18.bxa5↑ ]

[However, the natural 15...Ne4! was more to the point: 16.Nc4 *( 16.Qe1 Bg5!⇄ )* 16...Nc3 17.Qd2 Nxe2+ 18.Qxe2 b6

**A)** 19.a5 b5! 20.Nb6 f5! 21.f4 Bf6 ...exf4 is the strong threat. 22.Rac1 -0.19/18 *( 22.Rad1* 0.19/21 deserves consideration. *)* 22...exf4= 23.Bxf4 g5⇄;

**B)** 19.f4 exf4 20.Bxf4 b5 21.Na5 aiming for Nc6. Bd7 22.axb5 axb5= , and Black manages to cover his weaknesses. ]

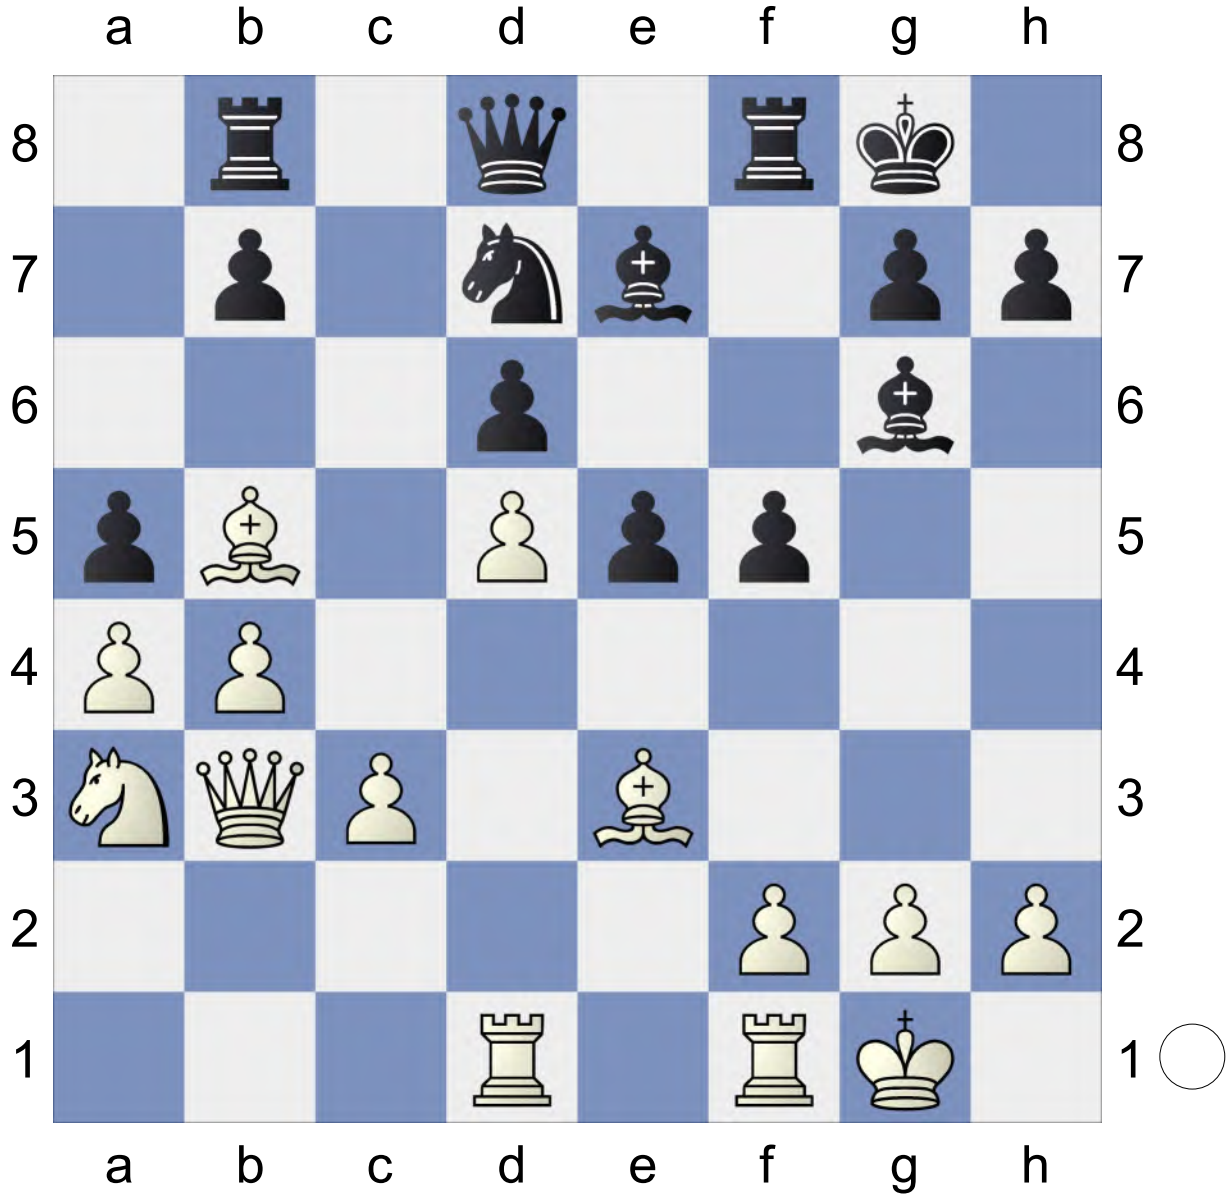
**16.c3!** Grigoriy reasonably keeps the tension.

[The alternative - 16.bxa5 Qxa5 17.Nb5 Bd7 18.c4 Rfc8⇄ wasn't as promising,

since White's pawn structure on the q-side isn't perfect. ]

**16...Bf5 17.Qb3 Bg4** 0.93/21 Boris provokes the f2-f3 advance in order to open-up the e-file.

[ Too slow was 17...Bg6 1.02/23 17...Ng4 0.52 18.Rad1 0.65/24 *(* Better is *18.Rfd1±* 1.02/23 *)* 18...Nd7± 19.Bb5 f5



20.f4!± , and White is firmly in control. ]

[ 17...Ng4± 0.53/19 is more appropriate. ]

**18.f3** 0.49/23

[ 18.Bb5!? ]

[ 18.Bb5± 0.93/21 ]

**18...Bh5 19.Rad1?!** 0.45/19 After this inaccurate move GM Gelfand's idea is fully justified.

[ Instead, the prophylactic 19.Ra2! e4 20.f4 Bxe2 21.Rxe2 Ng4 22.Bd4 f5

0.90/21 *( 22...Bf6!±* 0.45/21 *)* 23.Nb5± would have offered White a long-term positional advantage, since Black's counter-attacking abilities are limited. ]
[ 19.Bd3± 0.82/25 ]
**19...e4± 20.Nc4 b6 21.Nd2** This is a good sign for Boris: White is switching to defensive measures. **21...exf3**
[ Possible was also 21...Qc7 22.Bd4 exf3 23.Bxf3 Bxf3 24.Rxf3 Nd7⇄ ]
**22.Nxf3**
[ Equally good was 22.Bxf3 Bg6 23.Bd4 Nd7 24.Nc4 Qc7⇄ ]
**22...Bxf3 23.Bxf3 Nd7** The usual approach - Black takes full control of the dark squares. **24.Bf4 Ne5**
[ It was possible to maintain the tension by means of 24...Qc7!? 25.Be2 , though after Bf6 26.Bb5 Be5 27.Bd2 f5 28.Qc4= White still shouldn't face any problems. ]
**25.Bxe5 dxe5 26.d6!** This is absolutely necessary. If Black could manage to set-up a blockade on the dark squares, White would find himself in a difficult situation.
**26...Bxd6 27.Qd5 Be7**
[ The greedy 27...Bc7?! 28.Qc6 Qc8 29.Rd7 Bd8 30.Qxc8 Rxc8 31.Bd5± might invite some trouble. ]
**28.Qxe5 Bf6 29.Rxd8** A silent draw offer.

*[Marin,Mihail]*

Shabalov,Alexander: 'The Sveshnikov variation abruptly went out of fashion sometime late in 2009, because many black players suddenly realized that positions in the 11.c4 line were too dry, and they were playing for two results only, which was unacceptable in open tournaments. || However, in elite tournaments a draw with black is not a bad result, and it was demonstrated by many players, most notably Gelfand in his game versus Filippov, that Black can easily hold the position when he abandons any winning ambitions. It came as no surprise that this development brought back the old 11.c3. || Giri made a clear case to Shirov that chess engines have made a significant leap in strength since 2009, and the line which brought Alexey so many good memories was simply not playable anymore. Then again, if the traditional Bg5 and 0-0 line might be in crisis, the old-but-reliable sideline 11...Rb8 looked almost like a forced draw in Dominguez-Gelfand. || All in all, these recent games probably won't bring the Sveshnikov back to open tournaments, but it feels like a legitimate replacement for the Berlin Ruy, without having to deal with slow d3 lines.' **1.e4** Tadic,Branko Tadic,Branko Marin,M Tadic,Branko Tadic, Branko Marin,M Tadic,Branko Tadic,Branko Marin,M **1...c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5** Shabalov,Alexander: 'Diagram

He simply asked several difficult questions from Hracek in this game and unfortunately for the Czechs and Hracek, he failed to

answer them.

The main idea is to redeploy the poor Na3, which is White's main problem in many lines of the Sveshnikov. Since White has failed to pose Black any problems in the mainlines recently, such unusual ideas might sometimes attract 1.e4 players. **9...Be7**
[ In case of 9...Be6 White can more or less force a transposition to the text with 10.a4 b4 11.Nd5 Be7 12.Bxf6 Bxf6 13.Bc4 ]
**10.Bxf6 Bxf6 11.a4** Before occupying the key d5-spot White provokes the weakening ...b5-b4. **11...b4 12.Nd5 Be6** The Be6 is well placed, but Black now suffers from some weak spots on the q-side.
[ The most common alternative is 12...0-0 , and then after 13.Bc4 Black should choose the proper plan Bg5 *( 13...Bb7* didn't work well for Black in the following high-level game: *14.0-0 Bg5 15.c3 Rc8 16.Qd3 Qa5 17.Nd2 bxc3 18.bxc3±* Najer,E - Eljanov,P Ashdod 2004 *)* 14.0-0 Kh8 *( 14...Be6 15.Qd3 a5* might transpose to the text. *)* 15.Qd3 f5 16.Nd2 a5 , as in Rhodin,C - Bhend,E Switzerland 1995, should be met by 17.c3! bxc3 18.bxc3 Ne7 19.Rab1± ]
**13.Bc4 0-0 14.0-0 Bg5 15.Qd3** White aims not only to attack the Pa6, but also to connect rooks as soon as possible.
[ Less challenging seems 15.Nd2 , as seen in a few games, including the following: Kh8 16.Nf3 Bh6 17.Bb3 Weinstein,N - Spraggett,K Montreal 1976 Black had no reason to reject f5! 18.Re1 fxe4 19.Rxe4 Rb8 with active piece play. ]
**15...a5 16.c3 Rb8?!** This passive move is the cause of GM Kuzubov's issues.
[ More to the point is 16...Rc8! , intending to meet 17.Ba6 *( 17.Rd1 Kh8 18.Nd2 bxc3 19.bxc3 Nb8* , relocating the knight to c5 also looks solid for Black. *)* with 17...bxc3! 18.bxc3 Rb8 19.Bb5 Ne7 20.c4 Nxd5 21.cxd5 Bd7= ]
**17.Bb5!** A decent novelty. Now Black has concrete problems to solve.

**17...Na7** This awkward retreat is aimed at maintaining the tension.
[ 17...Ne7 18.Nxe7+ Qxe7 19.cxb4 axb4 20.Nd2± was most likely rejected by Yurij in view of the strong Pa4. ]

**18.Rd1**
[ More straightforward was 18.cxb4!? axb4 19.Bc4 Nc6 20.Nd2 Na5 21.Rad1⩲ ]
**18...f5 19.Bc4?!** After this Black's 17th move is justified.
[ Correct was 19.Nd2! Nxb5 20.axb5 Bxd2 21.Rxd2 fxe4 22.Qe2 bxc3 23.bxc3⩲ The strong Pb5 and the better pawn structure leave White with a tiny advantage, even though Black is a pawn up. ]
**19...fxe4 20.Qxe4 Kh8** Without the Rf1 White's king feels less comfortable now.
**21.b3?!** GM Nasuta plays with fire by delaying the development of his q-side pieces.
[ The natural 21.Nd2 bxc3 22.bxc3 Rb2 looks somewhat annoying, but after 23.Ra2 Rxa2 24.Bxa2= White has nothing to fear. ]
**21...Nc6** The knight is coming back – it has a great chance to be housed in the centre now!
[ Deserving of serious attention is also 21...Bf5!? 22.Qe2 Nc6 23.Ra2 Bh4↑ , putting White's king in big danger. ]
**22.Ra2**
[ 22.cxb4 Nxb4 23.Nbc3 Bf5 24.Qe2 Nc2 25.Ra2 Nd4∓ ]
**22...Qc8**
[ In my opinion, 22...Qd7!? was more natural. Black connects his rooks and moves his queen towards White's king. ]
**23.Rb2** White still struggles to move his knight from its initial spot. **23...Bf5 24.Qe1 e4!** GM Kuzubov correctly starts aggressive measures in the centre. **25.cxb4 Nxb4 26.Nxb4 Rxb4?** A serious positional mistake, that could have spoiled all the advantage.
[ After 26...axb4! 27.Nd2 Bf6 28.Ra2 Qc6 29.Nf1 Bg4 30.Bd5 Qc5∓ Black's bishops are so powerful, that White is unable to maintain the material balance. ]
**27.Nc3** The knight comes into play with great effect. **27...Bf6 28.Rc2 e3** This was Yurij's idea, but it's not as scary as it looks. **29.Re2 exf2+ 30.Rxf2 Bg4** Setting a nasty trap. **31.Rxd6??** Grzegorz follows his opponent's plan.
[ Had White played 31.Rd3 Rb8 32.Ne4 his chances would not be worse, at the very least. ]

**1.e4** In general, Anton's main opening repertoire is based on 1.d4, but this time he decides to test his opponent in one of the most fashionable lines in the Sveshnikov. **1...c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5 Nxd5 8.exd5 Nb8 9.a4** This move has practically replaced the 'old fashioned' 9.c4 **9...Be7 10.Be2 0-0 11.0-0 Nd7 12.Bd2 f5** This is definitely the most ambitious choice. By starting this expansion Black takes some risk, since e6 is a sort of weak spot in some cases.

[ the other common way of handling the position is 12...a6 13.Na3 a5 , as in Niemann - Salem, from this Update. ]

**13.a5 a6 14.Na3 f4!?** A new move for our site. This move is anti-positional, but the k-side expansion might be dangerous for White, as now he is unable to fix the situation with f2-f4.

[ 14...e4 15.Nc4 Ne5 is covered in Svidler,P (2735)-Caruana,F (2819) Karlsruhe/ Baden Baden GER 2019 [Roiz,M]. As the analyses show, White's chances are preferable in this complex middlegame. ]

**15.Nc4 e4?!** This is consistent, but wrong. The pawn storm isn't supported by the pieces.

[ I believe the rook lift offers Black acceptable play: 15...Rf6! 16.Bb4 *(* By playing *16.Re1* White hardly manages to decrease Black's attacking potential: *Rh6 17.Ra3 Rb8 18.Bb4 Nf6⇄* Bakhmatsky,V - Moiseenko,A Kharkov 2021 *)* 16...Rh6 17.Re1 Rb8 This position was tested a few times in correspondence games, and it looks like White has nothing special. For instance, 18.Bd3 Qf8 19.Ba3 g5 20.h3 Qg7⇄ Haugen,A - Betker,J ICCF email 2019 ]

**16.f3?!** GM Korobov is in the rush to fix the pawn structure, but it fully justifies Black's aggressive idea!

[ Dubious is 16.Bg4?! Ne5 17.Nxe5 dxe5 18.c4 Bc5 The strong central pawns put White's king under strong pressure in Forero,E - Aranha Filho, A Sao Paulo 2019 ]

[ The refutation of an early ...e5-e4 seems to be 16.Re1! f3 *(* After *16...Ne5 17.Nxe5 dxe5 18.Bc4 Bd6 19.Rxe4 Bf5* White is able to fully neutralize his opponent's play on the k-side with *20.Qe2!±* , and then Black is positionally busted.*;* The tricky *16...Bh4!? 17.Nxd6 f3 18.gxf3 exf3 19.Bxf3 Qf6* is well met by the cold-blooded *20.Re4! **16...e3 17.Bb4 Rf6** Now Black has an improved version of the rook lift because of the strong e3-passer! **18.Qd4?!** The queen's centralization isn't well timed!

[ It was better to secure the king by means of 18.g4! Rh6 19.Qd4 Qf8 20.Bc3 , and White manages to maintain the balance. ]

**18...Qf8!** An excellent move! From now on White's king is in big danger. **19.g3?** This impulsive move invites big trouble.

[ In comparison to the previous note, 19.g4 wasn't effective in view of Ne5! 20.Nb6 *(* Bad is *20.Nxe5 dxe5 21.Bxe7 Qxe7 22.Qc4 Rd6-+* Black's pawns are too strong. *)* 20...h5! 21.Nxa8 hxg4 with a stunning attack. ]

[ However, the quiet 19.Rad1 Rh6 20.g4⩲ had to be preferred. ]

**19...Ne5!** Now all Black's pieces are ready to join the attack. **20.Nb6**

[ After 20.Kg2 Rh6 21.g4 Bd7 22.Nb6 Rd8 23.Nxd7 Rxd7 there are no direct threats yet, but White's king feels helpless. ]

**20...Rb8 21.Kg2 Rh6** The attack plays itself. **22.Nxc8 Qxc8 23.g4** Giving up the pawn is a necessary measure. **23...Qxc2 24.Qd1 Qg6!** GM Rios correctly avoids trading queens. **25.Qd4**

[ 25.Bc3 Qf6 26.Qe1 Rh4 , followed by ...h7-h5 practically leaves no chances. ]

**25...Qf6 26.Qe4 Rxh2+!** Black wasn't forced to sacrifice the rook, but this is the most convincing way. **27.Kxh2 Qh4+ 28.Kg2 Qg3+ 29.Kh1** Of course, Black shouldn't be satisfied with a perpetual yet... **29...Bh4**

**30.Bd1 Qh3+ 31.Kg1 Qg3+?** Luckily for Anton, his lower-rated opponent eventually decides to call it a day.

*[Marin,Mihail]*

**1.e4** Mikhalevski, V **1...c5 2.Nf3 Nc6** Mikhalevski, V: 'Giri deviates from his favourite Petroff and goes for the Archangel variation of the Spanish.' **3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5** Mikhalevski, V: 'A pretty rare system.' An over-ambitious move. White does not give up the standard plan based on c2-c3, d2-d4 and Nb1-d2-f1(-e3-d5) at all. He actually aims to carry it out with a gain of two tempi!. Indeed, Nc3-d5 is a much shorter route and then c3 and d4 might follow anyway. On the other hand, Nf1-e3 and especially Ne3-d5 are by far not the only

possibilities in the classical Ruy Lopez. The knight usually goes to g3. Or if it gets to e3, it chooses the moment of moving to d5 with greater care. **7...a6 8.Na3 b5** Mikhalevski, V: 'Preventing 9. Bg5.' A good prophylactic move. **9.Nd5 Be7 10.Bxf6** Mikhalevski, V: 'The players transposed to the 5.d3 b5 6.Bb3 Bc5 system.' **10...Bxf6** Black remains flexible. **11.c3** Mikhalevski, V: 'One of the few possible moves in this position.' **11...0-0 12.Nc2** Black has played flexibly so far, but now he has to release the tension in the centre somehow, since the a7-bishop is sort of hanging. **12...Rb8N** Mikhalevski, V: '!?' Mikhalevski, V: 'A novelty.' **13.h4 Be6 14.Nce3** Mikhalevski, V: 'A concrete approach.' Dominguez confessed that he did not really believe that Black could play this way, so he did not hesitate too much (seven minutes only) before grabbing the pawn **14...Be7 15.Bd3 Qd7 16.Bc2** But on this move he spent almost half an hour, having finaly understood that Giri's preparation was entirely sound.

[or 16.a4 Mikhalevski, V Bd8! Black is in zugzwang. 17.axb5 axb5+- with the subsequent 41.Rf4-f6 18.Ra6 (Mikhalevski, V) could have prolonged the fight, but it couldn't change the outcome. Kh8 (Mikhalevski, V) with the idea of 32. ..Kf7 deserved attention. 19.Qa1!? Mikhalevski, V Qb7 20.b4± was more stubborn. Bc8!?± The problem is that after 21.Ra3 Mikhalevski, V Be6! 22.Ra6 Bc8± the g7-pawn is hanging with check. Compare with 24... Kh8. 23.Ra3! (Mikhalevski, V) was more accurate. Be6 ]

**16...Bd8 17.Qd3** Mikhalevski, V: 'White has won a pawn, but it's not easy to keep it.' After another ten minutes. **17...Ne7 18.0-0-0** Mikhalevski, V: '!' **18...Bxd5!** The clearest way to equality. Black should not hurry to retrieve the pawn,. **19.Nxd5 Nxd5** Mikhalevski, V: '!' The most accurate move. **20.Qxd5 b4 21.cxb4** So far, Giri had played very quickly, but now he faced problems remembering his analysis. He was sure that at some point there was a rook lift on the sixth rank, so after a bit more than ten minutes he played: **21...Qa7?** Mikhalevski, V: 'A serious mistake after some good play, or maybe preparation?' **22.a3!±** Mikhalevski, V: '!' Mikhalevski, V: 'Probably Giri missed this idea. Now after' It suddenly appears that the threat ...Rxc6 is relative. **22...Bb6** After the blunder, Giri took more than an hour looking for a way to get some saving chances. **23.Kb1** Mikhalevski, V: 'White wins a pawn.' **23...Bxf2 24.Bb3** Mikhalevski, V: '**±**' **24...Bd4 25.Rc1 a5** Mikhalevski, V: 'A sad necessity.' **26.bxa5** Mikhalevski, V: '!' **26...Qa6 27.Ka2 Qe2 28.Rb1** Mikhalevski, V: '**±**' Mikhalevski, V: 'The rook endgame is technically won for White.' White is a pawn up, has the better structure and controls the open d-file. The rest is a matter of pure technique. **28...Kh8 29.Rhc1 Rfc8 30.Rxc8+ Rxc8 31.Qxf7 h6** Mikhalevski, V: 'This attempt to defend actively fails.' **32.h5** Mikhalevski, V: '!' **32...Ra8 33.a6** Mikhalevski, V: '!' Mikhalevski, V: 'White is not letting the black king get to f4.' **33...Qxa6 34.Rf1** Mikhalevski, V: '!' **34...Qc8 35.Qg6** Mikhalevski, V: '+-!' **35...d5 36.Rf7 Qg8 37.Bxd5** Mikhalevski, V: '!' **37...Rb8 38.b4 Rc8 39.Rc7 Qf8 40.Qf7** Mikhalevski, V: 'There is no defence against 41.Rf6 and so Black resigned. [ 8...Ne7 was employed by Magnus Carlsen a few times, but I still trust it less. ]
**9.a4 Be7 10.Be2 0-0 11.0-0 Nd7 12.Bd2** This is also a top choice for super GMs.

[ 12.b4 was used once as a surprise weapon in Caruana,F (2832)-Carlsen,M (2835) London ENG 2018 [Roiz,M] ]

**12...f5**

[ 12...a6 13.Na3 a5 14.c3 f5 is playable, but somewhat risky from a strategic point of view, as illustrated in Esipenko,A (2603)-Gelfand,B (2655) Skopje 2019 [Roiz,M] ]

**13.a5 a6 14.Na3 Nf6** This is Black's second choice in the position.

[ The only move in our PGN Archive is 14...e4 15.Nc4 Ne5 16.Nb6 Rb8 17.f4 exf3 18.Bxf3 , and now both Bf6 *(* And *18...g5?!* Caruana, F (2832)-Carlsen,M (2835) London 2018 *)* 19.c3 g5 , as in Svidler,P (2735) -Caruana,F (2819) Karlsruhe/Baden Baden 2019 [Roiz,M] don't guarantee Black comfortable play. ]

**15.Bb4** White covers the Pd5 and puts pressure on Black's weak Pd6. **15...f4** A novelty. Mykhaylo isn't satisfied with passive defence.

[ The more flexible 15...Bd7 16.Nc4 Bb5 17.Nb6 allowed White to relocate his knight and seize the initiative on the q-side: Bxe2 18.Qxe2 Rb8 19.f4 e4 20.Bd2 Nd7 21.Be3± Elyoseph,H - Stuart,A email 2018 ]

**16.Nc4 e4** This is the most consistent. The advance in the centre might be threatening.

[ After 16...Rf7 17.Nb6 the Bc8 is gonna be exchanged, so Black's attacking potential is reduced: Rb8 18.Nxc8 Qxc8 19.f3 g5 20.c4 Rg7 21.Rc1 White was clearly better in Roesch M,H - Kerr,S ICCF email 2017 ]

**17.Nb6 Rb8 18.Nxc8?!** This natural move seems inaccurate - Black could have activated his queen.

[ The real test of 14...Nf6 would be seen had Valentin played 18.Qd4!

**A)** The tempting 18...f3 doesn't offer much: 19.gxf3 Nh5 *(* Or *19...Bh3 20.Rfe1 Qe8 21.Kh1 Qh5 22.Ra3! Rf7 23.Rg1 Rbf8 24.Re3± )* 20.Nxc8 Rxc8 21.Qxe4 Rf4 22.Qe6+ Kh8 23.Bd2± Black's major pieces cannot join the attack, so White's material advantage starts to tell.;

**B)** 18...Bf5 19.f3 , and it looks like Black's play is stopped. For instance, Qe8 20.Rae1 Qg6 21.fxe4 Nxe4 22.Bd3 Bf6 23.Qc4± ]

**18...Rxc8?!** Mykhaylo immediately returns the favor.

[ Much stronger was 18...Qxc8! 19.c4 *( 19.f3 e3 20.Qd4 Qf5⇄ )* 19...Qf5 20.Ra3 Rbe8⇄ with mutual chances. ]

**19.Bg4!** Perhaps Black underestimated this strong move. **19...Nxg4 20.Qxg4** Now the queen enters Black's camp with great effect. **20...Rxc2?** This naive move is probably a blunder.

[ Black should have played 20...Bg5 21.Qe6+ Kh8 22.Qxe4 f3 23.g3 Qd7 24.Qe6 Qxe6 25.dxe6 Rxc2± , maintaining decent drawing chances. ]

**21.Bc3** The rook is gonna be trapped soon. **21...Rf7**

[ 21...Bf6 22.Qe6+ Kh8 23.Qxe4+- is even worse. ]

**22.Qd1 Rxc3 23.bxc3 Bf6** The lesser evil.

[ The immediate 23...f3 runs into 24.Re1 fxg2 25.Rxe4 , and Black's position is ruined. ]

**24.Ra4!** A strong move. White manages to activate all his major pieces. **24...f3?** A decisive mistake.

[ It was necessary to consolidate by means of 24...Be5 25.Rxe4 Qxa5 26.c4 g6 27.Qb3 Kg7 28.Rfe1 Qc5**±** The e-file is locked, so White should still find a way to make progress here. ]

**25.Rxe4 Bxc3 26.g3 Rf8**

[ Equally bad was 26...Bxa5 27.Re3 Qf6 28.Qd3 g6 29.Rb1 b5 30.Re6+- ]

**27.Re3 Qf6** Now Black's pieces are tied to defending the Pf3. **28.Qa4 Qf5 29.Re8**

[ Even simpler was 29.g4! Qf6 30.Re8+- ]

**29...Bd2**

[ The most stubborn was 29...Bxa5 30.Rxf8+ Kxf8 31.h4 Bc3 32.Kh2 Qxd5 33.Rd1 Qc5 34.Qf4+ Ke7 35.Qxf3+- White is winning, but the q-side passers keep some intrigue. ]

**30.Rxf8+ Kxf8 31.Qa3! Ke7 32.Rd1** Now Black is absolutely lost. **32...Qe4**

[ 32...Bg5 33.Qd3+- ]

**33.Qb2 Be1 34.Qxg7+ Ke8 35.Qh8+ Kf7 36.Qb2+-** Black's position collapses. The rest is just agony. **36...Bb4 37.Qb1 Qe2 38.Qxh7+ Kf6 39.Qh6+ Ke7 40.Qh7+ Kd8 41.Rf1 Kc8 42.Rb1**

[ 11...Bg5 Black has no counterplay. ]

[ I was slightly worried about 11...Ne7 ]

**12.Nc2 Rb8!?** This is a novelty prepared about five years ago when I was young and optimistic enough to play the Anti-Moscow on purpose.

[ 12...Bg5 13.a4 bxa4 14.Rxa4 a5 But it's clear that White's attack is very dangerous, especially in a practical game. 15.Bc4↑ Rb8 16.b3 Be6↑ Playing 16... Rac8 I was counting on 17.0-0 Kh8 18.Qe2 but it does not work because of g6**±** After 19.Rfa1 ]

**13...a5 14.Bd3**

[ 14.h4 ]

**14...Be6** Now we have transposed to the game Anand,V - Kramnik,V from the World Championship in 2008 in which Black was considered to have a good position. This was the idea of my novelty - and yes, as one may have noticed, I like Kramnik's opening choices! One small problem was that I could not remember either how the game continued or any of my analyses.

**22.g4?** Viorel goes wrong. **22...e4!** After this move I felt that my counterplay was at least sufficient. In fact, Black is much better now. **23.gxf5 exd3** The most concrete. Black opens up the way for his light-coloured bishop.

**26...gxf5 27.Nd4 b4?** Here I was choosing between this move and 27...Rg8. When I noticed my 32nd move I could not resist.
[ 27...Rf6 and Black should gradually win. After 28.Rh8+! Bxh8 29.Rxh8+ Kg7 30.Qxe7+ Rf7 31.Rh7+ White's counterplay is very strong: Kxh7 32.Qxf7+ Kh8 33.Qf6+ ]

[ 28...Nxc6 White resigned. 29.Rh8+ was more stubborn: Bxh8 30.Rxh8+ Kg7 31.Qh6# ]
**29.Rh8+ Bxh8 30.Rxh8+ Ng8 31.Qh6+ Rg7** All these moves were forced, and now there is the point: **32.Qxd6+? Kf7!** This beautiful geometry finishes the struggle. **33.Qe6+ Kf8 34.Rxg8+ Rxg8 35.Qe7#**

[Another game from the World Cup saw 13.Be2 Bg5!? *(*continuing to offer the b-pawn, although there's nothing wrong with *13...a5* , as we've seen before *)* 14.Ncxb4 *(*Negi takes up the challenge instead, *14.0-0 Be6 15.Qd3 Qb8!? 16.Rfd1 Ra7 17.Bf3 Bd8 18.b3 Rd7 19.Qe2 g6 20.Rd2 a5* was very solid for Black in Hou Yifan-Yu Yangyi, Danzhou 2010, as we've noted before *)* 14...Nxb4 15.Nxb4 Qb6 16.Nd5 Qxb2 17.0-0 Qa3 18.Bg4 Bb7 19.Qb3 Qxb3 20.axb3 a5 21.Ra2 Bd8 and White didn't have anything in Negi-Kryvoruchko, Tromso (rapid) 2013, since Black could always exchange off the knight on d5. ]
**13...a5 14.Bg2 Bg5 15.0-0 Be6** Gelfand trusts his World Championship preparation. Indeed, it was here that Anand opted to place his queen on d3, but Filippov prefers another common move in such structures. **16.b3 g6**
[This seems to be new from what I can see, but whether is this a position in which White has to be uber accurate is perhaps debatable. Previously, 16...Qb8 17.Nde3 Rd8 18.Nf5 g6 19.h4 Bf6 20.Nfe3 h5 21.Kh2 Bg7 22.Bh3 Qa7 had seemed about equal in Salgado Lopez-Tregubov, Forni di Sopra 2012, as I've shown. ]
[However, Black shouldn't hurry to release the tension and 16...Bxd5?! 17.Qxd5 Qb6 18.h4 Bh6 19.Rfd1 Rfd8 20.Bh3 Qc5 21.Rd3 saw White beginning to take control in Alekseenko-Ladva, Maribor 2012. ]
**17.Qe2**
[White's last allows him to consider 17.a3 , but if played here it's hard to believe he will be able to breach Black's solid defences after bxa3 18.Rxa3 Qb8 19.Qd3

Qb7 . ]
[ In the event of 17.Qd3 I also quite like the idea of Qb8 when Black might even meet 18.Rfd1 with a4 . ]
**17...Bxd5!** Only now that White cannot recapture with a piece does Gelfand make this freeing exchange. **18.exd5**
[ Black also seems to equalise after 18.cxd5 Nd4 : for example, 19.Nxd4 exd4 20.f4 Bf6 21.Rac1 Rc8 22.Rc6 (the only real try otherwise, Black would just invade on c3) Rxc6! 23.dxc6 Qb6 24.e5 *( 24.Qd3 Qc5* is at least okay for Black *)* 24...dxe5 25.fxe5 d3+ 26.Qf2 Qxf2+ 27.Kxf2 Bxe5 28.Ke3 Rd8 29.Rd1 Bd4+ 30.Kxd3 Bb6+ 31.Kc2 Rxd1 32.Kxd1 Kf8 and the opposite-coloured bishops make a draw pretty much inevitable. ]
**18...Nd4 19.Nxd4 exd4 20.Qd3**
[ Black's grip on the dark squares also means that he has no real problems in the event of 20.a3 Re8 21.Qd3 bxa3 22.Rxa3 Qb6 . ]
**20...a4 21.h4 Bf6 22.Rae1 Re8** Every exchange brings the draw closer. Those d-pawns might be doubled, but just how is White supposed to make any meaningful progress? **23.Rxe8+ Qxe8 24.Qd2 axb3 25.axb3 Qb8**
[ A little defensive, but Gelfand undoubtedly already had his liberating next in mind. If Black wanted to prevent White's next he might have tried 25...Qe5 when 26.Qxb4 Ra2 seems to give Black sufficient counterplay with his d-pawn and against f2: for instance, 27.Bf3 Qf5 28.Kg2 Be5 followed by ...Rc2-c3. ]
**26.h5 d3!** A computer would never play such a move, but Gelfand knows that as in many a Sveshnikov, the presence of opposite bishops will enable Black to make quite an easy draw. **27.Qxd3 Qb6 28.Qe2**
[ It also looks pretty drawish in the event of 28.Re1 Qd4 29.Qxd4 Bxd4 followed by ...Ra2 or ...Kf8 and .. .Re8. ]
**28...Qd4 29.Rd1** This only encourages Black to simplify, but in any event ...Ra1 was on its way. **29...Qxd1+! 30.Qxd1 Ra1 31.Bf3 Rxd1+ 32.Bxd1 gxh5 33.Bxh5 Bd4** There's no way White's going to get passed a bishop on c5. **34.Kg2 Kg7 35.f4 h6 36.Kf3**

[The Novosibirsk Variation. Caruana countered well with 18.a3 Kh8 19.Qe2 Qd7 20.Rad1 e4 21.f3 , but then Nd4! 22.Nxd4 Bxd5 23.Qd2 b4 24.axb4 axb4 confirmed that Black had no problems whatsoever and Ivanchuk went on to win a long encounter. ]

**11.Bd3 Ne7 12.Nxe7 Qxe7 13.0-0 0-0 14.c4 f5 15.Qf3**

[A critical move in this key tabiya, but so is 15.Qh5 , reaching another important position after Rb8 16.exf5 e4 17.Rae1 Bb7 18.Qg4 . The latest evidence suggests that Black is still OK here - see, amongst other games, the notes to Topalov-Carlsen, Nanjing 2009. ]

**15...Qb7**

[A notable moment. Radjabov rejects his earlier innovation, 15...d5!? , presumably because he has accepted that after the long sequence 16.cxd5 fxe4 17.Bxe4 Rb8 18.Rfd1

**A)** 18...Qd7 is the alternative and after 19.d6 Rb6 20.Qd3 Rd8 21.Rac1 Bf8 White has a few options, including the 22.Qg3+ of Sengupta-Venkatesh, Dresden 2011, where Bg7 23.Qh4! *(*White repeated first with *23.Qd3 Bf8*

**16.Qe2!?**

[ I've previously suggested that this is fairly dangerous, but Radjabov has matters under control. White should avoid 16.cxb5?! d5 17.exf5 e4 when he is worse, ]
[ while 16.exf5 Qxf3 17.gxf3 e4! 18.Bxe4 d5! 19.Bxd5 Rb8 *(* it's interesting that Yakovich, a leading Sveshnikov expert, rejected *19...Bxf5!? 20.Bxa8 Rxa8* , which has been considered by theory - and ChessPub! - to give Black full compensation for the material deficit *)* 20.Rab1 Bxf5 21.Be4 Bh3 22.Rfe1 Kh8! (Black's bishops will always supply decent compensation in such a position and now we see another potential problem for White - his king position) 23.cxb5 Bxb2 24.Rxb2 Rg8+ 25.Kh1 Bg2+ 26.Kg1 Bh3+ forced a draw in Kokarev-Yakovich, Samara 2011. ]

**16...b4!**

[ I think Black is right to close the position like this. Instead 16...bxc4 17.Nxc4 fxe4 18.Qxe4 Qxe4 19.Bxe4 Rb8 20.Rad1 Be6 21.Bd5 Rfd8 22.b3 gave White a pleasant edge in Oleksienko-Zherebukh, Lviv 2006, as annotated by Tony, ]
[ but the radical idea 16...d5!? may again be playable here. After 17.cxd5 fxe4 18.Bxe4 f5 19.Bc2 Qb6! *( 19...Qd7 20.Bb3 Bb7 21.Nc2* looks a little better for White Tony proposed *a5!?* here, which isn't a bad idea, but with *22.d6+ Kh8 23.Rfd1 Ra6 24.Na3!* White remains on top *)* 20.Rac1 Qd6 21.Bb3 Bd7 Black is well coordinated and ready to obtain good counterplay on the dark squares. I'd be surprised if he didn't have at least decent compensation here and once White panicked with 22.Qe3?! e4 23.Qc5 in Kurnosov-Maletin, Apatity (rapid) 2011, Black even seized the advantage with Qxc5 24.Rxc5 Rfc8 25.Rxc8+ Rxc8 26.Nc2 a5 . ]

**17.Nc2 f4** Some subscribers may find Black's play a little too slow for their taste. There is always 16...d5, but actually I think Radjabov's approach is very logical. Just what are White's minor pieces up to? Moreover, there's always the half-open g-file and the second ...f5 break for Black if he wants to attack. **18.b3**

[ Rogozenko preferred 18.a3!? at this point and this still looks like a better try, although it may be that Radjabov had Black's defences worked out after bxa3 *( 18...b3 19.Nb4* reveals White's main idea, not that this is necessarily so bad for Black after *Be6 )* 19.b4 Be6 20.Rxa3 Rfc8 21.Rfa1 Bf6! , facilitating a timely ... Bd8-b6 to hold the queenside. ]

**18...Be6**

[ A new move for both us and theory. It may be that Radjabov was following some old analysis of his, although it's not impossible either that he was surprised by

Nakamura's choice of line and just trying to avoid playing too sharply. The text seems fine, but the aggressive 18...Re8!? is very much an option also, since after 19.Rfd1 *( 19.a3 bxa3 20.Rxa3 Re6 21.b4 Rg6 22.Kh1 Qe7* , if crude, is also not so easy to dismiss *)* 19...Re6! 20.c5? Rg6 21.Bc4 in Cukerman-Muniz, Montevideo 2004, Black might have won a pawn with Bg4! 22.f3 Bh3 23.Ne1 Qa7 24.Kh1 Qxc5 , as previously shown by Tony. ]

**19.Qd2 Rfb8** There aren't going to be any kingside adventures for Radjabov today rather he is content to hold solidly on the queenside. **20.a3 bxa3 21.Rxa3 Bf6!** Activating the bishop, which if White plays very slowly might come to g5 and provoke a weakness on the kingside. More importantly, though, the bishop is well placed to go via d8 to b6 to blockade any passed b-pawn which could appear, as well as to harass White's rook on a3 from e7. **22.Kh1 Kh8**

[ Prophylaxis, although I'm not too sure what was wrong with the immediate 22...a5!? . ]

**23.Rfa1**

[ It was the last chance for 23.b4?! , but the simple Rc8 24.Qe2 Qc6 reveals that White isn't set up too well to advance on the queenside here. If White wants to make this line work, it's hard to escape the view that he does better with 18 a3, angling to get in b2-b4 whilst he can. ]

**23...a5! 24.Be2**

[ Nakamura too decides to improve a bishop. The a-pawn was, of course, taboo: 24.Rxa5? Rxa5 25.Rxa5 Qxb3 and the c-pawn will fall. Note too how White's knight remains rather out of the action on c2 here. ]

**24...Be7 25.Bf3! Bd7 26.Bh5**

[ With the ...a4 and ... d5 breaks imminent, White wisely steers play towards a repetition. No doubt the American no.1 wanted to improve his knight, but after 26.Ne1? a4! 27.bxa4 d5 the position would have opened to Black's advantage. ]

**26...Be6**

[ White emerges on top after 26...d5? 27.Rxa5 Rxa5 28.Qxa5 Qxb3 29.Qxd5 , ]
[ but if Black wanted to keep the struggle going he might have opted for 26...Kg7!? . White will have to sacrifice the exchange here, but 27.Qe2! *( 27.Bf3? d5 28.Rxa5 Rxa5 29.Rxa5 Qxb3* is not so convincing *)* 27...d5 28.exd5 Bxa3 29.Rxa3 would have offered him decent compensation and left an interesting struggle ahead. ]

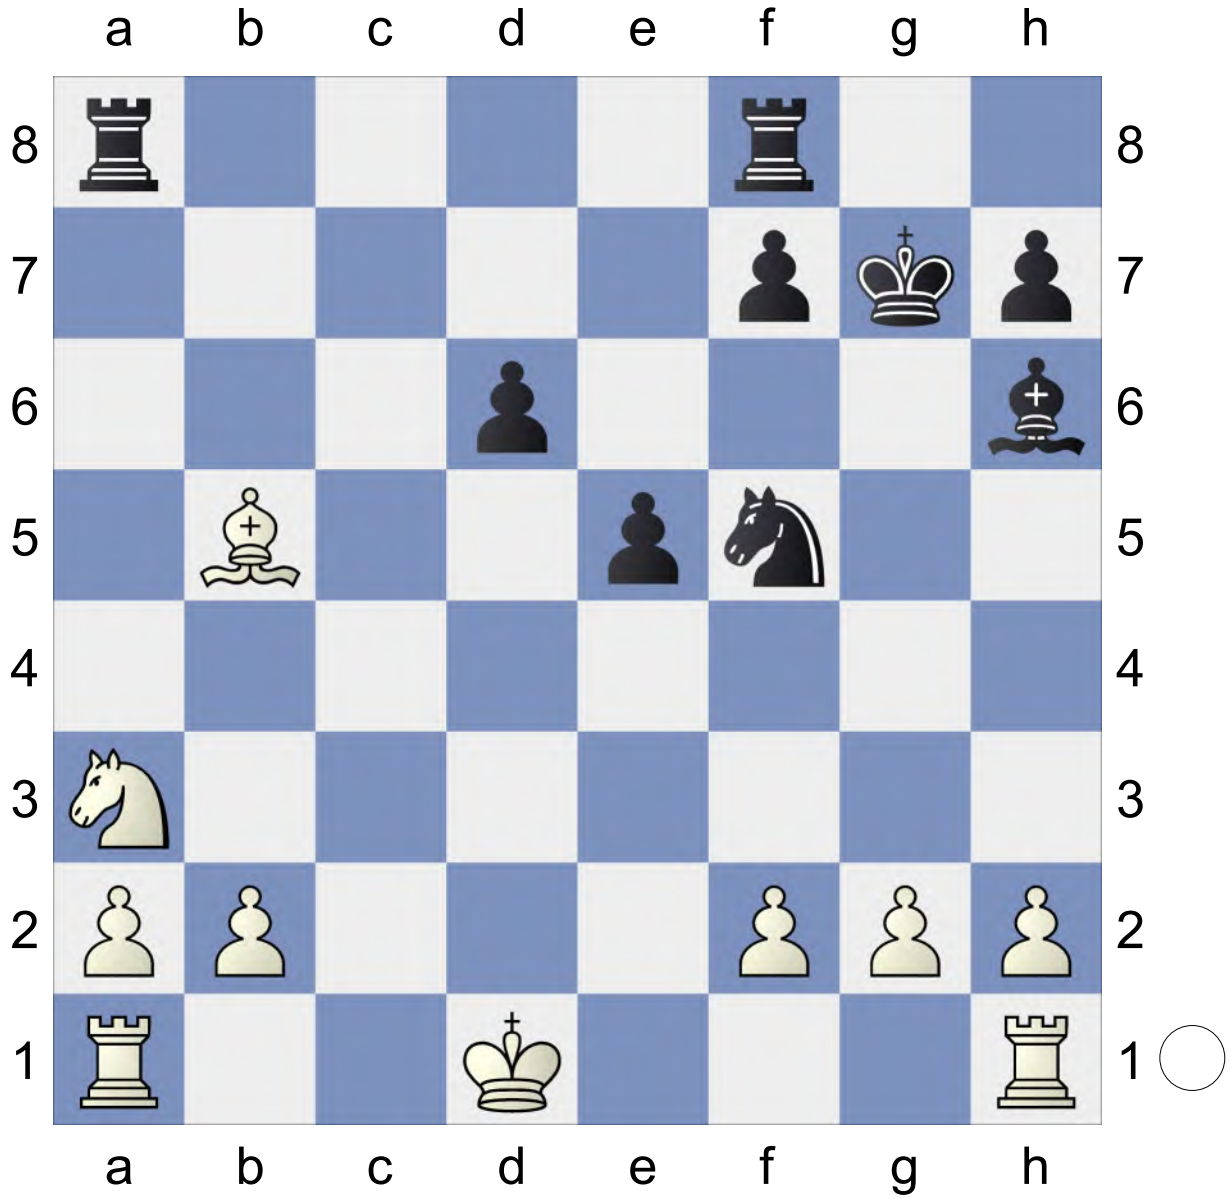
After the World Championship Anand said that he switched to the Rossolimo (3.Bb5 Sicilian) just because he liked those positions and not because there was no play left in the Sveshnikov. This week in Volokitin-Eljanov White played 9.Bxf6, the move that Sveshnikov himself considers to be critical, and then followed up with the very rare 11. c4!? in an extremely well-known position. 11.Bd3 and 11.c3 are the main lines here. This line clearly resembles the 9.Nd5 Be7 10.Bxf6 Bxf6 11.c4 variation that was Anand's choice against Gelfand in Moscow. White immediately puts Black's queenside under pressure and demands a reaction from Black. Eljanov decided to go



for the endgame right away, which seems to be a reasonable choice. White remains a pawn up, but Black has decent compensation. Volokitin was no doubt better prepared, though, and gradually started to outplay his opponent. It's possibly the natural 24...f5 leads to trouble. **20.Bd3**

[Bauer opts for a solid, fairly topical line, but 9.Bxf6 gxf6 10.Nd5 does, of course, remain an extremely important alternative. A game from the Ukrainian Championship which really caught my eye was Volokitin-Eljanov, where White met f5 with the extremely unusual 11.c4!? . Based on the game continuation of Qa5+ 12.Qd2 Qxd2+ 13.Kxd2 Bh6+ 14.Kd1 0-0 John Cox even denoted White's 11th as dubious in his work on the opening an understandable but likely incorrect assessment. Here White introduced

**A)** much stronger than 15.cxb5 when axb5 *( 15...Nd4!? 16.Ne7+ Kh8 17.Nxc8 Rfxc8 18.bxa6 fxe4* was extremely murky in Murray-Selitsky, Westland 1985, before White rather collapsed: *19.b4 Rc3 20.Nb1?? Rc1#* 0-1 *)* 16.Bxb5 *(*or *16.Nxb5 fxe4 17.Bc4 Kg7* followed by ...f5, perhaps even preceded by ...Bg4+ *)* 16...Nd4 17.Bd3 Rb8 appears to give Black excellent activity in return for the pawn;

**B)** 15.exf5! Bxf5 16.cxb5 axb5 17.Bxb5 , with the point that Nd4 18.Ne7+ Kg7 19.Nxf5+ Nxf5 robs Black of the bishop-pair. I can't believe that this should be too bad for Black with his strong centre and the open queenside lines, but doubtless Eljanov had been outprepared and after 20.Bd3 Ne7 *( 20...Nd4! 21.Nc2 Nxc2 22.Bxc2 Rab8 23.Bb3 d5 24.Ke2 d4 25.Rhd1 Rfd8* should be OK for Black, since while White can blockade the pawns on the light squares, it's not clear how he makes any progress of his own *)* 21.Nb5! d5 22.Ke2 e4 23.Bc2 Rab8 24.a4 f5?! 25.Rhd1 Kf6 26.g3 Rfc8 27.Bb3 Rc5 28.f4! White had set up an ideal blockade, with some advantage in Volokitin-Eljanov, Kiev 2012. ]

**9...Be7 10.Bxf6 Bxf6 11.c4 b4 12.Nc2 0-0**

[The modern move order, but another route to the game position is 12...a5 13.Be2 0-0 14.0-0 . As we've noted before, Bg5 15.Qd3 Be6 16.Rad1 Bxd5 17.Qxd5 Qb6! 18.Qb5 *(*Black also held firm after *18.Rd3 Rac8 19.Rfd1 Rfd8* in Karjakin-Timofeev, Khanty-Mansiysk 2009 - see the Archive *)* 18...Qc7 19.b3 Bf6 20.c5 dxc5 21.Qxc5 Rac8 didn't give White anything in Morte-Real de Azua, Villa Martelli 2008, but Moiseenko is after more. ]

**13.Be2**

[ 13.g3 often in conjunction with h4 has been the modern choice, but Bauer is happy to develop along straightforward lines. ]

**13...a5**

[Keep an eye on Moiseenko's queen's rook in this game. Notably he refrains from 13...Rb8 , a defence of the a-pawn which has become popular in the g3 lines. The rook move was, however, seen in another game from the Olympiad, Firmansyah-Agopov, where 14.b3 Bg5 15.0-0 Kh8 16.Nde3 Qb6 *( 16...Bxe3 17.Nxe3 Nd4* looks like the way to equalise, but Black was much the higher-rated, so... *)* 17.Bg4 Bxe3 18.Nxe3 Bxg4 19.Qxg4 Nd4 20.Nf5 Ne6 21.Qh4 f6 22.Rfd1 Rbd8 23.Rd3 gave White an edge, although he later overpressed and went down. ]

**14.0-0 Bg5 15.Qd3 Be6 16.Rad1**

[The alternative is 16.Rfd1 , but after Wang Yue's Rc8! 17.Nde3 Bxe3 18.Qxe3 Qc7 19.Rd2 Rfd8 20.Rad1 Nb8 21.b3 Na6 22.f4 f6 Black should be solid enough, as we've examined before. ]

**16...Kh8!?** Not for Moiseenko the solid exchange on d5 which we considered above. Rather he is happy to manoeuvre around the knight on d5 and wants to force Bauer to make some good moves, not given him an easy way to improve his pieces.

[It's worth comparing the game with 16...Ra7!? , another fairly rare choice, but one chosen by an Anglo-Norwegian Sveshnikov expert. Certainly after 17.b3 Rd7 18.h3 Nb8 19.a3 bxa3 20.Nxa3 Na6 21.Bg4 Nc5 22.Qc2 g6 23.Nb5 f5 Black didn't seem to have any problems in Csonka-Devereaux, Leros 2011. ]

**17.Bf3**

[This may suggest that the bishop should have been fianchettoed in the first place. Bauer wants to increase his control over the light squares, but now Nce3 can always be met by ...Nd4 an important point behind Black's decision not to exchange on d5 and so retain his knight on c6. Quite possibly the French Grandmaster too was happy to manoeuvre, since had he been happy with just half a point, 17.Nce3 , and if Nd4 18.Nf5 , might have been seen. ]

**17...g6 18.b3 Ra7!** It's time to overprotect d6, a policy which works well for when the board opens up on one side or the other. **19.Qe2 Rd7 20.Rd3** This only encourages Black's next, but in any case I don't believe that White had even an iota of an advantage at this point. **20...Nb8** Another thematic manoeuvre, bringing the knight round to a fine outpost on c5. Bauer reacts by opening the queenside in a bid to start some play of his own. **21.a3!? bxa3 22.Nxa3 Na6 23.Rdd1 Nc5 24.Qc2 f5** And so, just like Devereaux above, Black has got in his standard pawn break and achieved a comfortable position. Note how the rook on d7 prevents White's leftward knight from exerting too much unpleasant pressure on d6, while with his own knight on c5, not c6, there are never tactics down the h1-a8 diagonal for Black to worry about. **25.Nb5 Bh6 26.Ndc3 Qb6!** Reminding White that with the f-file open, f2 might become an issue. Moiseenko is giving a textbook demonstration of the black position, but White should still be OK at this stage. **27.exf5?!**

[Bauer doesn't want to be pushed around, but this ambitious idea appears to ask too much of his position. No doubt he saw the line 27.Nd5?! Bxd5 28.Rxd5 *(*or

*28.exd5 e4 )* 28...fxe4 29.Bxe4 Nxe4 30.Qxe4 Rdf7 and panicked, ]
[ but with the calm 27.Rfe1! White could have maintained a state of dynamic equilibrium. The bishop will stay on f3 to block the f-file and it's not clear how Black further improves his pieces, especially as fxe4 28.Nxe4 Rxf3 29.gxf3 looks more speculative than good at this stage. ]

**27...Bxf5 28.Qe2!?**

[ The silicon monster isn't impressed by these moments of human weakness, but by now one can easily appreciate Bauer's desire to change the nature of the struggle. Only those with nerves of steel (or silicon) would willingly allow Black to bring his knight across to the kingside with tempo in the line 28.Qb2 Nd3 29.Qe2 Nf4 30.Qb2 . ]

**28...Nxb3 29.Na4** The point of White's pawn sacrifice. Suddenly he is quite active on the queenside, but Moiseenko has seen that Black can maintain sufficient control.

**29...Qb8!** Here, rather than d8, so that the rook can retreat if attacked by Bc6.

**30.Bg4! Nd4!**

[ A well-judged decision to return the extra pawn. Instead after 30...Bxg4 31.Qxg4 White would have enjoyed plenty of activity, with the passive Rfd8? blundering into the forking 32.Qh3! . ]

**31.Nxd4 exd4 32.Bxf5 Rxf5 33.Rxd4 Bg7** The dust is beginning to settle and it becomes clear that Black has done quite well out of the trades, having secured the better minor piece and an outside passed pawn. **34.Re4 Rf8 35.c5**

[ White's desire to stir up some trouble and try to activate his knight is understandable, but he only lands up making matters worse. No doubt Bauer was running low on time on the run-up to move 40, otherwise he would have preferred something calm like 35.Rd1!? , when Rb7 *( 35...Qb4? 36.c5!* more than saves the knight *)* 36.c5 dxc5 37.Nxc5 Rb2 38.Qe3 gives White an improved version of the game with his knight very much in the thick of things. ]

**35...Qc7 36.cxd6?!**

[ And this is definitely a mistake, with 36.Qe3! a clearly superior choice, still hoping to activate the knight with tempo via c5 or b6. ]

**36...Qxd6 37.Re8?!** The small inaccuracies continue to flow. Not only does this swap off an active rook for a slightly less active one, but crucially it makes it much easier for Black to target that fragile blockader on a4. **37...Rdf7 38.Rxf8+ Rxf8 39.g3 Qc6! 40.Nb2**

[ He must have made this retreat with a heavy heart, but 40.Qd1 Rb8 wouldn't have helped at all, threatening to corral the knight after ...Rb4. ]

**40...a4 41.Rd1 a3 42.Nc4 Qa4** The nature of the endgame is already clear. The a-pawn is going to cost White material, but can he inflict any counter-damage on the kingside in return? Bauer does his best on that score. **43.Ne5! Qb3!?**

[ After 43...a2 44.Ra1 Qd4 45.Nxg6+ hxg6 46.Rxa2 White's defences would have been fairly secure and I'm by no means certain that Black can win this. Clearly neither was Moiseenko as he preferred to manoeuvre, aiming for more. ]

**44.Rd2 Qb1+ 45.Kg2 Qb7+ 46.f3 Ra8 47.Kh3?**

[A hard move to assess. It was probably an unfortunate slip in a difficult situation, but on the other hand, it's not impossible Bauer thought the resulting endgame was just about tenable. The obvious plan was 47.Ra2 when Bf6 48.h4 Kg7 leaves Black finally threatening ...Re8 (Nxg6 is no longer check in response), but after 49.Nc4 Qb3 50.Nd6 Bb2 51.Qc4 the win is still not so easy. ]

**47...a2!** Suddenly it's time to cash in Black's chips, since White will get only one pawn for the knight. **48.Rxa2 Rxa2 49.Nxg6+ hxg6 50.Qxa2 Qxf3** Even this endgame is by no means an easy win, if indeed it is actually a win. However, in practice, especially with both sides playing largely on just the 30-second increment per move, Black has pretty good winning chances. **51.Qc4 Qf5+ 52.Kg2 Be5 53.Qd5 Kg7 54.Qc4 Qd7 55.Qe4 Qd2+ 56.Kh3 Qd7+** It's never a bad idea to repeat moves, both to emphasise control and in this case to collect another couple of 30-second increments. **57.Kg2 Bf6 58.h4!**

[A decent try. White tries to expose the black king and fix the kingside in a favourable way. The alternative was to wait with 58.Qe2 , but after Qd5+ the defence would not have been easy: for example, 59.Qf3? *(*or *59.Kh3 g5 60.Qf3 Qc4 61.Qf5 Qe2* when even *62.Qf3! Qe6+ 63.Kg2 g4!* leaves White getting squeezed *)* 59...Qxf3+ 60.Kxf3 Bc3 61.h4 Kh6 62.Kg4 Be1 63.Kh3 Kh5 64.g4+ Kh6 65.h5 g5 and Black will win by placing his bishop on the a1-h8 diagonal and bringing his king around to the e-file. ]

**58...Qd6 59.Kh3 Be5 60.h5!?** Consistent with his previous move but one, and sufficient to induce an error. **60...gxh5?**

[I dare say Moiseenko was worried that he wouldn't be able to make progress after 60...g5! , but it seems that Black can: 61.Qf5 Kh6 62.Qf3 Qf6! *(*and not *62...Qe6+ 63.g4 Bf4 64.Qe4! Qb3+ 65.Kg2* when I don't see how Black can make progress *)* 63.Qg4 Kg7 64.Qc8 Qf3 65.Qd7+ Kh6 66.Qe6+ Bf6 leaves White in zugzwang and the h-pawn about to fall. ]

**61.Qf5?**

[Missing his chance to some extent. After 61.Kh4! there was no good way for Black to defend his h-pawn, since Qc5 *( 61...Kh6 62.Qe3+ Kh7 63.Qe4+* repeats *)* 62.Kxh5 Bxg3+ 63.Kg4 only leads to the rather easily drawn ending of queen and bishop against queen. ]

**61...Kh6 62.Qf3 Qe6+** Now White is forced back, but even here any win isn't at all clear, as if the queens come off it's a dead draw in view of the wrong-coloured bishop. **63.Kg2 Bd6 64.Qd3 Qa2+ 65.Kh3 Qe6+ 66.Kg2 Bc5 67.Qf3 Be3 68.Qf8+ Kg6 69.Qf3 Kg5 70.Qa8 Bb6 71.Qf3 Bc7 72.Qf2 Bb6**

[Moiseenko is struggling to make progress, but quite what he should have done, either here or after 72...Qe4+ 73.Qf3 I'm not at all sure. ]

**73.Qf4+ Kg6 74.Qf3 Qc4 75.Kh3 Qc8+ 76.g4** This was by no means essential, since Black wasn't getting anywhere, but like many a defender before him Bauer is drawn to liquidation... **76...Kg7 77.Kh4 Bf2+! 78.Kxh5??** ...and to carelessness.

[The text is a horrible blunder, but perhaps White on top of no doubt being rather tired by this point, had prematurely relaxed. Instead 78.Kh3 would have led to a

well deserved half-point for the joint French Champion. ]

**78...Qe8+ 79.Kg5 Qe5+**

In this game, the strong GM Kryvoruchko shows how to exploit Black's chances in an instructive way:

[ White's last move was logical to defend the b3-pawn, but it was a mistake. The best continuation was 23.Rd1 Bxd5 24.Rxd5 Rxb3 25.g3! Rc3 26.Ra4= when despite being one pawn up, Black finds it hard to make progress due to the solid blockade on the light squares. ]

**23...Bxd5! 24.cxd5 Rb4! 25.f3?** This seemingly solid reply only weakens further the dark squares on White's camp.

[ 25.Re2 was a better option, but after Bb6 26.Rc1 Bc5∓ Black has a clear advantage. The next step is to activate the f8-rook by means of f7-f5, with a strong initiative. ]

**25...Bb6+ 26.Kh1 Rc8** We have the same material balance seen in Karpov-Mecking, but the situation is quite the opposite: Black has more active pieces and strong play on the dark squares. White has a passive bishop on a4 and his king is out of play on h1 for some moves, making his position very unpleasant. **27.Raa1 g6** Natural and good, giving air for the king and preparing to increase the pressure with f7-f5 at some point.

[ However, the engine says that 27...g5! was even stronger. The point is that if 28.Rac1 Rxc1 29.Rxc1 Rd4-+ Black keeps improving his pieces, and it's easier

to keep advancing on the kingside. ]

**28.Rfc1 Rb8!?** This keeps a clear and stable advantage for Black.

[ But 28...Rxc1+ 29.Rxc1 Rd4-+ was probably stronger. Black has time to close the c-file with the bishop and it's very easy to keep making progress with Rd2 and ideas like Kg7 followed by f7-f5. White's position is very difficult and in practice should be lost. ]

**29.Rc6 Bc5 30.Ra6 Bb6!** The rook is locked on a6 now. **31.Rc1 f5!** White can't avoid making a serious positional concession now. **32.Rc4** Negi takes the chance of exchanging one rook, but this doesn't solve his problems.

[ The engine prefers 32.exf5 gxf5 33.Bd7 but after Rf8 34.Rc6 Bc5 35.Rxa5 Rxb3 36.Ra1 e4 37.fxe4 fxe4∓ White's position still looks difficult. ]

**32...Rxc4 33.bxc4 Bc5! 34.Bb5** White seemingly managed to solve the problems and kept the position under control. But... **34...fxe4 35.fxe4 Rf8!** Reveals that the problems are far from over. The rook finds a new open file, and Kryvoruchko spots a new weakness on e4. **36.g3**

[ 36.h3 Rf4-+ is more or less the same. ]

**36...Rf1+ 37.Kg2 Re1?!**

[ 37...Rf2+! was a bit more precise, as after 38.Kh3 Re2 39.Rxa5 Kg7!-+ Black also takes the e4-pawn, but the white king is worse than in the game. ]

**38.Rxa5 Rxe4** Despite the material being equal, the passed pawn gives promising practical chances for Black.

[ 38...Re2+! 39.Kh3 Kg7-+ was still possible, transposing to the previous note. ]

**39.Ra2**

[ According to the engine 39.h4!= would give good drawing chances for White. ]

**39...Re1 40.Bd7?** The maneuver Bd7-g4 seems a logical way of dealing with the advance of the enemy pawn, but it allows Black to improve his position very easily.

[ 40.h4! was still good, as if e4 White has 41.Ra8+ Kf7 42.Rh8 Kg7 43.Re8= keeping the passed pawn under control. ]

**40...e4 41.Bg4 h5! 42.Be2 Kg7** White's position looks desperate now as Black keeps improving his position by bringing the king. **43.g4 h4**

[ 43...Rg1+ 44.Kh3 hxg4+ 45.Bxg4 was also good, as Black has Rc1 46.Be2 Kf6-+ and the king keeps getting active, with a technically winning position. ]

**44.g5 Be3?** This the game was played at a rapid time control, so both players likely were in time trouble at this point.

[ Instead, Black could keep a decisive advantage with 44...Rg1+ 45.Kh3 Rxg5 46.Kxh4 Rg2 47.Kh3 Rf2-+ and White is totally dominated. ]

**45.c5!** This timely breakthrough drastically changes the character of the endgame.

**45...dxc5**

[ In case of 45...Bxc5 46.Kh3 Bf2 47.Rc2⇄ White achieves enough activity to keep the balance. ]

**46.d6 Bxg5 47.d7** Although Black is two pawns up now, White managed to advance the passed pawn to the seventh rank. According to the engine, the position is objectively equal now, but Black eventually won. **47...Rc1 48.Bg4?!**

[Note that the game position can also come about via the move order 11...0-0 12.Nc2 Rb8 and then 13.g3 Bg5 . ]
**12.Nc2 Rb8** Not Black's most popular choice, but a move order which has obtained Gelfand's support of late. **13.g3**
[Almost a new move for us. Dorian Rogozenko described 13.a4 "as critical" in his notes to Berg-Smith, Stockholm 2007 (I also considered the move in Bacrot-Radjabov, Baku 2008). ]
[There's also 13.Be2 , but this proved insufficiently challenging after 0-0 14.0-0 a5! 15.Qd3 Be6 16.Rfd1 b4! in Dominguez Perez-Gelfand, London Grand Prix 2012, as we've seen too before. ]
**13...0-0 14.h4!**
[A logical gain of space and the critical continuation in my view (we've also seen plenty of this idea in related positions with c4 b4 inserted). Instead 14.Bg2 a5 15.a3 Ne7 was already agreed drawn in Pikula-Milanovic, Serbian Championship, Kragujevac 2011. Theory has shown that Black shouldn't have anything to fear after 16.Nce3 Be6 , and if 17.Nxe7+ Qxe7 18.Nf5! Qd7 when the d-pawn is taboo: 19.Nxd6? -2.68/22 *( 19.h4∓* -0.37/21 *Bf6 20.Ne3 )* 19...Rfd8-+ 20.Nf5 Dodges Qd7-e7 Bxf5 21.exf5 Bd2+ 22.Kf1 Qxf5 . ]
**14...Bh6 15.Bh3**
[And this is definitely new for us. The Fed considered that after 15.Bg2 a5 16.a3 "White is better", but Ne7 ...Ne7xd5 would now be deadly. 17.Nce3 Be6 still seems OK for Black, and if, say, 18.0-0 -0.32/22 *( 18.Nxe7+=* 0.09/20 *Qxe7 19.Ng4 Bxg4 20.Qxg4 )* 18...Bxe3 19.Nxe3 Qb6 . ]

**15...Be6** White has an edge. **16.Bxe6!?** A big decision, but Ivanchuk has previously shown in the Najdorf that such doubled e-pawn positions aren't always as comfortable for Black as the established view tends to suggest. **16...fxe6 17.Nde3N**

**17...Bxe3!** It certainly makes sense to offload this rather offside piece than allow Ng4. **18.Nxe3 b4!?**

[A new move, logically trying to open the queenside. Here the open f-file doesn't especially help Black and clearly ...d5 is some way off, so the key battle will be fought over whether White can take control of the position and open the queenside on his terms. Previously 18...Qe7 19.0-0 Rfd8 20.Qd3 Qf7 21.Rad1 Qf3 22.Rd2 Rb7 23.Rfd1 Rbd7 0.97/19 had seen Black happy to continue solidly in Vokarev-Yagupov, Linares 2000, but had White now gone *( 23...Na5± 0.55/23 )* 24.a4! he would surely have had a pleasant pull. ]

[I also wonder about 18...Na5!? which might even be Black's best move: 19.Qe2 *(*if *19.0-0 Nc4 20.Nxc4 bxc4 21.Qe2 Qc7;* and *19.Qd3* is also well met by *Nc4 )* 19...d5!? 0.38/22 *( 19...b4=* 0.00/22 *)* 20.exd5 exd5 21.0-0 d4 with decent enough counterplay. ]

Ukrainian Championship (8) 18.06.2011

*[Richard Palliser]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6**

[ Not for Volokitin 9.Nd5 , which Moiseenko had dealt with so well just four days before, as we'll see next, but rather the more uncompromising old main line. ]

**9...gxf6 10.Nd5 f5 11.g3** Not White's main continuation, but a fairly sensible one nonetheless White simply uses his bishop to support his control of d5. Moreover, I have to confess that this sub-variation has been rather neglected on ChessPub, so it's high time to take a close look. **11...fxe4**

[ Black should not run scared of tactics down the long diagonal and this is by far his main move. In another recent game he preferred to keep the position closed with 11...Bg7 12.Bg2 f4 , but this looks a little suspicious to me and after 13.c3 0-0 14.Nc2 a5 15.Qh5! Ne7 16.Nxe7+ Qxe7 17.0-0 Bb7 18.Rfe1 White had control over the position and thus likely an edge in Matsuura-Aranha Filho, Rio de Janeiro 2011. ]

**12.Bg2 Be6**

[ Naturally Black has to avoid 12...f5?? 13.Qh5+ when he will be mated in short order, ]

[ but 12...Bf5!? is possible when the position quickly becomes quite unbalanced after 13.f3!? e3 14.f4 . ]

**13.Bxe4 Bg7! 14.Qh5!**

[ This looks like the most challenging continuation. Instead after 14.0-0 0-0 15.c3 f5 16.Bg2 , as Cox points out, White has lost a tempo compared with the variation 11 c3 Bg7 12 exf5, and so Black must be fine. ]

[I guess 14.Nf6+?! Bxf6 15.Bxc6+ must be considered the critical continuation, but after Ke7 16.Bxa8 Qxa8 it's obvious that Black has fantastic play for the exchange, such as with 17.f3 b4 18.Nb1 h5 . ]

**14...Rc8** Played not just to support the knight and escape the long diagonal, but also because a timely ...Rc5 will help Black challenge for d5. **15.c3** Keeping Black's knight under control and, of course, also enabling White's own knight to have a route back into the game. Indeed, if there is a clear downside to the 11 g3 variation it's that the knight often remains out of the action on a3 for quite some time. **15...Ne7 16.Rd1 Nxd5**

[A new move for us. Previously the Fed had given 16...Rc5 17.Nb4 Qb6 18.Qg5 Kf8 19.Qe3 f5 20.Bg2 e4 21.Nac2 Kf7 *(*whether matters are, however, so clear after *21...a5!? 22.Nd4 Bc4 23.Nbc2 b4* I'm not so sure *)* 22.Nd4 and 'around here White looks to have a nice edge', Sax-Shariazdanov, Bihac 1999. ]

**17.Bxd5 Bxd5!?**

[One might say that this is almost too simple a solution, but Moiseenko had undoubtedly prepared this and does go on to draw without difficulty. I'm still not sure why, though, he rejected the natural 17...Qd7 , which Volokitin had previously faced: 18.Bxe6 *( 18.Nc2 Bg4!* - one point behind Black's 17th - *19.Qg5 Bxd1 20.Kxd1?! Rc5* is a slightly speculative exchange sacrifice and after *21.Qxg7 Rxd5+ 22.Ke2 Rf8 23.Ne3 Rc5 24.Ng4 Qf5* White was a little fortunate not to lose in Mardell-Von Bahr, Lund 2010,*;* while *18.0-0* enables Black to reveal another point behind his 17th: *Rc5! 19.Bxe6 Qxe6 20.Nc2 0-0* , transposing *)* 18...Qxe6 19.0-0 0-0 20.Nc2 Rc5 (practice has long shown that Black has decent, dynamic counterplay here and this example doesn't suggest any different) 21.Rd2 Bh6 *( 21...f5!? 22.Rfd1 d5 23.Ne3 d4* may be enough to draw, and has done in practice, but White seems to retain a small pull with *24.cxd4 exd4 25.Nc2 Qxa2 26.Nxd4 )* 22.Ne3 e4 23.Qe2 f5 24.Rfd1 Rd8 25.Rd4 Re5! 26.Nd5 Kh8 gave rise to a typically complex Sveshnikov situation in Volokitin-Krasenkow, Lublin 2009 Black's queenside is collapsing, but he is about to lever open kingside lines with ...f4. ]

**18.Rxd5 Rc5 19.Rxc5**

[Tempting as d5 is weak, but this straightforward approach doesn't really lead anywhere. In the only previous game to reach this position White had preferred 19.Rd2!? and after e4 *( 19...0-0 20.0-0 f5 21.Nc2 e4 22.Qd1 Be5 23.Ne3* is similar, but I wouldn't be surprised if somewhere in this line Moiseenko had found a deep sequence leading to a draw *)* 20.Qd1! Be5 *( 20...d5 21.Nc2 Bh6?! 22.Rd4 Bg7* doesn't force a repetition on account of *23.Ne3! )* 21.Nc2 0-0 22.0-0 f5 23.Nd4 Qf6 24.f4! had an edge in Aleksic-Gueci, Catania 1990. ]

**19...dxc5 20.0-0 Qd2!** Tempting and strong. White must now scurry back with his own actively-placed queen. **21.Qd1! Qxd1**

[But not 21...Qxb2? 22.Qd6 when Black finds himself in some trouble, as Qxa3? 23.Rd1 leads to mate. ]

**22.Rxd1 Ke7 23.c4** It makes sense to fix the queenside before routing the knight to

d5, but even this doesn't appear to especially trouble Black. **23...b4 24.Nc2 Rd8 25.Rxd8 Kxd8 26.g4**

[Black is just in time to avoid a complete light-square bind after this. As such I wonder if 26.f3!? wasn't a better try, although after e4! 27.b3 f5 28.Kf2 exf3 *(*and not *28...Bd4+?? 29.Nxd4 cxd4 30.fxe4 fxe4 31.g4* when the split pawns will triumph over the connected ones *)* 29.Kxf3 Ke7 30.Ne3 Ke6 31.Nd5 Bd4 it seems that Black can draw. The real trick to Moiseenko's preparation was realising that while White has an edge, it's extremely hard for his king and knight to team up against any of Black's pawns. ]

**26...e4! 27.b3 Ke7 28.f4 exf3 29.Kf2 Ke6 30.Kxf3 Ke5** Now Black's king is actively placed and his bishop will be able to keep the kingside together. **31.h4 Bf6! 32.g5 Bd8 33.Kg4 f6** This in conjunction with Black's last two moves rather oozes class. White will never be able to get near h7 with his knight without allowing Black's king to run riot on the queenside. **34.Ne3 fxg5 35.hxg5 Kd4 36.Nd5 a5 37.Kf5 a4!** As he'd no doubt realised back at move 31, Black is just in time to draw. **38.bxa4 Kxc4 39.Nf6??**

[Time trouble I presume, no doubt caused by calculating all number of races in this endgame. Correct was 39.Ke4 b3 40.axb3+ Kxb3 41.Nf6 c4 42.Nxh7 c3 43.g6 c2 44.g7 c1Q 45.g8Q+ , queening with check. ]

**39...b3??**

[Returning the favour. Presumably Moiseenko, despite all his preparation, was also deep in time trouble, having had to tread a narrow line earlier in the ending, or was he just too happy with a draw? We may never know, but here 39...Kd4 would have won from what I can see. One sneaky point is that after 40.Nxh7 c4 41.g6 b3 42.g7 *( 42.axb3 cxb3 43.g7 b2 44.g8Q b1Q+* is point no.2 White will lose his queen next move *)* 42...b2 43.g8Q b1Q+ White doesn't have a safe square for his king which doesn't allow the exchange of queens: for example, 44.Ke6 Qe4+ 45.Kf7 *( 45.Kd7* is mated by *Qe7+ 46.Kc6 Qc7+ 47.Kb5 Qb6# )* 45...Qd5+ 46.Kg7 Qxg8+ 47.Kxg8 c3 and the c-pawn decides. ]

**40.axb3+ Kxb3 41.Nxh7**

[Now it's just a draw, but so too would it have been after 41.a5 c4!? *( 41...Bxa5 42.Nxh7 Bd2 43.g6 Bh6* is a simpler policy *)* 42.Nxh7 Bxg5 43.Nxg5 c3 44.a6 c2 45.a7 c1Q 46.a8Q Qc5+ 47.Kf4 Qc1+ 48.Kg4 Qg1+ 49.Kh5 Qh2+ 50.Kg6 Qd6+ and with a typical circling sequence of checks Black prevents White from ever bringing his extra piece into play. ]

**18...e4 19.Bc2 b4!?**

[With his centre crumbling, Wang Yue tries to create some counterplay. This is a new try over the board, where previously Black had tried to defend with 19...Ne7 . However, after 20.Nxe7+ *(* by no means forced *20.Nf4 d5 21.gxf5 Qd6 22.Qg4* wouldn't have been so clear in Nikolaidis-Kapnisis, Aghia Pelagia 2004, had Black simply gone *Rxf5 23.Rg1 Rf7 ,;* but Rybka's *20.h5!?* deserves attention pushing the pawn all the way to h6 won't trouble Black's bishop, but after *Kh8 21.h6 Be5 22.gxf5 Nxf5 23.Qg4* the g7-square is sensitive and White doing pretty well *)* 20...Qxe7 21.Qd5+ Kh8 22.gxf5 it's not clear that Black has enough for his pawn, tempting though both pawn breaks look here. Herbrechtsmeier-Karr, French League 2005, continued b4 *( 22...e3!?* is likely a better try, although after *23.Ke2 exf2+ 24.Kxf2 Rae8 25.Rae1* , and if *Qa7+* then *26.Kf3* , the unemotional object still isn't convinced that Black has enough counterplay *)* 23.cxb4 Bxb2 24.Rb1 Bc3+ 25.Kf1 Rae8 26.Rh3! Qf6 27.Bxe4 when the position was messy, but objectively White was doing rather well. ]

**20.gxf5 bxc3 21.bxc3 Rxf5?!**

[New, but not overly convincing, although I suspect that Wang Yue was not in his preparation by this point! Black is already in some trouble, but 21...Qa5! looks like a better try. Then the calm 22.0-0 Rae8 23.Re1 turned out well for White in Mrazik-Rufenacht, correspondence 2003, but playing this position over the board wouldn't be such an easy task. ]

**22.Bxe4 Qe8 23.Qd3 Re5 24.f3** Cementing the bishop and thus also the knight in place. The board is very open, but White's centralised forces, extra pawn and slightly safer king give him some advantage. **24...Qh5 25.0-0-0!** Now that Black's queen has abandoned the queenside, Yu Yangyi seizes the chance to attack. **25...Kh8 26.Rhg1 Qf7 27.f4** Beginning to roll forwards. Black has been completely outplayed and already his days are numbered. **27...Rh5 28.Rg5 Rxh4**

[This doesn't work, but what else was there? Black could hardly exchange on g5 and open the h-file, while after 28...Rh6 29.Rdg1 Rg8 30.R1g4!? White would have prepared ideas of Alekhine's famed gun, with huge pressure on the kingside. ]

**29.Qg3 Rh6 30.Rg1 Rg8 31.Ne3?!**

[White's queen might not be the rear piece tripled on the g-file here, but he should still have far too much pressure. However, rerouting the knight allows Black's queen to eye the a-pawn and gives Black a definite chance. Thus the correct plan was the blunt 31.f5! when Ne5 gives White a number of options, including 32.Nf4 when Bd5 will be next up and Qxa2 33.Rxg7 Qa3+ 34.Kd1 Qa1+ 35.Ke2 Qb2+

36.Kf1 Qc1+ 37.Kf2 Qd2+ 38.Ne2 sees Black running out of checks. ]

**31...Ne7 32.Ng4 Rc8?**

[ Wang Yue understandably wants to counterattack having been under the cosh for so long, but this isn't the right way. First Black should have dealt with the g-file with 32...Rg6! and after

**A)** White should decline the material and prefer 33.Rh1 , continuing to fight for the initiative Black has a few ideas here, but after, say, Rc8 34.Kd1! Bxc3 *(*or *34...Rxc3 35.Qh2 )* 35.Bxg6 Nxg6 36.Rgh5 Nf8 37.Qd3 Rc7 38.Qf5 he comes up short;

**B)** 33.Bxg6? Nxg6 34.Rg2 Rb8 the initiative would have changed hands, leaving all three results very possible. ]

**33.Nxh6 Bxh6 34.Rh1!** The pressure down the h-file will outclass whatever Black can muster against c3. **34...Qf6 35.Kb2 d5 36.Rgh5 Qb6+ 37.Ka1 Rg8 38.Qh2 1-0**

It's been played 64 times this year according to TWIC, but surely experienced Sveshnikov players aren't still being caught out by it? Well, they certainly shouldn't be, but read on... **11...b4 12.Nc2 0-0** This flexible move order became popular thanks

to Radjabov's own efforts, although it's by no means clear that either immediate defence of the b-pawn is exactly bad. **13.g3**

[Instead 13.Ncxb4 Nxb4 14.Nxb4 Qb6 15.Nd5 Qxb2 gave White nothing in Anand-Radjabov, Bilbao 2008, as subscribers will be aware, ]

[but 13.Be2 is an important alternative. Indeed, matters weren't entirely clear in some recent games after it: a5 *( 13...Bg5 14.0-0 Be6* defends the b-pawn via tactical measures for the time being then *15.Qd3 Qb8!? 16.Rfd1 Ra7 17.Bf3 Bd8 18.b3 Rd7 19.Qe2 g6 20.Rd2 a5 21.Rad1 Kh8 22.h3 Bg5 23.Rd3* was perhaps a little better for White in Hou Yifan-Yu Yangyi, Danzhou 2010, although she never made any real impression on Black's solid position *)* 14.Qd3 *(*or *14.0-0 Bg5 15.Qd3* and now Kolev's *Bb7!?* held up well after *16.Rfd1 Nb8 17.Nde3 Na6! 18.Nf5 Nc5! 19.Qxd6 Nxe4 20.Qxe5 Qf6 21.Qxf6 Bxf6 22.Nfd4 Nc5* when White had to agree to a draw in Predojevic-Vukic, Bosnian Team Championship 2010, despite a near 200-point rating advantage however, I still feel that 17 a3!? is likely a more testing approach *)* 14...Be6 15.0-0 Bg5 16.Rfd1 *(*we've seen before that in Karjakin-Timofeev, Khanty-Mansiysk 2009, *16.Rad1 Bxd5! 17.Qxd5 Qb6* saw Black draw without any real difficulty *)* 16...Bxd5 *(*I've previously preferred *16...Rc8!?* , but Van Wely clearly has his own ideas *)* 17.cxd5 Nb8

**A)** as we've seen before, the 18.Ne3 Nd7 *(*no doubt Van Wely had an improvement in mind, perhaps in the shape of *18...Na6!? 19.Rac1 Ra7 )* 19.Rac1 Nc5? 20.Rxc5! Bxe3 21.Qxe3 dxc5 22.d6 of Timofeev-Smirnov, Moscow 2009, gives White fantastic control for the exchange;

**B)** 18.a3!? Na6 19.axb4 Nxb4 20.Nxb4 axb4 21.Qc4 Rxa1 22.Rxa1 Qb8 23.Ra4 Rc8! *(*Black relies on a common Sveshnikov drawing ploy, rather than suffer after *23...Bd2 24.Ra6 Rc8 25.Rc6 Rd8 )* 24.Rxb4 Qa8 25.Ra4 Qb7 26.Ra7 Rxc4 27.Rxb7 Rc1+ 28.Bf1 Kf8 29.b4 *(*it would have been a draw too after *29.Rd7 Re1 30.Rxd6 Rxe4 31.Rc6 Rb4 32.d6 Ke8 )* 29...Bd2 30.g3 and 1/2-1/2 was the slightly mysterious game Nijboer-Van Wely, Dutch Championship, Eindhoven 2010. It's not impossible that this was all preparation from Van Wely and certainly the presence of opposite-coloured bishops always made the draw likely after the fall of the black b-pawn. However, some white players may see signs here that 16 Rfd1 might still lead to an advantage and do all Sveshnikov players really want to have to struggle for the draw in this manner? ]

**13...Be6**

[Not the only approach 13...Bg5 followed by the transfer of the queen to c5 being quite a highly-regarded alternative. ]

**14.Bg2 a5**

[I wonder what Nisipeanu had in store for 14...Rb8 , or was he happy just to play with a small edge, content with a draw if Black defended well? At any rate, the rook move is a decent alternative and after 15.0-0 a5 16.b3 Bxd5 17.Qxd5 Qb6 18.Rad1 Rfd8 19.Qd3 a4 Black was very solidly placed in Amonatov-Timofeev,

Russian Team Championship 2008. ]

**15.0-0 Rc8** Trying to bring the rook to a slightly more active square than Timofeev chose. **16.Qd3**

[ White tries to dissuade ...Nd4 ideas. Indeed, 16.b3 Bxd5 17.Qxd5 Nd4! 18.Nxd4 exd4 19.Qh5 g6 20.Qd1 Bg7 left Black extremely solidly placed in Predojevic-Wang Yue, Lausanne 2006. ]

**16...g6**

[ I'm not convinced that this is best. Indeed, consulting the ChessPub Archive (!) I noticed that Black might still sink his knight into d4: 16...Bxd5!? 17.cxd5 (thus far Schwarhofer-Farkas, Kemer 2007) Nd4 18.Nxd4 exd4 and now, as pointed out in my notes to Movsesian-Tregubov, Russian Team Championship 2008, 19.Rac1 Qb6 20.Bh3 Rc5 leaves a draw looking likely, although even here White retains a nominal pull such appears to be the annoying nature of 10 Bxf6 Bxf6 11 c4 from Black's point of view. ]

**17.Nxf6+!** At first a surprising decision, but had Black been given time to consolidate with ...Bg7 then his position would have been pretty resilient and he might even have got in the ...f5 break. Instead the Romanian no.1 gives up his strong knight, but retains a small edge thanks to his d-file pressure and options on the kingside.

**17...Qxf6 18.b3**

[ White must continue slowly: 18.Qxd6? Rfd8 19.Qc5 Nd4 would most certainly not have been the way to go. ]

**18...Qe7 19.Rad1 Rfd8 20.h4!**

[ Nisipeanu calmly begins to expand, while Radjabov can unpleasantly only really sit and wait. A sharper alternative was 20.f4 , but after exf4 21.gxf4 Bg4!? 22.Rd2 a4 Black would have acquired some counterplay. ]

**20...Kh8**

[ Not bad, although this appears to have been played as the start of a faulty plan. Instead if Black wanted to mark time while making a semi-useful move then 20...Ra8 was a reasonable try. ]

**21.Kh2 f5?**

[ Radjabov has a fine understanding of dynamic play, but here this typical break will only leave Black with static weaknesses. Just one superior move would have been 21...Kg8 . Possibilities of h4-h5 and a later f2-f4 leave White a little better, but Black would have remained extremely solidly placed in this case. After all, we shouldn't forget that White's knight can hardly leave c2 for the time being. ]

**22.exf5 gxf5**

[ This only helps Nisipeanu to create a memorable positional masterpiece, but Black's position would also have been quite unpleasant after 22...Bxf5 23.Be4 Qf6 24.Ne3 Bxe4 25.Qxe4 . ]

**23.Bxc6!** Simple but very effective. Before breaking with f2-f4 White prevents his bishop from being entombed by exchanging it for Black's best minor piece. **23...Rxc6 24.f4 Rcc8** Already the defence is pretty difficult, since Black never wants to advance his e-pawn, fixing yet another pawn on the same colour squares as his

bishop and giving the white knight targets to attack. **25.Qe3 Qg7 26.Rf2!**
[Continuing to calmly build up. Instead Radjabov was no doubt hoping against hope for 26.Nd4? exd4! 27.Qxe6 Re8 28.Qxf5 Re2+ with counterplay down the e-file. ]
**26...Rd7?**
[Radjabov must have missed White's next or already been a little too resigned to his fate. Instead 26...e4 is a move Black would prefer to avoid, but after 27.Rfd2 d5 he could at least have put up some resistance. ]
**27.Nd4!** A powerful blow. Black must either allow the knight to enter his position via b5 or consent to the complete destruction of his structure. A rather horrible choice to have to make. **27...Qg4 28.Rdd2 Re8 29.Nb5 d5** This doesn't especially help, but the alternative was to cede the d-pawn while retaining all Black's other weaknesses. **30.Nd6! Red8 31.Qxe5+ Qg7 32.c5** The c-pawn and advanced knight will decide proceedings. **32...Qxe5 33.fxe5 Rc7 34.Rc2 d4 35.Rfd2 f4** Sheer desperation, but even low on time Nisipeanu wasn't going to be tricked. **36.gxf4 d3 37.Rxd3 Bf5 38.Nf7+ Kg7 39.Rg2+**

[A change of approach. Shirov's opponents up to now have preferred 13...a5 and this had also been Krasenkow's choice. Indeed, the Polish Sveshnikov expert had been happy to defend 14.Bg2 Be6 15.h4 Bxd5 16.cxd5 Nb8 17.Ne3 Na6 18.Rc1 , but it seems that White has a small but clear edge here, as shown in my notes to Shirov-Mista, European Rapid Championship, Warsaw 2011. ]
**14.Bg2 Qa5!?**
[A new move for us, although it has been played before by the likes of Wang Yue. Black exploits the fact that he hasn't gone ...a5 to bring the queen to a great square on c5, covering d6 while pressuring c4. Instead 14...a5 would transpose to Shirov-A.Muzychuk from Gibraltar where 15.0-0 Ne7 16.h4 Bh6 17.Nde3 should have been met by g6 , as I analysed in the notes to Timman-Reinderman last month. ]
**15.0-0 Qc5 16.Kh1!?** A new move and a typically Shirovian one at that. Rather than manoeuvre, Shirov simply wants to unpin the f-pawn and attack! This must be pretty critical, but practice has also seen:
[a) 16.b3 a5 *(*deviating from Balogh-Wang Yue, Beijing (blitz) 2008, since there *16...Be6?!* might have been met by the pawn-winning *17.Nc7! Ra7 18.Nxe6 fxe6 19.Qg4 Raf7 20.Qxe6 Kh8 21.Kh1* and *Rxf2?* is impossible on account of *22.Rxf2 Qxf2 23.Rf1 )* 17.Qd3 *( 17.Qh5* induced *f6!* in Mestre Bellido-Cuenca Jimenez, Montcada i Reixac 2011, but there's no need for Black to fear a pawn-storm here and after *18.Qe2 Ra7 19.Kh1 f5 20.f4! exf4 21.gxf4 Bh6 22.Rad1* an unbalanced, roughly level position was reached *)* 17...Ra7!? (a notable way to develop the rook it's not yet clear where the light-squared bishop wants to go, but

Black would quite like to double his rooks on the f-file after an eventual ...f5) 18.Rad1 *(*White might turn his attention to the queenside in a bid to exploit Black's last, but after *18.a3!? bxa3 19.Nxa3 Nd4 20.Nb5 Rb7 21.Nxd4 exd4 22.h4 Bd8* Black should be solid enough, especially with ...Be6xd5 and an opposite-coloured bishop scenario looming *)* 18...Bg4 19.Bf3 Bh3 20.Bg2 *( 20.Rfe1?!* rather misplaces White's pieces and would have allowed Black to seize the initiative with *f5 )* 20...Bg4 21.Bf3 Bh3 saw both players happy with an early draw in Spasov-Parligras, Turkish Team Championship 2011. ]

[ b) 16.Qe2 a5 17.Kh1 echoed our main game, but Shirov has a more active square for his queen in mind than e2, and here Be6 18.f4 Bh6 19.Nce3 Nd4 *( 19...exf4!? 20.gxf4 g6 21.f5 Bxd5 22.Nxd5 Ne5* was the alternative *)* 20.Qd3 Kh8 was very solid for Black in Borisek-Moiseenko, Khanty Mansiysk Olympiad 2010. ]

[ c) 16.Qd3 a5 *(*I prefer this to *16...Rb8* Black went for queenside activity here in Espinosa Veloz-Fernandez Cardoso, Santa Clara 2011, but *17.b3 a5 18.Rad1 a4?! 19.h4 axb3 20.axb3 Bd8 21.Nde3! Bc7 22.Kh2 Be6 23.Bh3* gave White a pull *)* 17.h4 Bh6 (in general the right square for the bishop, preventing White's rooks from using the c1- and d2-squares for the time being and always enabling him to exchange off any knight which appears on e3) 18.b3 Ra7 19.Rad1 led to another comfortable, early draw for Black in Todorovic-Nedev, Skopje 2011. After Bg4 20.Bf3 Bh3 21.Rfe1 Be6 22.Nde3 Bxe3 23.Qxe3 *(*or *23.Nxe3 Nd4 )* 23...Rd7 Black would most certainly have enjoyed full equality. ]

**16...a5 17.f4 exf4 18.gxf4 Bh6 19.Qh5!** The point of White's play. As the approach of putting the queen on c5 had been played by such Sveshnikov experts as Moiseenko and Nedev, this was presumably all preparation by Shirov. Black's bishop appears a little vulnerable on h6 and White undoubtedly has chances to seize the initiative, but Black's position still seems solid enough from what I can see. That said, this new approach does look like White's best try in this sub-variation and definitely deserves further tests! **19...Kh8!**

[ Good defence. Now the c-pawn really is attacked, whereas 19...Qxc4? would have been extremely risky, since 20.Nce3 Qd4 *(*or *20...Qa6* when White can do far better than grab the exchange in the corner, with *21.Nf5! Bxf5 22.exf5* again leaving Black in serious trouble: Nc7 and f6 both being serious threats *)* 21.Rac1 leaves Black in huge trouble, with Bd7 22.Nf5! Bxf5 23.exf5 Rac8 24.Rxc6 Rxc6 25.Ne7+ costing him a piece. ]

[ Another possibility was 19...Be6 20.Nce3 Nd4 , but after 21.Nf6+! Kh8 22.Qxc5 dxc5 23.Nfg4 White keeps a plus, such as after Nc2 24.Nxc2 Bxg4 25.Ne3 Be6 26.e5 . ]

[ However, perhaps Black might also be able to shore up his defences with 19...f6!? , a plan that would certainly prevent the rook swings along the sixth which we'll see in our next note. ]

**20.Nce3**

[ Now Black can simplify. As such perhaps White should have first moved his

queen's rook, with 20.Rad1!? an obvious candidate, hoping for Qxc4?! *(*this still seems too risky instead *20...Be6 21.Nce3 Ne7!* would echo the game,*;* while *20...f5!? 21.exf5 Bxf5 22.Nce3 Bg6* also comes into consideration *)* 21.Nce3 Qxa2 22.Nc7 with a powerful initiative: for example, Qb3!? *(*or *22...Rb8 23.Rxd6 Bb7 24.Nf5* and Black's kingside is collapsing *)* 23.Rxd6 Qxe3 24.Rxc6 Ra7 25.Rxh6! gxh6 26.Qxh6 Qc5 27.Qf6+ Kg8 28.Rg1 Rxc7 29.Bf1+ Qxg1+ 30.Kxg1 Rc5 31.f5 and the queen rather outclasses Black's rooks. ]

[ However, I suspect that 20.Rac1 is too slow, with Black able to reveal one idea behind his last move with f5! , fighting for space and holding White up on the kingside. ]

**20...Ne7!** An unusual but nonetheless pretty effective method of exchanging a pair of pieces. White's reply may look a little scary, but Krasenkow has it all under control.

**21.e5 Nxd5 22.Bxd5**

[ I dare say Shirov would have liked to have gone 22.Nxd5 , removing the knight from attack, but after Ra6! only Black can be better, with targets on c4 and e5 to attack, not to mention enjoying possession of the bishop-pair. ]

**22...Ra7** Again the rook is developed along the file and now that f7 is secure White must continue playing for exchanges if he wants to maintain rough equality. **23.Ng4 Bxg4 24.Qxg4 dxe5 25.fxe5 g6** Preparing to take aim at e5, but White will be just in time to force a timely central simplification. **26.Rf3?!**

[ However, this was not the right path. Shirov had to cover his weaknesses with 26.Rae1 Bg7 27.Qg3! Re7 28.b3 and only then would the time have been right to simplify, such as with Qc7 29.e6 . ]

**26...Bg7 27.Re1 Re7 28.e6?**

[ This strikes me as a bluff, so quite possibly Krasenkow, if not both players, was horribly low on time by this point. Again from an objective perspective White should have defended e5: 28.Qg5 Qc7 29.Rfe3 and White should be OK, since Rxe5 30.Rxe5 f6 31.Re7 Qxe7 32.Rxe7 fxg5 33.c5 gives him plenty of counterplay. ]

**28...fxe6?**

[ Black is OK after this, but he might have grabbed with 28...Bxb2! , exploiting the fact that the e-pawn is pinned. After, say, 29.Rd1 f5 30.Qf4 Kg7 31.Rh3 White can hope to intimidate Black on the kingside, but it's hard to believe that Black wouldn't have enjoyed decent winning chances thanks to his firm blockade and potential outside passed pawn. ]

**29.Rxf8+ Bxf8 30.Qf4 Re8 31.Rxe6 Rxe6 32.Bxe6**

[ There's clearly no way through after 32.Bxe6 Qe7 33.Bd5 Kg7 34.c5 Qf6 , so by now a draw was definitely the right result! ]

[ Carlsen remained true to the Novosibirsk in a later blitz play-off game with Ivanchuk in Leon, although after 11.c3 f5 they were back in the Chelyabinsk (that variation which usually begins with 10...f5): 12.exf5 Bxf5 13.Nc2 0-0 14.Nce3 Be6 15.Bd3 f5 16.Bc2 *(* a critical alternative is *16.0-0 Ra7 17.a4 Ne7! 18.Nxe7+ Rxe7 19.axb5 axb5* , but Black appears to have roughly enough for his pawn here - see Anand-Leko, Wijk aan Zee 2005, in the Archive *)* 16...f4 *(* if Black wants to avoid an early draw he might consider Kryvoruchko's *16...Bh6!? 17.Qh5 Bxe3 18.Nxe3 Qe8* , as covered by Cox in his fine Starting Out guide *)* 17.Qh5 Rf7 18.Bxh7+ Kf8 19.Bf5 Qe8 20.Bxe6 Qxe6 21.Qg4 Qh6 22.Nc2!? *(* a rare idea White has usually repeated moves here with *22.Nf5 Qe6 23.Nfe3* , leading to a number of early draws *)* 22...e4 23.Qh3!? *(* the actual novelty Ivanchuk is unsurprisingly keen to get the queens off, rather than follow the game Hendriks-De Vreugt, Dutch League 1997, in which *23.Nd4 Ne5!? 24.Qe6 Nd3+ 25.Ke2* should have been met by *Qh5+ 26.Kd2 Be5* , retaining excellent compensation *)* 23...Qxh3 24.gxh3 Ne5 (thus Black remains a pawn down, but his active knight and White's vulnerable king position promise enough compensation) 25.0-0 Nd3 26.a4 (essential otherwise White would just be worse thanks to all his structural concerns)

**A)** a natural move and this game was played at a very fast time limit, but with more time I'm sure Carlsen would have considered the more active 26...Rf5! White can keep his knight active, but 27.Nc7 *( 27.Ncb4 Nxb4 28.Nxb4 a5 29.Nc6 b4* also seems OK for Black *)* 27...Ra7 28.Ne6+ Ke8 gives Black good counterplay since his rooks are well placed to target White's shaky kingside;
**B)** 26...Rb8? 27.Ncb4 bxa4 28.Rxa4? *(* both sides' structures are a mess after *28.Nxd3 exd3 29.Nb4 d2 30.Rfd1 a5 31.Nd3* only White can be better here, although I would have backed Carlsen to hold after *f3! 32.Rxd2 Re7 )* 28...Nxb2 29.Rxa6 Nc4 30.Rfa1 with a roughly level middlegame, although it wasn't too long before Ivanchuk found himself having to defend with rook against rook and knight. ]

**11...Ne7 12.Nxe7 Qxe7 13.c4 f5 14.0-0 0-0 15.Qh5!?**

[ Quite a critical choice. Not for Shirov the tiny edge that Anand obtained after 15.Qf3 d5! 16.cxd5 fxe4 17.Bxe4 Rb8 18.Rfd1 f5 19.d6 Qf6 20.Bc6 Be6 21.Bd5! in Anand-Radjabov, Linares 2009, which can be found in the Archive ]

**15...Rb8!** Approved by theory. As so often in this variation, Black is happy to give up a pawn for activity. **16.exf5 e4 17.Rae1 Bb7 18.Qg4!** Probably the most challenging continuation, although others have also been seen:

[ a) 18.cxb5?! d5 19.bxa6 Bc6 leaves Black with a strong centre and the two bishops. He is admittedly three pawns down, but b2 is falling and I would rather take Black here - see Tony's notes to T.Horvath-Nedev, Feugen 2006. ]

[ b) 18.Re3 looks rather dangerous, but is neutralised by bxc4 19.Bxc4 d5 20.Bxd5 Bxd5 21.f6 Qxf6 22.Qxd5 Qxb2 with a likely draw in the endgame. ]

**18...Rfe8**

[ As I've mentioned before, Kolev and Nedev, following Cox, suggest 18...Kh8!?

, which looks like a pretty decent alternative. The main point is to meet 19.Bxe4 with Rfe8! , after which their 20.Re3 *( 20.Bd3!? Qxe1 21.f6 Bxf6* was agreed drawn in Solovjov-Zhigalko, St Petersburg 2008 presumably Khalifman's assistant didn't like the look of *22.Qf5 Kg7 23.Qxh7+ Kf8 24.Rxe1 Rxe1+ 25.Bf1* when White's minor pieces are far from well coordinated, but might Carlsen have been less happy to play against such an active queen? *)* 20...Bxe4 21.Rfe1 Qf6 22.Rxe4 Rxe4 23.Qxe4 Qxb2 gives Black fairly promising activity. ]

**19.cxb5 d5 20.bxa6 Bc6 21.b3** A sensible if almost unShirovian choice, keeping the queenside pawns. Shirov is something of a Sveshnikov expert and I imagine that much thought went into his choice while preparing, although by no means everyone has been so keen to accept the defensive task imposed by the text:

[a) I wonder what Carlsen intended after 21.Be2!? , which also looks promising: Rxb2 22.Rc1 h5 23.Qxh5 Ba4 24.f6! favoured White in Najer-Yakovich, Novokuznetsk 2008, as we've seen before. ]

[b) However, 21.a7?! Rxb2 22.Rc1 isn't at all clear, since h5! , while not always played, should give Black enough counterplay: 23.Qxh5? exd3 24.Rxc6 is impossible on account of the decisive Rxf2! . ]

**21...Kh8!?**

[The first over-the-board test for this idea. Previously Black had tried 21...Bd7 , but then he has to deal with some slightly awkward tactics: 22.a7! Rb7 23.Nc4! Rd8! *( 23...dxc4? 24.Rxe4 Qd8 25.Rxe8+ Qxe8 26.a8Q Qxa8 27.Be4* reaches a clearly better endgame, although White would still have had to display some technique here *)* 24.Ne3 *(*I don't think White is better after this thus he might try *24.Qg3!? Rxa7 25.Ne3* , returning the advanced a-pawn to maintain control, although *exd3! 26.Nxd5 Qf8 27.f6 Be6 28.Nf4 d2 29.Rd1 Rxa2 30.Nh5 Bf5 31.Nxg7 Bg6 32.Nf5 Kh8 33.Qe5* still doesn't look too promising for White - Black should be fine due to his cramping, monster d-pawn *)* 24...exd3 25.Nxd5 Qd6 26.Qh4 *(*improving over the horrible oversight *26.Qg5? f6 27.Qg4 Bc6* , which simply left White a piece down in Fier-Cordova, Buenos Aires 2007 *)* 26...Bxf5 27.Ne7+ Rxe7 28.Qxe7 Qd5 29.Re3 d2 30.Rd1 Bg4 31.f3 Be6 32.Re2 Bc3 isn't at all clear White is once again three pawns ahead, but that guy on d2 is very strong and I'd be amazed if Black was worse here. ]

[Another recent idea is 21...h5!? , aiming to deflect the queen. A critical test must be 22.Qg3 Kf8 23.Nc2! *( 23.Nb1 Be5 24.f4 Bf6 25.Qf2?! Qb4!* gave Black good play in J.Koch-J. San Emeterio Cabanes, Le Port Marly 2009 *)* 23...Be5! *(*I much prefer this to *23...d4? 24.Qf4!* when Black's centre is a little shaky and *Qe5 25.Qxe5 Bxe5 26.Bc4 d3 27.Ne3* blockades the pawns with some advantage *)* 24.Qe3 Qd6 when it's again not so easy to prove that White is better. That said, I think that 25.Be2!? *( 25.f4 Bf6 26.Be2 d4* sees the pawns starting to roll *)* 25...Bxh2+ 26.Kh1 Bf4 27.Qh3 may do the trick: for example, Qf6 *( 27...d4!? 28.Bc4 Kg7 29.Kg1* isn't totally clear, but also looks better for White who has traded his h-pawn for some control *)* 28.Rd1 Be5 29.f4! exf3 30.Rxf3 , breaking up Black's centre with the upper hand. ]

**22.Nc2!**

[ The correspondence world has generally preferred 22.Nb1 , but Rg8! 23.Qh3 *(* probably *23.Be2!?* should be preferred *)* 23...Rb6! 24.Be2 Ba8 has been shown to give Black dangerous counterplay. ]

**22...Be5!**

[ The actual novelty! Previously 22...Bc3 23.Be2 d4 *( 23...Bxe1 24.Rxe1 Qe5 25.Rd1* gives White central control and more than enough for the exchange *)* 24.Bc4 Rg8 25.Qh5? *(* it's tempting to hit f7, but now Black has a resource *25.Qf4!* looks like a clear improvement, introducing possibilities of f6 and meeting *Bxe1?* with *26.Nxd4! )* 25...Bxe1 26.Rxe1 e3! 27.f3 Rg5! 28.Qxf7 Bxf3 29.Qxe7 Rxg2+ had forced a draw in Klatt-Pivinsky, correspondence 2008. ]

**23.Be2 d4 24.Bc4** Both sides have played pretty consistently since 15 Qh5 and we've undoubtedly reached a critical position. White is three pawns ahead and his queenside pawns should win in the long run, but before the endgame the Gods have, of course, placed the middlegame. Black's dynamic compensation - two powerful bishops, a strong, advanced centre and some attacking chances - looks rather attractive, but how much objective compensation it adds up to isn't clear. Shirov must have fancied his chances of successfully defending before the game, but even so I think that we still need more tests before an ultimate verdict can be reached.

**24...Rg8 25.Qh3 Rg7?!**

[ This was criticised by some commentators after the game. Fairly so I think, but I'm not so sure about their recommendation of 25...e3 . Carlsen must have looked long at this, but it's not hard to see why he was unkeen to commit his pawns so early. Indeed, after 26.g3 the tactics appear to favour White: Be4 *( 26...Bf6!?* may improve, although then the machine shows that if White is brave he can remain clearly on top with the critical *27.Qh6! Rb6 28.Nxe3 dxe3 29.Rxe3 Qd8 30.Bxf7 Bg5 31.Qe6 )* 27.Nxe3! dxe3 28.Rxe3 Bd4 (even this attempt to save material down the e-file doesn't wholly succeed) 29.Re2 Rbd8 30.Qh5 Rd7 31.Rfe1 Qc5 32.Rxe4 Bxf2+ 33.Kg2 Bxe1 34.Rxe1 and White's four extra pawns for the exchange surely supply a decisive advantage. ]

[ I wonder, though, if Black shouldn't have made a useful move, rather than hurry to double on the g-file. Indeed, a decent case can be made for 25...Rbd8! , after which 26.Rd1 (so that the d-pawn remains blockaded should the e-pawn roll) Rg5 27.g3 Qf6 makes it not so easy for White to co-ordinate his pieces, slow though Black might be to build up major threats on the kingside. ]

**26.g3 Rbg8?!**

[ Carlsen is dreaming of a sacrifice on g3, but I'm not sure this was best. Once again 26...Rd8!? deserves attention, and now 27.Qh6 can at least be repulsed by Rd6 . ]

**27.Qh6 Qc7??**

[ An unfortunate blunder. Evidently last-round nerves affect even the young! Black had to preserve his bishop with 27...Ba8 when everything would have remained to play for. White must tread carefully, but I'm far from convinced that Black has

enough for his three pawns: 28.a3! Rg5 *(* if this is best, it's clear that the rook should have gone straight to g5 Black might also try *28...Qd7* , but *29.Rd1* keeps White clearly on top *)* 29.Nb4 Rxf5 30.Nd5 and the knight's arrival on d5 spells trouble. ]

**28.Nb4** Exploiting Black's last and forcing the bishop to retreat in any case. **28...Ba8**
**29.Nd5** Naturally Black's centre will collapse if he has to exchange on d5, but that's going to happen in any case. Carlsen is totally bust. **29...Qd8**

[ The only way to at least prolong resistance was 29...Qd7 , although after 30.Nf6 Bxf6 31.Qxf6 Black is stymied in the centre and Shirov would surely have been up to the technical task. ]

**30.Rxe4** Not only is Black four (!) pawns in arrears, but something nasty is set to occur on the f6-square.

[Carlsen's invariable choice, but a respectable alternative is 11...0-0 12.Nc2 Rb8

13.h4 Be7 , as we've seen many times before on the site. **12.Nc2 0-0**

[Interesting Carlsen deviates from 12...Ne7 , his choice just three rounds before: 13.Ncb4 *(*Carlsen once lost to Leko after *13.h4* , but these days the long line *Bh6 14.a4 bxa4 15.Ncb4 0-0 16.Qxa4 a5 17.Bb5 Nxd5 18.Nxd5 Be6 19.Bc6 Rb8 20.b4 axb4 21.cxb4* and then *Kh8!* is just looking pretty drawish, as we saw in Grischuk-Illescas Cordoba last year more recently Radjabov held this without difficulty against Shirov at Bazna *)* 13...0-0 14.a4 bxa4 15.Qxa4 Nxd5 16.Nxd5 Bd7 17.Qc2 a5 18.Bc4 Rc8!? *(*this novelty is not the only decent defensive try Shariyazdanov's *18...Qb8 19.0-0 Rc8* being an alternative and quite possibly Black does best not to hurry with ...f5 *)* 19.Qe2 Kh8 20.0-0 f5 21.exf5! Bxf5 22.Bd3 Be6 23.Be4 and White was slightly for choice in Jakovenko-Carlsen, Dortmund 2009, although Black drew after an accurate defence. ]

**13.a4 bxa4 14.Rxa4 a5 15.Bc4 Bd7!?**

[And so it's back to this idea. Was Carlsen just trying to surprise Naiditsch or has he really found a way for White to press after 15...Rb8 16.b3 Kh8 17.Nce3 g6 18.h4 Bxh4 19.g3 ? At any rate, Black is yet to be dented here and he certainly drew comfortably in Karjakin-Ivanchuk, Nalchik 2009, as we've seen before. ]

**16.0-0**

[It might seem strange to leave the rook exposed, but it does currently block the a-pawn and practice has shown 16.Ra2 a4! 17.0-0 Na5 to be fine for Black. ]

**16...Ne7!**

[Best, as 16...Nb4 17.Ra3 Rc8 *(*it might not fully equalize, but Black could try the

more solid *17...Nxd5!? 18.Bxd5 Rb8 )* 18.cxb4! axb4 19.Ra6 Rxc4 20.Rxd6 b3 21.Nce3 gave White a pull back in Volokitin-Radjabov, Biel 2006, as previously explained by Tony. ]

**17.Ra2**

[ Not the only choice: 17.Ra3 Nxd5 *( 17...Rb8!?* may be a better bet *)* 18.Bxd5 Rb8 *(* one wonders if Carlsen might have tried *18...Rc8!?* here too *)* 19.b4 axb4 20.Nxb4 Qb6 21.Qe2 Bb5!? 22.Bc4 Rfc8 23.Bxb5 Qxb5 24.Qxb5 Rxb5 25.Rd1 g6 26.g3 Kg7 27.Nd5! saw White go on to grind out a win in Shirov-Topalov, Morelia 2008, but even at this point Black wasn't more than slightly worse. ]

**17...Nxd5**

[ Not the only acceptable course: 17...Rc8 18.Nxe7+ Qxe7 19.Bd5 Rc5! also worked out OK for Black in Anand-Radjabov, Mainz (rapid) 2006. ]

**18.Bxd5 Rc8** Now that the b-pawn is protected, there is less point in going to b8. Once again I think we can say that White has a nominal edge, but no more and, indeed, Carlsen must have felt in advance that he was unlikely to suffer much from here. **19.Qd3**

[ This logical move is technically a novelty: 19.Na3 a4 20.Re1 Kh8 21.Nc4 Bb5 22.Na3 Bd7 23.Nc4 Bb5 24.Ne3 g6 was also OK for Black in El Taher-Tissir Cairo 2001. ]

**19...Qb6** A good square for the queen, keeping White tied down to the defence of b2 and eyeing f2 as a target after arranging ...f5. **20.Rfa1** The rook had to move with 20...Bb5 threatened. **20...Kh8!**

[ Consistent and the simplest approach, whereas 20...a4 21.Nb4 g6 22.Qg3! might have given White a pull. ]

**21.Rxa5 f5**

[ I can't see too much wrong with the immediate 21...Qxb2 , but Carlsen's choice forces White to be a little careful. ]

**22.Qa6**

[ After 22.Ne3 fxe4 23.Bxe4 Bxe3 24.fxe3 Qxb2 25.c4 Black's active queen looks good, but once again this should just be a draw. ]

**22...Qxb2 23.R5a2 Qxc3 24.Qxd6 Bb5 25.Be6!** Good defence. White refuses to retreat his queen and prefers to force events. **25...Rfd8 26.Qa3 Qxa3 27.Nxa3 Rc1+ 28.Rxc1 Bxc1** It might initially appear that Black has seized the initiative, but Naiditsch has everything under control. **29.h4 Bd3 30.exf5 Ra8 31.Nb1 Rxa2 32.Bxa2** There's no point playing on the three vs. three. Quite a comfortable draw for Carlsen, and perhaps 11...Bg5 12 Nc2 0-0 followed by 15...Bd7 is just the easiest route to that result for Black.

**10.h4** A new move for our site. This time Andres deviates from the most challenging continuation in order to surprise his experienced opponent.

[ Robert Ris: 'The main move' 10.Qa4 Robert Ris: 'will be discussed in the next two games.' Bd7 11.Qb4 is covered in Caruana,F (2832) -Carlsen,M (2835) London 2018 [Roiz,M] ]

[ A typical idea in this opening, as White aims to prove the knight on g6 to be misplaced and force Black to spend more time manouevring with his knight. It should be understood that White has various moves at his disposal to complete his kingside development, but such a quiet handling of the position gives Black comfortable play. For instance 10.Be2 Be7 11.0-0 0-0 12.Be3 a6 13.Nc3 has been seen in a number of games. In this case the knight is quite useful on g6, preventing White from playing f2-f4 and ready to jump to a more active square. Black has potentially a very dangerous attack on the kingside starting with either ... f7-f5, mobilizing the central majority and the rook on f8, or the positionally desirable exchange of dark-squared bishops with ...Bg5. ]

The move h2-h3 doesn't appear to do very much, but the possibility of g2-g4 (or sometimes Ng4) does destabilise the black queen, who was otherwise sitting very comfortably on the f5-square." A sensible novelty. Black's queen does not have many squares available, therefore the idea of g2-g4 is quite annoying for him. From the psychological point of view this was another unpleasant surprise for Kramnik. In an already critical match situation he had to face another fresh opening idea from Anand's team.

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6** Nowadays this move is rarely to be seen in top tournaments. The usual choice is between 4...Bf5 and 4...Nd7. **5.Nc3 e5 6.Ndb5** As far as I know 6.c3 is considered to be the more precise move, not allowing Black to develop his bishop to g4 so easily. **6...d6 7.Bg5 a6** Nigel Short had already played this position many years ago. The move in the text is aimed at preventing the white bishop from being developed on f4, and at the same time preparing queenside castling. **8.Na3 b5 9.Nd5** Normally White doesn't hurry with this exchange. **9...Be7 10.Bxf6 Bxf6 11.c4 Nd4** Black has little to worry about, the position is about equal. **12.cxb5 Bb7 13.Bc4**

In the very first issue of our magazine we analyzed the sharp 13.Nxb5!? in the Sveshnikov. Theoretically speaking, this sacrifice shouldn't pose Black serious problems, but practice has shown on dozens of occasions that White's position is easier to play. White has some extra pawns to compensate for his material deficit, but more importantly Black finds it difficult to coordinate his forces efficiently. Although we're talking about a rapid game, the way Sveshnikov-expert Krasenkow gets outplayed may convince you to use this line as White yourself. The move 15... Rb8 has served Black quite well recently, but 19.0-0 is more critical than 19.Ng4 Bg5 20.h4 h5! when Black is alright. An improvement has to be found around move 19-20, since in the diagram position Black can't play 23... Rxb2 in view of 24. Qh3! The line

given is a perfect illustration of White's ability to generate new targets on both the queen- and kingside. This impressive performance by Azarov reminds us once again of the practical problems Black can face in the Sveshnikov. **23...h5**

**13.g3**

[Kamsky recently preferred the rather simplistic Rogozenco: 'The other way to develop pieces' 13.Be2 . I would say that this approach fails to impress, but then again he did defeat Ivanchuk (in Sochi) with it! That game continued Rogozenco: 'followed by 0-0 and Qd3 is preferred by Kamsky.' 0-0 14.0-0 Bg5 15.Qd3 Rb8 *(*slightly mysterious and this also deprives Black of the important regrouping plan ... [White's other 'lesser' alternative is Rogozenco: 'One year ago in the World Blitz

Championship the game between the same opponents continued' 13.Qf3 , after which

**A)** 13...Be7 is also possible, and after Rogozenco: '≥' Rogozenco, Dorian: '≥' '≥' '≥' 14.a3 bxa3 15.Qxa3 0-0 16.Bd3 Rb8 17.0-0 Be6 , as we've noted before, Black was fine in Ponomariov-Radjabov, Russian Team Championship2008;

I've since discovered that that game actually followed an impressively deep piece of analysis in 'The Easiest Sicilian' and when White even more recently preferred 15.c5? in Nestorovic-Filev, Struga 2008, he was lucky that Black wasn't au fait with Kolev's work. Here Qa5! simply costs White a pawn for very little compensation. ]

**14.h4!?**

[Something of a Morozevich favourite in this variation. The less challenging approach is 14.Bg2 and after Bg5 play has transposed to our last note. ]

**14...Be6**

[Black's mai n move, but I dare say that we will soon start to see tests of the active pawn sacrifice 14...a4!? (Kolev & Nedev). ]

**15.Bg2!?** Rogozenco: 'N' Rogozenco,Dorian: 'N' 'N' 'N' Rogozenco: 'Previously in this system h2-h4 has always been followed by Bh3. The pawn on h4 prevents Bf6-g5 and is a useful move in most cases anyway. '

[A new approach. Morozevich has no wish to follow in Nisipeanu's footsteps. As we saw last month, Rogozenco: 'A few months prior to the present game, after the standard' Rogozenco,Dorian: 'A few months prior to the present game, after the standard Rogozenco,D: 'For" 15.Bh3 Rogozenco: 'Shirov found a way to exploit

**12.Nc2** Game 33: 'White has forced Black into stabilizing the center and has brought his knight into play. From c2 the knight not only puts pressure on the b4 pawn but also prevents Black's knight from hopping into d4. This variation often takes on a positional nature, where White tries to make use of the d5 square and apply pressure along the d-file while Black searches for counterplay either on the queenside or through the use of his dark-squared bishop. While there are some nuances related to the move-order, our recommendation will be for White to fianchetto his bishop as soon as possible.' **12...0-0** The modern and most flexible move order. So too seems to be White's response and we soon reach something of a tabiya. The modern and most flexible move order. So too seems to be White's response and we soon reach something of a tabiya. Game 33: 'Arguably Black's most flexible move, as White cannot get away with capturing on b4. However, there are some independent options after Black's other main tries, 12...a5 considered here, and the option 12... b8 with coverage starting on .'

[ 12...a5 is perfectly logical, defending b4 while also setting up counterplay associated with a5-a4 in certain lines. 13.g3 If Black wants to post his bishop on the c1-h6 diagonal, he must play Bg5 now, as otherwise White will play h2-h4, restricting the bishop. 14.h4 This move is useful anyway, gaining a tempo in order to play Bh3. Bh6 15.Bh3! An ambitious positional idea, looking to trade light-squared bishops. After the trade we believe that White will be left with the superior pair of minor pieces. Black has played a number of moves here; we look at four possibilities: a)

**A)** b) 15...Be6 16.Bxe6 If Black were already castled this capture would be ludicrous, as White loses control over the d5-square, but here after fxe6 17.Qh5+ Kf8 18.Nde3 Qf6 19.0-0± White clearly has the initiative, and won convincingly in So-Dang, Vung Tàu 2008.;

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3**

[The old move, but 11.c4 b4 12.Nc2 remains a popular choice, as with that modern-day man of common sense, Fabiano Caruana. Indeed, Caruana-Van Wely, Wijk aan Zee 2014, continued 0-0 13.g3 Be6 14.h4 a5 15.Bh3 Rb8 *(*a new move for us I'm not sure why, though, the Dutch Grandmaster avoided Shirov's *15...a4!?* , which we've examined a few times before, such as in Nepomniachtchi-Ni Hua, Sochi 2009,*;* and there's also *15...Ra7* , as in Abdulla-M. Muzychuk, Warsaw 2013, where *16.Kf1 Bxd5 17.Qxd5 Qb6 18.Qd3 Qc5 19.Kg2 Bd8! 20.Rad1 Bb6 21.Rhf1 a4* gave Black comfortable equality *)* 16.Qd3 a4 17.b3! (stabilising the queenside) Bxd5 *( 17...Ra8!?* would lose time, but might be a better try: for example, *18.Rd1 Nd4!?* , and if *19.Nxd4 exd4 20.Nxf6+ Qxf6 21.Qxd4 Qf3 )* 18.cxd5 Na5 19.0-0 Qe8 20.Ne3 Bd8 21.Nf5 Rb6 when Black was very solid, but slightly worse due to his lack of counterplay and struggle to contest the c-file. ]

**11...Bg5 12.Nc2 0-0 13.a4 bxa4 14.Rxa4 Rb8!?**

[Long condemned by theory, but it's worth looking at this move since Moiseenko is hardly in the habit of playing anything unsound. That said, Black's main move does remain 14...a5 , and only if 15.Bc4 Rb8 . This has received a little coverage before, as in Zapata-Ramirez, Decameron 2003, which the Fed annotated back in the day. ]

**15.Ra2** The Russian Grandmaster elects to keep his b-pawn. This feels rather slow, though, so we should also consider:

[a) After 15.h4 Bh6 16.Bxa6 Rxb2 17.Bxc8 Qxc8 18.Rc4 "White is much better - he has sidelined the bishop, managed to exchange light-squared bishops, and can look forward to exchanging knights and dominating d5", as pointed out by John Cox in his fine 'Starting Out' work on the Sveshnikov. So what did Moiseenko have in mind here? ]

[I suspect the answer might be 15.h4 Bh6 16.Bxa6 Be6!? , offering a pawn to obtain some counterplay. In practice White has invariably responded with 17.b4 and after Ne7 18.Nce3 Bxe3 19.Nxe3 Qc7 20.Ra3 f5 21.exf5 Nxf5 22.Nxf5 Rxf5 23.Be2 Rf4 Black was eventually able to hold in J.Hess-Skripko, correspondence 2010. It still seems strange that Moiseenko would want to defend thus, so perhaps he had another idea in mind. Stay tuned to this column to find what! ]

[b) However, 15.Qa1 a5 16.Bc4 Kh8 17.0-0 f5 18.exf5 Bxf5 19.Nce3 Bg6 didn't promise White anything special in Tiviakov-Degraeve, Oakham 1992. ]

**15...Ne7!?** A novelty, but highly logical. The knight on d5 should be challenged. **16.Bc4**

[ Naturally Prizant had to avoid 16.Bxa6? Nxd5 17.exd5 *( 17.Qxd5? Be6* would be even worse *)* 17...Bxa6 18.Rxa6 Rxb2 . ]

**16...Nxd5 17.Bxd5 a5** Now the a-pawn is safe and Black's position pretty harmonious. **18.0-0 Kh8 19.Qe2 f5 20.exf5 Bxf5 21.Ne3 Bd7** This all feels very logical from both sides. Chances are roughly balanced, but I dare say that Moiseenko was happy with the unbalanced position considering the rating difference between the players. **22.Rd1**

[ White finds his queenside awkwardly clamped after this. As such, I would prefer 22.Nc4! Bb5 followed by 23.b3 *(*or even *23.Rfa1 a4 24.Rxa4!? Bxa4 25.Rxa4 . )*]

**22...a4! 23.Be4 Qb6** Continuing to improve the black position with strong, logical moves. Now White should have pushed his c-pawn, but instead Prizant blundered. **24.Bc2? Rxf2!!** Oops. Clearly the queen can't recapture, so White is forced to allow his king to become rather exposed. **25.Kxf2 Bxe3+ 26.Ke1**

[ The main point of Black's combination is revealed after 26.Qxe3 Rf8+ 27.Ke2 Bg4+ 28.Kd3 Qa5 when White lacks a good defence, as shown by 29.c4 *( 29.Kd2 Bxd1 30.Bxd1 Qd5+* picks up the loose rook *)* 29...e4+! 30.Qxe4 Bf5 . ]

**26...Rf8** Black may only have a pawn for the exchange, but it's obvious that White's king is far too exposed to have any realistic hopes of survival. **27.Rd3 Bf4 28.Rf3 Qg1+ 29.Qf1 Qxh2 30.Kd1**

[ It was grim, but the desperate 30.Rxa4 d5 31.Raxf4!? exf4 32.Kd2 may have been the last chance to offer any resistance. ]

**30...Bg4 31.Be4 d5!** Having accurately calculated the blow on f2, Moiseenko was never going to miss a little tactic like this. **32.Bxd5 Rd8 33.Rxa4 Rxd5+ 0-1**

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6** As we shall soon see, this is not a prelude to the Berlin variation, but an invitation to transpose to the Open variation. Usually, Carlsen employs the "normal" move order (3...a6, etc.) but in Corus Ivanchuk had surprised him with the exchange variation, which he plays only occasionally. Although the game ended in a draw, Carlsen seems to have had his reasons to avoid this course of events. Did he feel uncomfortable about the exchange variation, or did he just want to avoid early simplifications with an

increased probability of a draw?... **5.Nc3 e5 6.Ndb5** So, whatever Carlsen's thoughts had been, he guessed correctly that Ivanchuk was not going to allow the Open variation. **6...d6** Theory is not too well-settled in this variation. Black's position certainly looks dangerous and his move order at least provocative, but in practice things have been rather unclear. **7.Bg5 a6 8.Na3** A very rare move. Among other things, White threatens to win material with Qd3. After the present game, people may start asking themselves why this line was not tried more frequently... Black certainly needs to find a strong improvement somewhere. **8...b5!?N 9.Nd5 Be7** I am not entirely sure whether weakening the d3-square has improved Black's position that much, but according to Carlsen he was just improvising, not being able to remember "theory". **10.Bxf6** It looks logical to make use of this square that has just become available. **10...Bxf6 11.c3 Bg5 12.Nc2 0-0±** White has won material, "according to the plan", but he still faces some problems completing his development and getting out of the pin. **15.cxb4!?**

[ Critical. White wants to get a passed b-pawn. Instead practice has shown that 15.Nxb4 Bd7 16.Bxa6 Qa5 17.Qxd6 Rb6 18.Qd3 Be7 19.Nd5 Rxb2 20.0-0 Qc5 should be OK for Black. **15...0-0!?**

**17...Bd7!**

[ New. The much older 17...Bb7 18.Bc4 Kh8 19.0-0 f5 20.exf5 Rxf5 21.b4 Bxd5 (I would prefer to delay this) 22.Qxd5 axb4 23.Ra6! Be7 24.Rfa1 gave White a handy light-square bind for the pawn in P. Cramling-Tisdall, Gladsaxe 1983. ]

**18.Nc3** Not exactly ideal, but White had to defend the b5-pawn. **18...Qb6 19.Be2 Rbc8 20.0-0 Be6 21.Qd3**

[ I already quite like Black's harmonious set-up and perhaps it was already time for White to look for exchanges and a possible kingside diversion with 21.Bg4!? . ]

**21...Bd8!** Now ...Qc5 and ...Bb6 is the plan. Bacrot hurries to make an exchange on d5, but I can't but feel that he should have sat tight. The resulting opposite-coloured bishop position is not so easy for White to draw. **22.Nd5?! Bxd5 23.Qxd5 Rc2 24.Bc4 Rxb2 25.Ra2 Rb4! 26.Rd1 Qb8 27.Bf1?** Criticised by the players after

the game, but Black was already for preference thanks to his extra pawn and soon-to-be-activated bishop. **27...Bb6 28.Qxd6**

[Bacrot's play may appear a little compliant, but one can understand his reluctance to see his king's defences weakened by 28.g3 Bc5 29.Rxa5 (otherwise Black has simply consolidated his position) Bxf2+! 30.Kg2 Bd4 . ]

**28...Rxe4 29.Qxb8 Rxb8 30.g3 Kf8 31.Rd6 Rd4 32.Rc6 Ke7** Black's active king and the presence of both pairs of rooks ensure that Radjabov has decent winning chances. **33.Kg2 Rd6 34.Rac2 Rbd8 35.Bc4 f5 36.Kf1**

[I'm far from certain that White is right to have his passed pawn transferred to a more advanced square, tempting though it looks. Indeed, a decent case can be made for 36.Bb3!? followed by simply waiting and meeting Rxc6 with 37.Rxc6 . ]

**36...Rxc6 37.bxc6 Kd6 38.Ke2 g6 39.h3 Kc7 40.g4!** Reasonable defence. White must try to weaken Black's structure. **40...e4**

[Radjabov plays it safe on move 40, but quite possibly 40...fxg4!? 41.hxg4 a4 was also good enough since then Black can always generate a passed h-pawn. ]

**41.f3 Rd4 42.gxf5 gxf5 43.Bg8 Rd3 44.fxe4 Rg3!** The best try. As usual, it's the total number of passed pawns, not extra pawns, which will decide this opposite-coloured bishop endgame. **45.Bd5!**

[Correctly avoiding 45.Bxh7 f4 when White cannot halt both Black's pawns: for example, 46.Kd2 f3 47.Rc1 f2 48.Rf1 Kxc6 and the a-pawn will advance. ]

**45...f4 46.e5 Re3+ 47.Kf1 f3!?**

[Radjabov is a far stronger player than I, but did 47...Rxe5 have to be rejected? After 48.Bf3 a4 49.Rc3 Black might well transfer his rook behind the a-pawn, but Re3 also seems possible: 50.Rxe3 Bxe3 51.Bd5 a3 52.Ke2 Kd6 53.Ba2 Kxc6 54.Kd3 Kc5 55.Bg8 Kb4 isn't a draw since White cannot keep the opposition king out, as shown by the line 56.Ba2 Bc1 57.Bd5 f3 58.Ba2 f2 59.Ke2 Be3 60.Bg8 Kc3 . ]

**48.Rd2 Rc3! 49.Rd1 Rc2** White's king is under some pressure and it seems that he can no longer resist. **50.e6 Rg2 51.Ke1 Rg1+ 52.Kd2 f2 53.Bc4 Kxc6 54.Ke2 Bc5 55.Bb3 Rg5 56.Kf1 Re5 57.Ba4+ Kb6 58.Bb3 h6 59.Kg2?**

[Faced with some fine technique from the Azeri, Bacrot completely collapses. However, even the stouter 59.Rb1 Kc7 60.Rc1 Kd6 61.Rd1+ Ke7 62.Rc1 Rg5 63.Ke2 wouldn't have saved White, as shown by the plausible line Rg1 64.Rd1 Bd4 65.Rf1 Rg3 . 66.Rd1 Rxb3 67.Rxd4 Rb4 68.Rd2 Rf4 69.Kf1 Kxe6 and the rook ending is winning. ]

[The assumption is that Black should prevent 7 Nd6+, which is advice I have ignored for 20+ years! **7...a6 8.Na3 b5 9.Nd5** Cyrus Lakdawala: 'This is White's strategic line and, from my observation at club level, White's most popular choice, since it's relatively safe

**13...bxa4 14.Rxa4 a5 15.Bc4**

[ 15.Bb5 has been played but is illogical to my mind for two reasons: -- 1. The fight is for d5, so White's light-squared bishop belongs on c4, not b5. -- 2. With 15 Bb5, White chases the knight to exactly where it wants to go (e7) to challenge White's d5-knight. --- Play can continue Ne7 16.Ncb4 (White takes advantage of the pinned a8-rook) Bh3 17.Nxe7+ Qxe7 18.Bc6 , O.Korneev-A. Shirov, Pamplona 2006 *( 18.Nd5 Qb7 19.Bc4 Bd7* is equal *)* . The game is dynamically balanced after 18...Bxg2 19.Rg1 Rac8 20.Rxa5 Bh3 21.Qh5 Bh4! 22.Nd5 Qd8 23.Qh6 g6 24.Ra6 Be6 . ]

Do we want to back it up with ...g7-g6 and then ...f7-f5 - ? -- 2. Do we want to play f5-f5 without ...g7-g6 - ? If so, then White will play e4xf5 and may try and utilize the newly-created hole on e4.' **17.Nce3**

**17...g6** Cyrus Lakdawala: '!?' '!?' Cyrus Lakdawala: 'This is one of the most important tabiyas in the book. The plan is to play ...f7-f5 and, if White plays e4xf5, Black recaptures with the g6-pawn. This is Black's main line, which allows White a dangerous and completely sound pawn sacrifice. The positions go haywire and are probably the most baffling in the entire book.'

[If the thought of entry into such craziness gives you pause, then try the far safer idea 17...Be6 , which is covered later in the chapter. The move avoids the

weakening (or dynamic) ... g7-g6 and sidesteps White's h2-h4 pawn sacrifice. ]

**18.Qe2**

[ Anand's move. **18...f5**

[Shirov remains true to his earlier choice, although as I pointed out in my notes to Anand-Shirov, 18...Ne7!? is also possible, since 19.Nxe7 Bxe7 20.Nd5 Bg5 21.0-0 Bd7 22.Ra3 f5 doesn't seem too bad for Black. ]

**19.h4** Cyrus Lakdawala: 'The only move. As already emphasized, the h2-h4 pawn sacrifices are one of Black's biggest challenges.'

[ 19.exf5?! has been tried twice, with two losses for White. After gxf5 20.0-0!? *(*I would play *20.f3 )* 20...f4 21.Nc2 f3! White's king is under assault and unlikely to survive, S.Novikov-R.Pommrich, correspondence 2010. ]

**19...Bxe3 20.Qxe3 f4!** Cyrus Lakdawala: 'This way Black clogs lines and his king is far safer than in the 18 h4 lines.'

[A novelty. I suspect that Shirov discovered this soon after his loss to Anand, although it's possible that he found it in 'The Sharpest Sicilian'. In any case it certainly improves over 20...fxe4?! 21.h5! with some pressure for White in Anand-Shirov, Linares 2008. ]

**21.Qd2**

[Not the only square for the queen. **22.Ra1** Cyrus Lakdawala: 'White is rightfully anxious about knight discoveries.'

[ 22.h5 is well met by g5 . ]

**22...Be6** Cyrus Lakdawala: 'White is confronted with a problem - where he should

place his king. GM Volokitin decides to walk across to the queenside. I already think Black is doing well, with equality at a minimum.' **23.Kd1?!** Cyrus Lakdawala: '!?' '!?' Cyrus Lakdawala: 'The king will not find safety on the queenside.'

[This all feels a little slow from Volokitin. Indeed, I believe that attempts to open the kingside with g3 ideas must be more critical than the course of the game, even if they may not objectively favour White. Should this position be reached again, perhaps we will see White trying to make g3 work somewhere or here Cyrus Lakdawala: 'However,' 23.h5!? being tested. Cyrus Lakdawala: 'is no improvement as after' g5 24.Qd3 g4 White's artificially isolated h-pawn may later be picked off if pieces begin to come off the board, N.Pascual Perez-E. Kopasov, correspondence 2009. ]

**23...Ne7** Cyrus Lakdawala: '!' '!' Cyrus Lakdawala: 'Black's strategy remains the same as always - challenge d5. I already prefer Black, whose king safety supersedes his wobbly structure.' **24.Kc2**

[Now 24.h5!? gxh5! *(*better than blocking with *24...g5* , since *25.Kc2 Nxd5 26.Bxd5 Bxd5 27.Qxd5 Qb6 28.Rhf1 Rfc8 29.Qe6* gives White a somewhat superior version of the game *)* 25.Kc2 Bf7 would have left Black a pawn ahead, although this was quite possibly a better choice than Volokitin's slow king manoeuvre, and one which doesn't really even bring his king to safety. ]

[After 24.Nxe7? Qxe7 White has trouble defending b3. For example, 25.Bd5 Rfc8 26.Kc2 Bxd5 27.Qxd5 Rc5 and White's king is in danger. ]

**24...Nxd5!** Simple and good chess. The resulting major piece middlegame will be favourable for Black thanks to his safer king. **25.Bxd5**

[Black would have been pressing too after 25.exd5!? Bf5+ 26.Kd1 Qb6 , but at least with his bishop still on c4, White would have been able to hold his queenside together for a while (...Bd7, ...Rfc8 and ...a4 is, though, a long-term plan to force open lines). ]

**25...Bxd5 26.Qxd5 Qb6** Cyrus Lakdawala: 'Black eyes up b2 and f2. Notice how Black isn't tied down to defence of either the a5- or d6-pawns, since his threats against White's king takes precedence. We see this phenomenon over and over in the Sveshnikov, where our pawns are weak/not weak, since White lacks the time and resources to actually capture them.' **27.Rhf1 Rfc8 28.Ra4?** Cyrus Lakdawala: 'When on defence the natural tendency is to flinch at every shadow. Passive defence is not White's best path.'

[A natural-enough move, but now White runs into some trouble. I would rather be Black after 28.Kb2 Rc5 29.Qe6 , but this was a somewhat superior try when I am persuaded by the machine that White wouldn't have been more than a little worse. ]

[White may just barely hold the game with the radical 28.Rfd1! Qxf2+ 29.Rd2 Qe3 30.Rd3 Qb6 31.Rxa5 Qf2+ 32.Rd2 Qe3 33.Rd3 with a likely repetition draw. ]

**28...Rc5**

[ 28...Kg7 is slightly more accurate. ]

**29.Qe6** Cyrus Lakdawala: 'White should hold the game due to Black's exposed king.'
**29...Rc7 30.Qd5** Cyrus Lakdawala: '?!' '?!' Cyrus Lakdawala: 'Principle: Passivity is death in major piece endings.'

[Easy to criticise, but White was already somewhat worse. Volokitin no doubt wanted to open the kingside with 30.g3? , but after fxg3 31.fxg3 *( 31.Qf6+ Kg8 32.Qe6+ Kg7 33.fxg3 Rxc3+!* changes little *)* 31...Rxc3+! 32.Kxc3 Qe3+ 33.Kb2 Qe2+ Black would have regained his rook with some interest. ]

[Another kingside try is 30.Qf6+ Kg8 31.Qe6+ Kg7 32.h5 , but the cold-blooded gxh5! repels it. ]

[White should activate the sleeping f1-rook with 30.Rd1! Qxf2+ 31.Rd2 Qe3 32.Qf6+ Kg8 33.Qe6+ Kg7 34.Rc4! Rxc4 35.Qe7+ , when White's queen delivers perpetual check. ]

**30...Rbc8** Cyrus Lakdawala: '!' '!' Cyrus Lakdawala: 'Now White is in deep trouble.'
**31.Qxa5** Cyrus Lakdawala: '?!' '?!' Cyrus Lakdawala: 'This compounds the problem.'

[Quite possibly already low on time, Volokitin simplifies to a rather unpleasant ending due to Black's somewhat more active rooks. However, neither would 31.Qd3 have helped on account of Rb7 32.c4 Rcb8 when either b3 falls or Black breaks through with 33.Ra3 *( 33.Rd1 Qxf2+ 34.Rd2 Qb6 35.Ra3 Rd7* Black has winning chances. *)* 33...Qc5 34.Kb2 a4 . ]

[ 31.c4 is better, though after Rb8 32.Qd3 ]

**31...Qxa5**

[Also strong is 31...Rxc3+! 32.Qxc3 Rxc3+ 33.Kxc3 Qb5 34.Rc4 Qa5+ 35.Kb2 Qd2+ 36.Rc2 Qd4+ 37.Kb1 Qxe4 38.Rd1 d5 . It's one of the great joys to push the d-pawn to the fifth rank. White is unable to hold the game due to Black's surging central pawns. ]

**32.Rxa5 Rxc3+ 33.Kb2 Kg7!** Rather than go straight after White's vulnerable pawns, Shirov first activates his king ...Kh6-h5xh4 will be a handy resource in many lines. **34.Rd1?!**

[The resulting simplification is favourable for Black, but White's cause wasn't pleasant. Passive defence had to be the order of the day, but after Cyrus Lakdawala: 'After' 34.Ra7+ Kh6 35.Ka3 *( 35.g4 fxg3 36.fxg3 Rxg3 37.Rff7 Rh8 38.b4 Rg4 39.Kc3 Rxe4 40.b5 d5 41.b6 Rc4+ 42.Kd3 Rb4 43.Rab7 Rxh4 44.Rfe7 Rd4+ 45.Ke3 Re4+ 46.Kd3 Rc8 47.Rxh7+ Kg5* , White's b-pawn isn't getting through, since his rook is in front of the pawn. *)* 35...Rd3 36.f3 Rc2 White's position would have remained rather unpleasant for example, 37.Rg1 Rdd2 38.Rd7 Ra2+ 39.Kb4 Rxg2 40.Rxg2 Rxg2 41.Rxd6 Kh5 and Black has decent winning chances. ]

**34...Rc2+ 35.Ka3 Rxf2 36.Rxd6 Rc7 37.Rxe5 Rxg2** Cyrus Lakdawala: 'Our destination seems far away when we are exhausted. White's rooks are out of alignment to halt the push of the f-pawn and everything about Black's position suggests imminent death.' **38.Ree6**

[I suspect that White might have lost on time here, since he would still have had a few chances to resist after Cyrus Lakdawala: 'After' 38.Ree6 f3 *(*the materialistic

European Team Championship, Crete (5) 01.11.2007

*[Richard Palliser]*

[The most principled response, but a popular alternative is 11...Bb7 , as played in Morozevich-Radjabov, European Club Cup, Kemer 2007! Morozevich pressed by combining an assault on Black's advanced queenside pawns with a c5-break, but Radjabov held firm to

eventually hold. ]

**12.exd5**

[ Morozevich isn't interested in giving Black any dynamic possibilities with an exchange on f6, but 12.Bxf6 gxf6 has also been seen when 13.c3 *( 13.exd5 Qxd5* saw White eventually triumph in Naiditsch-Nataf, Kemer 2007, and we must hope that the full score to this game becomes available *)* 13...Rg8 14.g3 was covered by the Fed in Grosar-Podlesnik, Bled 1999. ]

**12...Qxd5 13.Qd2 Ne4**

[ Depriving White of the bishop-pair. Black can also play to keep the a3-knight out of play after 13...Bf5!? and 14.0-0-0 Bxd3 15.Bxf6 gxf6 16.Qxd3 0-0-0 17.Qh3+ Qe6 was fine for him in Perez Candelario-Smirnov, Kemer 2007. ]

**14.Qe3 Nxg5 15.Qxg5 Qc5 16.0-0-0!** Played not to mate Black, but rather so White's king will be well placed to support his queenside majority in an ending.

**16...0-0 17.Rhe1 f6 18.Qe3 Qxe3+ 19.Rxe3 Be6** Perhaps White has a tiny edge here due to his queenside majority, which his knight may actually turn out to be well placed to support, but it's still a surprise that Radjabov didn't hold this. **20.Be4 Rad8 21.Rxd8 Rxd8 22.b3 Kf7** Natural enough, if not enough to fully equalize. The alternatives included:

[ a) 22...b4!? 23.Nc4 Bxc4 24.bxc4 Rd4 25.Bd3 Kf7 26.Kb2 a5 27.c3 bxc3+ 28.Kxc3 Ke6 when White has a passed c-pawn and a bishop, but Black is very solid and enjoys good blockading chances. ]

[ b) 22...f5!? 23.Rd3 Rxd3 24.Bxd3 e4 25.Be2 Nd5 26.c4 Nf4 27.Bf1 bxc4 28.Nxc4 Kf7 is similar to the game, albeit a little more critical, and I think that Black should be able to hold this: his king is quick to centralise and his a-pawn not at all easy for White to win. ]

**23.Rd3 Rxd3 24.Bxd3 f5 25.c4! b4!?**

[ Fixing White's queenside pawns on the same colour as the bishops makes positional sense in general, but this costs time and Black's own queenside pawns will prove vulnerable to White's king and knight. Perhaps better was 25...e4 26.Bf1 bxc4 27.Nxc4 Nd5 28.Kd2 Ke7 29.Ne3 Nc7 with good chances to hold. ]

**26.Nc2 e4 27.Be2 a5 28.f4! exf3**

[ Now White has a definite if small pull in view of his superior bishop. One can understand why Radjabov didn't want to see his pawns fixed, but after 28...Nc6!? 29.Kd2 Ke7 30.c5 Kd7 31.Ke3 White is still some way from making any progress *(* or *31.Bb5 Kc7 32.Ke3 Ne7 33.Nd4 Bf7* and the threatened check on d5 drives White back. *)*]

**29.Bxf3 g5 30.Kd2 Kf6 31.Nd4 Bc8 32.Ba8!** The safest square for the bishop on the diagonal and one which prepares a timely Nc6 a resource which I suspect that Radjabov underestimated. **32...h6 33.Kd3 f4!**

[ White's king couldn't be kept out in any case because 33...Ke5 34.Nf3+ Kd6 35.Kd4 sees it heading forwards since Nc6+? loses a pawn after 36.Bxc6 Kxc6 37.Ne5+ Kc7 38.Nf7 . ]

**34.Ke4 h5 35.c5 h4** Textbook pawn play from Radjabov, but the dynamic features

of this position are at least as important as the static ones. **36.h3 Ba6 37.Nc6! Bf1**
[ The bishop ending looks at first like it should favour Black, but we must not forget about White's active king and passed c-pawn. A decent alternative was 37...Nf5!? 38.Kf3 Bd3 when White doesn't seem to be able to force his c-pawn home and Black should hold after 39.Nxa5 Nd4+ 40.Kf2 Bb1 . ]
**38.Kf3 Nxc6 39.Bxc6 Ke5 40.Kg4 Kd4!?**
[ Ambitious, but no doubt Radjabov had nowhere near sufficient time to play this tricky bishop ending. Much simpler was 40...Kf6 when Black should hold without too much trouble. One try is 41.Bf3 Bd3 42.Kh5 , but after Bb1! 43.c6 Ke6 44.Kxg5 Bxa2 45.Bd1 a4 46.bxa4 b3 47.Kxf4 b2 48.Bc2 b1Q 49.Bxb1 Bxb1 50.Kg4 Be4 Black draws easily because White has too many pawns on light squares. ]
**41.Kxg5 Kxc5 42.Bf3 a4**
[ Now Black loses time with his king, not that this is fatal. Another defence was 42...Bd3!? 43.Kxh4 Bb1 44.Kg5 Bxa2 45.Bd1 a4 when Black draws because 46.bxa4 b3 47.Kxf4 b2 48.Bc2 Kb4 forces 49.a5 *(*rather than *49.h4?? Kc3 50.Be4 Bb3 51.a5 Bc2 . )*]
**43.bxa4 Bc4 44.a5 Bxa2 45.a6!** Forcing Black to lose some time, although Radjabov should still be able to hold. **45...Kb6 46.Kxh4 Kxa6 47.Kg5 Kb6?**
[ Radjabov has already made things difficult for himself, but I think that he could still have held with 47...b3! 48.Bd5 Kb5 , with the idea of 49.Kxf4 Kb4 50.h4 Ka3 51.h5 b2 52.Be4 Bd5! followed by constantly hassling White's bishop. ]
**48.Kxf4 Kc5 49.Ke5!** Shouldering away the black king and winning. **49...Bb1**
[ Black's problems are revealed by the variation 49...b3 50.Be4 b2 51.g4 b1Q 52.Bxb1 Bxb1 53.h4 when he is helpless against the advance of the kingside pawns. ]
**50.Bd5 Bc2 51.h4 Bd1 52.Bf7** Unable to get back with his king, Radjabov realised that there was no point in continuing. A pretty complex ending and a reminder that general rules (in this case, the common adage that pawns belong on the opposite colour to the same-coloured bishops) will only get you so far.

[ 11.c4 f5 offers Black rich play, as we can see in Maliskauskas, V (2483) - Shirov, A (2719) / Amplico Life rapid, Warsaw 2009 [Richard Palliser] ]

**11...Ne7 12.Nxe7 Qxe7 13.0-0 0-0 14.c4 f5 15.Qf3 Qb7** This theoretical position was explored on our site before. **16.Rfd1!?** GM Kokarev deviates from his preceding game and introduces an interesting novelty.

[ 16.Qe2 b4 *( 16...d5!? 17.cxd5 fxe4 18.Bxe4 f5 19.Bc2 Qb6 20.Rac1 Qd6⩱* Kurnosov, I -Maletin, P /Apatity 2011 *)* 17.Nc2 f4 18.b3 Be6 19.Qd2 Rfb8 was OK for Black in Nakamura, H (2759)-Radjabov, T (2773)/ Wijk aan Zee 2012 [Richard Palliser] was OK for Black ]

[ Nothing special is also promised by 16.exf5 as was played by Dmitry earlier Qxf3 17.gxf3 e4! 18.Bxe4 d5! 19.Bxd5 Rb8 20.Rab1 Bxf5 21.Be4 Bh3 22.Rfe1 Kh8! Black had sufficient counter-play in Kokarev, D (2596)-Yakovich, Y (2539)/ Samara 2011 ]

**16...b4?!** Shariyazdanov's response looks natural, since the position is similar to that we have seen in the above-mentioned game Nakamura-Radjabov. However, here White's setup is better prepared for the arising closed type of position.

[ It looks like 16...Bd7! keeping the tension and connecting the rooks offers Black adequate play. For instance, 17.exf5 *( 17.Nc2 d5! 18.cxd5 fxe4 19.Qxe4 f5⩱* Black gets rich counterplay.*; 17.Qe2 d5 18.cxd5 fxe4 19.Bxe4 f5 20.Bc2 Kh8⩱ )* 17...Qxf3 18.gxf3 e4 19.Bxe4 Bxb2 20.Rxd6 Bxf5 21.Bxa8 Rxa8 22.Rad1 Bxa3 23.Rd8+ Rxd8 24.Rxd8+ Kg7 25.cxb5 axb5 26.Rd5= ]

**17.Nc2 f4** This advance is practically forced, since the appearance of White's knight on d5 would be very unpleasant. **18.Be2!** This is the point! White is ready to put strong pressure along the d-file, so Black's position is becoming quite passive.

**18...Rd8**

[ 18...Qb6 19.a3! bxa3 20.Qxa3 Rb8 21.b4 Bb7 22.Qd3± Black suffers from weak q-side pawns. ]

**19.b3** This patient move is the most unpleasant for Black.

[ Now 19.a3 seems less promising, since bxa3 20.Qxa3 Rb8 yields Black decent counter-play along the b-file: 21.Rxd6 Rxd6 22.Qxd6 Qxb2 White has nothing better than forcing a draw by means of 23.Qd8+ Bf8 24.Qg5+ Bg7= ]

**19...Be6**

[ 19...Qb6 making the b7-spot vacant for the bishop has some drawbacks as well: 20.Rd2 Bb7 21.Qd3 a5 22.Bg4± ]

**20.Rd2** Black's position is rather solid, but it lacks any active plan. **20...Kh8**

[ 20...a5 21.Rad1 Bf8 22.Qh5 Kh8 23.g3± ]

**21.Rad1 a5**

[ An interesting attempt to activate the pieces at the cost of a pawn was: 21...Bf6 22.Rxd6 *(* The following positional approach: *22.Ne3!? Rg8 23.Nf5* also looks promising. *)* 22...Rxd6 23.Rxd6 Be7 24.Rd1 Rg8 25.Ne1± , but White's chances seem preferable here. ]

**22.Qd3** Dmitry doesn't want to change the character of the play, so he avoids grabbing a pawn.

[ 22.Rxd6 Rxd6 23.Rxd6 Bf8 24.Rd1 Be7 25.Ne1 Rg8± ]

**22...Bf6 23.Bf3** White is ready to complete his harmonious setup by means of 24.

Qe2. **23...Rd7?** A tactical blunder, which invites a lot of trouble.
[ After 23...Qb6 24.Qe2 Be7 25.Bg4 Rg8 26.Bxe6 fxe6 27.Ne1 Rg7 28.Kh1 Rag8 29.Qf1 Qc7± White's position is preferable, but it's very hard to make real progress. ]
**24.Nd4!** A nice little tactic, which allows White to put strong pressure on the light squares. **24...Rdd8?** Mistakes rarely come alone, and GM Shariyazdanov now commits the decisive one.
[ It was necessary to cover the g4-spot by means of: 24...Rg8 25.Nxe6 fxe6 26.Qe2 Be7 27.Bg4 Rg6 Black's position is very unpleasant, but the game goes on. For instance, 28.c5 Qc7 29.Bh5 Rh6 30.cxd6 Rxd6 31.Rxd6 Bxd6 32.Qb5± ]
**25.Nxe6 fxe6 26.Bg4** Surprisingly, there in no way to keep the material balance now. **26...Re8**
[ 26...Qe7 27.Qh3+- ]
**27.Qh3 Qe7 28.c5!+-** GM Kokarev chooses the most effective way - White manages to win a pawn and avoid any exchanges.
[ Good enough was also 28.Rxd6 Rad8 29.Rxd8 Rxd8 30.Rxd8+ Qxd8 31.Qh6 Qe7 32.Bxe6+- but it still would take a long time to make progress here. ]
**28...d5 29.exd5 e4** A desperate attempt to complicate matters.
[ 29...Qxc5 30.dxe6 Qf8 31.Bf5 Re7 32.Rd7+- ]
**30.d6** White's passers easily decide the game.
[ Possible was also 30.dxe6 Qg7 31.Rd7 Re7 32.c6+- ]
**30...Qd7 31.Rc2**
[ 31.c6 Qxc6 32.Bxe6+- ]
**31...Rac8**
[ Or 31...Bc3 32.Rxc3 bxc3 33.Qxc3+ Qg7 34.Qxg7+ Kxg7 35.c6+- ]
**32.Rc4 Rc6 33.Qh6 Qg7 34.Qxf4** A convincing victory!

Marshall-Attack-like compensation for the pawn. His strong pair of bishops as well as White's delay in development make the small material defficit rather insignifiant. **14.Rxa4 a5!?** A theoretical refinment. As John Emms puts it so well in the new edition of his 'Starting Out: The Sicilian': "On the other hand, in contrast to 11 c3 the positions tend to become quite blocked and there is more focus on slow manoeuvring - something that might not appeal to every tactic-hungry Sveshnikov player." **11...b4 12.Nc2 0-0!**

**13...a5 14.g3**

[ In the subsequent blitz event, Nepomniachtchi preferred 14.Qf3 , but Be6 15.Rd1 Be7 16.Bd3 a4! (a nice way to make White wish he'd teamed up h4 with g3) 17.b3 *( 17.Ncxb4 Nxb4 18.Nxb4 Bxh4 19.Qh5? **14...Be6**

[ This remains popular, although I'm far from sure why Black has generally eschewed Kolev and Nedev's active idea of 14...a4!? . ]

**15.Bh3**

[ Previously we've also considered 15.Bg2 g6! 16.Nxf6+ Qxf6 17.b3 a4 , which gave Black decent counterplay in Morozevich-Shirov, Moscow 2008. ]

**15...a4!** Another active and effective idea emanating from Shirov. **16.b3**

[ This novelty does little to dent the notion that 15...a4 completely solves Black's problems. Instead the stem game saw 16.Ncxb4 Nxb4 17.Bxe6 fxe6 18.Nxb4 Qb6 19.Qd2 Be7! and Black enjoyed excellent play for his pawn in Nisipeanu-Shirov, Foros 2008 - see the Archive. ]

**16...Bxd5**

[ Might the immediate 16...Nd4!? have been even stronger? Certainly after 17.Nxd4 exd4 18.Nxf6+?! *( 18.Rc1!* should enable White to maintain a rough balance *)* 18...Qxf6 19.Bxe6 fxe6 20.0-0 axb3 21.axb3 Ra3 Black can be happy to have begun to invade down the a-file. ]

**17.cxd5 Nd4 18.Nxd4 exd4 19.0-0 Re8** Taking stock we can see that Ni Hua has emerged from the opening with comfortable equality. Black's bishop is no worse than White's and he is very active on the queenside. **20.bxa4!** The young Russian takes the sensible decision to play for exchanges and head for a draw. **20...Rxe4 21.Rc1 Re8**

[ Preventing Bd7 ideas with 21...Re7! would have been a touch more precise. ]

**22.Rc4 d3!** Black insists on picking up the a4-pawn without moving his queen to a5 and so allowing Bd7. **23.Qxd3 Rxa4 24.Rfc1**

[ Perhaps White might have tried 24.Qb3!? , although after Qa8! 25.Rfc1 Rxa2 26.Rc8 Ra1 a draw could have been agreed in any case. ]

**24...Ra3 25.Qc2 Bc3 26.Rc8 Qe7 27.Rxe8+ Qxe8 28.Bf1 g6**

[ Now White sets up a blockade by bringing his bishop to c4. Ni Hua might, though, have pressed with 28...Qe5!? , although after 29.Bg2 *( 29.Bc4? Bd4* creates some nasty threats *)* 29...g6 30.Rd1 I dare say that White should be able to hold in any case. ]

[Black might prefer to play more solidly a la Khalifman and along the lines of how he meets the immediate 14 Nce3: i.e. 16...Qd7 17.Bd3 Bd8 18.Kf1 Ne7 which seemed acceptable enough for him in Hirneise-Behm, Balingen 2006. ]
[However, Karjakin would no doubt have met 16...Qd7 with 17.a4! b4 18.Bb5 , retaining the upper hand. ]
**17.a4!** Despite the loss of tempo, this is the only way to trouble Black. Yet again we can see the presence of a major piece on the a4-e8 diagonal causing problems for Black. No doubt the Sveshnikov theoreticians will try to avoid placing one there as they look for ways to make this line fully viable. **17...b4**
[I wonder if a case might not be made for the solid 17...Na7!? , intending 18.axb5 Nxb5 19.Bc4 Nc7 . This might not look especially Shirovian, but neither is the game. ]
**18.Bb5 Bd7 19.0-0 bxc3 20.bxc3 Bf8** Presumably the point of 16...Re8, but there can be little doubt that White's light-squared grip gives him a rather pleasant advantage. Karjakin is now quick to make use of the open queenside files. **21.Qd3 Na7?**
[Shirov really wasn't having a good day. Simplifying the position merely helps White and Black had to maintain tension, forcing White to work on opening the queenside after 21...g6 , although something like 22.Kg2 Bg7 23.Rfb1

, followed by doubling on the b-file is a simple and good start. ]
**22.Bxd7 Qxd7 23.Qa6! Nc6 24.Rab1** Now Black is rather devoid of a good move, due in no small part to his bad bishop and lack of counterplay. **14...0-0 15.Bg2 f5 16.0-0 a5 17.Re1**

[Black's last was far from forced, but evidently Krasenkow doesn't fear 17.Nf4 and with good enough reason: exf4 18.Bxc6 Rc8 19.Bd5 Bf7 20.a3 *(*trying to avoid *20.Qd3 b4 )* 20...Be5 should be OK for Black who has sufficient potential counterplay on both flanks. ]

[Instead, we've previously noted that after 17.Qh5 b4 18.Nce3 Black should hold back on the exchange on c3 in favour of Rb8 . ]

**17...Rc8 18.Re2!?** A new move in over-the-board play in this tabiya, although White has scored +1 =7 -0 with it in correspondence. The alternatives:

[a) 18.Nce3 Kh8 *(*I still prefer my earlier suggestion of *18...f4;* or even *18...b4!? )* 19.Qh5 b4 20.Rad1 bxc3 21.bxc3 Ne7 22.c4! was a little better for White in Ivanchuk-Radjabov, Morelia/Linares 2008. ]

[b) 18.Na3 Na7 19.Qd2 e4 20.Rad1 Be5! seemed fine for Black in Ivanchuk-Leko, Monaco (rapid) 2001, and the Hungarian no.1 went on to win, as can be seen in the Archive. ]

[c) 18.Qd2 Kh8 19.Rad1 e4 20.f4 is a logical blockading concept, but not one which Black should fear as he is active enough: b4! 21.Nce3 *( 21.cxb4 Bxd5 22.Qxd5 Nxb4 23.Nxb4 Qb6+* regains the pawn *)* 21...bxc3 22.bxc3 a4 23.g4!? fxg4 24.Bxe4 Ne7 left White in danger of finding himself overextended in Svidler-Filippov, Kazan 1995. ]

**18...b4!**

[Offering a pawn to get on with things and stay active. Instead, 18...Bh6 19.a4 b4?! 20.cxb4 axb4 21.Ndxb4 Nxb4 22.Nxb4 e4 23.a5! was a far worse way of giving up a pawn in Chovanec-Boecher, correspondence 2007, as the a-pawn is pretty irritating, ]

[but 18...Kh8 19.Rd2 f4 20.Be4 Bh6 21.Qh5 Qg5 wasn't too awful for Black in Ghyssens-Schuster, correspondence 2008. ]

**19.cxb4 axb4 20.Ndxb4**

[White doesn't have to take, but 20.Rd2 e4 doesn't seem to be anything for him, as shown by 21.Nf4 *( 21.Ncxb4 Nxb4 22.Nxb4 Qb6 23.Rxd6 Qxb4 24.Rxe6 Qxb2 25.Rb1 Qxa2* is rather likely to land up in a split point *)* 21...Bf7 22.Ne3 Qf6 23.Nh5 Bxh5 24.Qxh5 Kh8 25.Rad1 Qg6! 26.Qxg6 hxg6 27.Rxd6 Ne5 , which gave Black enough for his pawn in Chovanec-Balabaev, correspondence 2007. ]

**20...Nxb4 21.Nxb4 e4 22.Nd5 Kh8!?**

[A new move. Krasenkow isn't in a hurry and so tidies his position, trusting in his strong centre, queenside pressure and bishop-pair. 22...Rc5 23.Rd2 Qb8 is a little more forcing, but after 24.Rb1 Qb7 25.Nf4 Bf7 26.b4 it was clear that something had gone wrong in Krakovsky-Zernovic, correspondence 2009. ]

**23.Nf4**

[ I wonder if the Polish GM's idea was to meet 23.Rd2 with Qa5!? when 24.b4 Qa7 25.Rc1 *( 25.Rb1 Bxd5 26.Rxd5 f4* offers decent counterplay too *)* 25...Rxc1 26.Qxc1 Rc8 27.Qd1 Bh6 28.Nf4 Bxf4 29.gxf4 Qa3 continues to disrupt and should be about equal. ]

**23...Bf7 24.Rd2 Be5 25.a4**

[ Allowing his kingside to be broken up, but if Gabrielian wanted to avoid such a fate he wouldn't have retreated his knight to f4. Instead, 25.Nd5 would be a loss of time and White doesn't have anything after, say, Rc5 26.Ne3 Be6 27.b4 Rb5 28.Rb1 Qb6 . ]

**25...Bxf4 26.gxf4 d5** White might be a pawn up and have two connected passers, but I can't say that I overly care for his position. The f4-pawn is ripe to fall, leaving Black potentially doing very well in the centre and down the g-file. **27.Ra3**

[ Preparing to defend across the third rank if necessary. Perhaps White should, though, have just pushed his prize asset: for example, 27.a5!? Rg8 28.a6 Qb6 29.Kh1 when Black's counterplay should be enough to maintain a rough balance, as shown by Rg7 30.b4 Rcg8 31.a7 Ra8 32.Rda2 Qxb4 33.Rb1 Qd6 34.Qd4 Qc7 35.Rg1 Bg6 36.Rga1 when it's far from easy to see how either side might make progress without undertaking certain risks. ]

**27...Qd6 28.b4!?**

[ A temporary pawn sacrifice, played to try and regain the initiative. Once again, 28.a5 came into the equation too, but after Qxf4 29.Rc2 Qe5 30.a6 Ra8 31.b4 f4 Black's pawns appear the more dangerous. ]

**28...Qxf4!?**

[ White's main point would have been revealed after 28...Qxb4? 29.Qa1+ Kg8 30.Rg3+ Bg6 31.Rxd5 . ]

[ However, the text wasn't forced. Indeed, 28...Rc4 looks more obvious and superior, but after 29.Rd4 Rxb4 30.Rxb4 Qxb4 31.Qa1+ d4 32.a5 Ra8 33.a6 Kg7 34.a7 Qc5 35.Bf1 I wonder if Krasenkow couldn't see any real way to make progress and so elected to complicate in this important last round battle. ]

**29.Qa1+ Kg8 30.Rg3+ Bg6 31.Qa2**

[ Perhaps 31.Qd4!? was a better try, prioritising control over material. Certainly after Rfd8 32.b5 Rc1+ 33.Bf1 Qh6 34.Rd1 f4 35.Rg2 Rxd1 36.Qxd1 f3 37.Rg3 d4 38.a5 White seems to be doing well, extremely scary though the black pawns do appear to the human eye. ]

**31...Rc1+ 32.Bf1 Qe5!** The f-pawn's path must be cleared, even at the cost of a pawn. Moreover, this way Black will get a rook behind the queenside duo. **33.Rxd5 Qa1 34.Qxa1 Rxa1 35.f4!**

[ A sensible attempt to both blockade and obtain some luft. Otherwise, White might well have faced back-rank issues, such as after 35.a5 f4 36.Rb3 Rc8 . ]

**35...Rc8 36.Rc5 Rd8** Black has managed to force his rook into the game and all three results are very possible. **37.Kf2 Rd2+!?**

[ Evidently Krasenkow had decided to play for a win by this point and was

eventually rewarded with a share of first. Instead, 37...Rxa4 38.Rxf5 Rxb4 39.Rb5 would just have led to a handshake and some minor money. ]

**38.Ke3 Rxh2 39.Bc4+ Kf8?**

[ This attempt to nudge towards the queenside could have been costly. 39...Kg7 was correct and after 40.Bb3 Re1+ 41.Kd4 e3 42.Re5 *(* now *42.Ke5!?* can be countered by *e2 43.Rc7+ Kh6* , although here White has a study-like way to hold: *44.Rxg6+! Kxg6 45.Be6 h6 46.Bf7+ Kg7 47.Be6+* and Black can't avoid the repetition, being forced to play *Kg6 )* 42...e2 play would have echoed the course of the game. ]

**40.Bb3!** A surprisingly venomous retreat, cutting out any check on d1 while enabling the c-rook to retreat if needed. **40...Re1+ 41.Kd4 e3 42.Re5?**

[ After this Black can breathe again. 42.Ke5! would have been very strong, as e2? 43.Rxg6! hxg6 44.Kf6 Ke8 45.Rc8+ Kd7 46.Be6+ Kd6 47.b5 weaves a lovely mating net. Indeed, one could easily imagine such a combination gracing the pages of Krasenkow's new puzzle book, 'Finding Chess Jewels'. ]

**42...e2 43.Rge3 Rb1 44.Kc3**

[ Even 44.Rxe2!? Rxe2 45.Rxe2 Rxb3 46.Kc5 comes into consideration, but Black is able to halt the pawns with Rc3+ 47.Kb6 Rc4 48.Rb2 Rxf4 49.a5 Rc4 50.b5 f4 51.Rf2 Be8! 52.a6 Rb4 53.a7 Rxb5+ 54.Ka6 Rb4 . ]

**44...Rc1+ 45.Kd4 Rf2! 46.Rxe2?**

[ Possibly nerves and fatigue were plaguing Gabrielian by this point or maybe the other results meant that he too had to play for a win. However, the text will but lead to trouble. Krasenkow has done very well to create all manner of problems with his rooks and e-pawn, but White should still be OK here, as shown by, say, 46.Kd3 Rxf4 47.Rxe2 Rxb4 48.Rb5 f4+ 49.Kd2 Rxb5 50.axb5 Rc5 51.Rf2 . ]

**46...Rxf4+ 47.Ke3 Rxb4 48.Kd2 Rc7** White's problem is not just that he's lost a pawn, but that his king remains exposed and a bit of a problem. One has to be impressed by Krasenkow's determination and ability to keep setting problems thus far and the suffering is by no means over for Gabrielian, even if objectively this position should still be drawn. **49.Rb5 Rd4+!?**

[ Continuing to play for the win. 49...Rxb5 50.axb5 Rc5 51.Ba4 Be8 52.Ke3 Bxb5 53.Bxb5 Rxb5 54.Kf4 should just be a draw at GM level. ]

**50.Ke3 Rh4 51.Kd2 f4 52.Rf2 Rd7+ 53.Kc3 Rd3+ 54.Kb2 f3** Krasenkow has continued to improve his forces over the past few moves, but forcing that f-pawn home isn't going to be an easy task. **55.Bc2**

[ Hardly bad, even if 55.a5!? looks somewhat more to the point when Rg4 *( 55...Re3 56.Bd1 Rh1 57.Rd5* defends *)* 56.Rf1 Be4 57.Re5 Rg2+ 58.Ka3 Ba8 59.a6 would still have left Black with plenty of work to do. ]

**55...Re3 56.Bd1! Rf4**

[ White's point was that 56...Be4 57.Bxf3 Rxf3 58.Rxf3+ Bxf3 59.Rf5+ Kg7 60.Rxf3 Rxa4 61.Kc2 would have resulted in another drawn rook endgame. ]

**57.Rb3** Forcing the rooks off and seemingly edging even closer to the hallowed land of a draw. **57...Rxb3+ 58.Kxb3 Bh5 59.Kc3 Rf6 60.Bc2 Kg7 61.Be4 Kh6**

There's no reason to split the point just yet, so Black keeps grinding away. **62.Kd4 Kg5!? 63.Ke3?**
[Walking into a fatal pin. 63.Bxh7 was indicated, and if Kf4 64.Be4! Ra6 *(*or *64...Rd6+ 65.Kc5 )* 65.Bxf3 Rxa4+ 66.Kd3 Bxf3 , although in this case a further 50 moves of suffering would still have lain before White. ]
**63...Re6 64.Kd4**
[Now Black's king enters, but 64.Rf1 Bg4 was no improvement. ]

[Karjakin has championed this move, but in his most recent outing, he preferred 14.g3 , as we'll see in Karjakin-Shirov. ]

**14...Be6 15.Qf3 Qd7 16.Rd1**

[Centralising, whereas 16.g4 Bd8! 17.Bd3 a5 gives Black easy and good counterplay, as Tony showed in his notes to Motylev-Filippov, Sochi 2005. ]

**16...Bd8 17.h5** Rogozenko has suggested that White shouldn't cede control of the g5-square just yet, but I'm not so sure. In any case play often transposes whether White begins with 17 h5 or 17 Be2. The alternatives are:

[a) 17.Bd3 Ne7 18.Bc2 b4! was a strong pawn sacrifice in Karjakin-Eljanov, Warsaw 2005 (see the Archive). ]

[b) 17.Be2 Ne7 18.Rd2!? *(*Kotronias' ideas are always worth noting, although I'm not sure that this brings White any advantage alternatively, *18.h5 h6* transposes to our main game, while*; 18.g4 a5 19.h5 Bxd5 20.Nxd5 Nxd5 21.Rxd5 b4 22.c4 Qe7 23.b3 Bb6* was very comfortable for Black in Chan Wei Xuan-So, Singapore 2007: I'll give the rest of the moves because they show how Black can hope to grind with his superior bishop: *24.0-0 Ra8 25.Kg2 a4 26.Bd1 axb3 27.Bxb3 Bc5 28.Qg3 g6 29.Rh1 Qg5 30.Rd3 Kg7 31.Rf3 h6 32.Rh4 Bd4 33.Rd3 Rfe8 34.Rh3 Re6! 35.Rf3 Rf6 36.Rxf6 Qxf6 37.Qf3 Qg5 38.Rg3?! Bc5 39.Qe2 Re8 40.Ba4 Re6! 41.Bc6? Rf6 42.f3 Qc1 43.Bd5 Qg1+ 44.Kh3 Qh1+ 45.Qh2 Qe1 46.hxg6 fxg6 47.g5 hxg5 48.Kg4 Be3 49.Qg2 Rf4+ 50.Kxg5 Rxe4+?!* 0-1 *)* 18...Qb7! *(*now *18...a5 19.h5 Bxd5 20.Nxd5 Nxd5 21.Rxd5 b4 22.c4* might not be an easy equalizer for Black because White has avoided a weakening g2-g4, and there are ideas of c5 and *Bb6? 23.h6!;* perhaps there's a case for *18...Kh8!?* , asking White to clarify the situation on the kingside and with regards to his king position *)* 19.g3 Nxd5 20.Nxd5 f5 (it's hard to believe that this, in conjunction with 18... Qb7, doesn't offer Black decent counterplay) 21.exf5 Rxf5 *(*there's also a good case for *21...Bxf5!?* , following up with ...Bb6 or ...Qf7, and especially hoping for *22.Bd3? Bg5! 23.hxg5 e4 24.Qg2 Qxd5 25.0-0 Rbe8* with advantage *)* 22.Qe4 Bb6 23.0-0 Bxd5!? 24.Qxf5 Rf8 25.Qh3 Qf7 gave Black reasonable play for the exchange in Kotronias-Yakovich, Port Erin 2007. ]

**17...h6**

[As pointed out by Rogozenko, there's also a case for 17...Kh8!? , after which 18.Be2 *( 18.h6 g6 19.Nf6 Qe7 20.Ned5 Bxd5 21.Nxd5 Qg5* also gives Black good counterplay *)* 18...Bg5 19.Nf5 a5 20.Qg4 h6 21.g3 b4 was pretty unclear in Erdogdu-Oleksienko, Lviv 2006. ]

**18.Be2 Ne7 19.0-0 Qc8!**

[This has become established as Black's main move, keeping the e7-knight defended by the dark-squared bishop and so preventing 20 Nf5, whereas 19...Bb6?! 20.Nf5 Nxd5 21.Rxd5! Bxf5 22.exf5 gives White a pleasant edge due to his light-square control. ]

**20.Nxe7+ Bxe7 21.Nf5**

[White has also tried 21.b3 , but this shouldn't bring him any advantage, as

Rogozenko demonstrated in his notes to Jakovenko-Ivanchuk, Foros 2007. ]

**21...Qc7 22.Qg3!**

[ A new move and an improvement over the previous game in this line. After 22.Bd3 Bg5 23.Bc2 b4! it was already time for White to seek equality in Karjakin-Yakovich, Dagomys 2007, with 24.Bb3! bxc3 25.Qxc3 Qxc3 26.bxc3 Bxb3 27.axb3 Rxb3 28.Rd3! , as shown by Rogozenko. ]

**22...Bg5!?**

[ Sacrificing the d-pawn for activity. Presumably Eljanov didn't like the look of 22...Bxf5 23.exf5 Bg5 24.Rd5! , preventing ...b4 followed by ...Qa5. White can hope to consolidate his grip on the light squares here, although this might not be so bad for Black, especially if he can get in ...e4. ]

**23.Nxd6 Bf4 24.Qf3 g6?!**

[ Trying to open the kingside for counterplay, but was this slightly panicky move necessary? I'm not at all sure and suspect that future games may well test 24...Rfd8!? 25.Nf5 Bg5 , relying on the bishop-pair and queenside pressure for compensation, *(* whereas the more forcing *25...Bxa2 26.Rxd8+ Rxd8 27.Ra1 Be6 28.Rxa6 Qb7 29.Ra5 b4 30.Rb5 Rd1+ 31.Bxd1 Qxb5* still leaves Black with some work to do to draw. *)* ]

**25.c4! Rb6**

[ White also retains a pull after 25...bxc4!? 26.g3 Bg5 27.Qc3 , followed y Nxc4, but if Black doesn't want to let the d6-knight live, he should play in this manner. ]

**26.Qa3 gxh5 27.c5 Rc6 28.b4 Qe7 29.Qf3**

[ Despite the imminent peaceful end, I don't believe that this is a mistake. Also promising, though, may well be the sharper 29.g3!? Qg5 30.Kh1 Kh8 31.Rg1 Rg8 32.Bf3 . ]

**29...h4**

[ Black is quite solid here, and given time might get something going down the g-file, but I'm rather baffled why White didn't continue: for example, 29...h4 30.Nf5 Qg5 31.Qg4 Bxf5 *(* or *31...Kh8!? 32.Qxh4 Qxh4 33.Nxh4 Bxa2 34.Nf5 Bg5 35.Rd7* and White can still press *)* 32.Qxf5 Qxf5 33.exf5 when the opposite-coloured bishops offer Black some chances to hold, but White's passed c-pawn and control of the d-file gives him a sizeable advantage. ]

Bundesliga 2015-16 (2.2) 20.09.2015

*[Roiz, M]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c4 b4 12.Nc2 0-0 13.g3 Rb8?!**

A new move for our PGN archive. However, as this game proves, the rook has no useful functions here.

[Instead, there are 2 main ways of handling this position. The first one is connected with transferring the queen to c5 13...Bg5 14.Bg2 Qa5 15.0-0 Qc5 In this popular position Alexei went for the most ambitious 16.Kh1 in Shirov, A (2710) - Krasenkow, M (2607) / Vladimir Petrov Momorial, Jurmala rapid [Richard Palliser] *(*There are some alternatives, which were also covered on our site: *16.Qd3* Alekseev, E (2695) - Yakovich, Y (2517) / Russian Team Championship 2013 [Richard Palliser]*; 16.Qe2* Alekseev, E (2677) - Kogan, A (2555) / 16th ch-EUP Indiv 2015 [Roiz, M] *)*]

[The other one - 13...a5 14.Bg2 Bg5 15.0-0 Be6 is usually based on exchanging the strong Nd5 at some point. For instance, 16.Qd3 *(*One year later, Boris has successfully employed the same approach in a different situation: *16.b3 g6 17.Qe2 Bxd5 18.exd5 Nd4 19.Nxd4 exd4 20.Qd3 a4=* Filippov, A (2630) - Gelfand, B (2764) / FIDE World Cup, Tromso 2013 [Richard Palliser] *)* 16...Bxd5 17.cxd5 Nb8 18.a3 Na6 let Black achieve a quick draw in Anand, V (2791) - Gelfand, B (2727) / World Championship, Moscow 2012 [Richard Palliser] ]

**14.Qd3!** A multi-task move - White prevents Black from pushing ...b4-b3 and makes the d1-spot vacant for the rooks. **14...Bg5** A natural decision - the Bf6 was clearly misplaced, so it makes sense to remove it and maybe advance the f-pawn at some point.

[In case of 14...Be6 15.Bg2! *(*The same approach as in the game offers less now: *15.h4 g6 16.Bh3 h5 17.Kf1 Bg7 18.Kg2 Qd7 )* 15...a5 16.0-0 Bg5 17.b3 g6 18.Rad1 , followed by f2-f4 White would obtain a stable edge. ]
